The executive committee of the Board of Regents of the University of tinues. Oregon, consisting of Regents D P Thompson, S H Friendly and A G Hovey, met at Villard Hall yesterday afternoon, when the following business was transacted;

PROFESSOR ELECTED.

The first business transacted was the filing of the chair of chemistry made vacant by the death of Prof S E McClure. There were many appli; cants for the position from nearly every portion of the United States. After fully considering the matter, Arthur Lochman, aged 24 years, of San Francisco, Cal., was elected to the position, and the Secretary of the Board notified the gentleman of his election yesterday evening.

Prof Lochman graduated from the University of California in the class of 93, after having taken a three years course in chemistry, acting as assistant the last half year; he then went to Germany and graduated from the University of Munich, and was given the degree of Ph. D. Upon his return

to the United States from Germany he spent a few months in independent research work at Harvard University; was then called to the University of Michigan, first us assistant, then as instructor in general chemistry, and has served in the position about 18

months, and has been re-elected for the coming year. He has written several works on chemistry and is now preparing the manuscript of one soon to be published entitled "Split of Organic Chemistry."
