its debt of \$53,000,000 to the government-is \$105,000,000.

Its net earnings are about \$6,-500,000 annually, or more than 6 per cent on its debt.

Why, then, should the government give away \$20,000,000 of its claim, every dollar of which the road is amply good for?

The first mortgage bond holders are getting 6 parcent interest, with a secure principal. The government is in no immediate need of its money. Every creditor of the road is well secured, and if the road is to be sold it should sell for enough to pay all its debts.

Indeed, an act of Congress peremptorily requires the president to bid for it a sum sufficient to pay all its debts.

Yet because of a bargain with a blind pool, as set forth in The World's news columns today, the present administration proposes to sacrifice #20,000,000 of the government's claim and to let the blind pool pocket it without even telling three-fourths of the whole. Vast who the members of the blind pool are!

The revelation of facts is an instructive one.

Bicycles have scored a victory in the courts. The supreme court of Russia little exceeds 2,000,000 Iowa has rendered a decision that bicyclists are not compelled to carry a bell and exhibit a light at night. Yet the decision is modified by the finding that the bicyclist, not being supplied with a bell and light, who injures a person, is guilty of contributory negligence. The decision carries the inference that the pedestrian is also guilty of contributory negligence by reason of not carrying a bell and light.

It is quite probable that Oregon has the finest place for split rod fishing in the world, that is where the fishermen can fight with a big fish on even terms, or as near even terms as such a thing is possible says the Albany Democrat. That is at Yaquina Bay. It is being developed this year particularly so that it offers remarkable advantages for this sport. Thirty minute contests that try the skill of the finest fizhermen are frequent.

COLLECTS ELK TEETH .-- M E Cartis, the actor, doing the Northwest is a fiend for collecting elk's teeth. He had a collection of 3,000, to which at The Dalles he added 300, which he bought of a crowd of Indians. His teeth have averaged him 50 cents apiece, and he has the distinction of having probably the largest collection of elk's teeth in the world. It is need-

less to say that Mr Curtis is somewhat of an Elk hims lf.

JOHN VANDUYNE. Coburg, Or. RUSSIA'S EMPIRE.

A census of the Russian empire has just been completed. The population, as now published, is 129,-211,113, of which 64,616,280 are males and 64,594,833 are females. The population of Russia in Europe 13 nearly 100,000,000, or more than as the population is, the larger part of this great empire is but thinly inhabited. Russia's Asiatic dominions extend over an area of 6,564, 000 square miles; yet the total population of this vast area is less than 30,000,000. The area of European

square miles, and the total erea of the empire is 8,660,000 square miles.

The grave of Dr Whitman, who was murdered by the Indians fifty years ago, in which are supposed to have been buried 11 other victims of the massacre, has been opened preparatory to the erection of a mausoleum. Near the surface in one corner were found four skulls nearly intact, among which the one belonging to Doctor Whitman could be plainly distinguished by the gold filling in the teeth and a tomabawk wound in the back of the head.

Millionaire Rouss of New York offered \$1,000,000 to any man who would restore his eye sight. A Burmese doctor has come all the order of way from India with the hopes of winning the fortune. After week's treatment Mr Rouss says he can faintly see objects held within 15 inches of his eyes, but he has no confidence that his eyesight will be restored. Paul Dana will succeed his father in charge of the New York Snn. It was his father's wish and the younger man's long experience on the Sun qualifies him for the new responsibility. Chester S Lord will remain managing editor and there will be few changes in important places.

Corvallis Times: A movement is on foot to start a saloon in Monroe. The necessary petition requires only some seven or eight names to make it fulfill the requirements of the law. H C Owen, who is behind the project was in town yesterday looking after the interests of the concern.

Palouse, Wash., has a genuine epi demic of scarlet fover, and there is great alarm because of the malignancy of the disease, and the large number of cases in town. Every house in which the disease is known has been quarantined. The schools are closed, and no children are allowed on the streets. No public meetings will be allowed. No churches held services Sunday.

At Prineville the other day Del Shields played rather a shabby trick on his bondsmen and the sheriff. He was bound over on a charge of arson, having burned the city jall at Mitchell and was indicted. After his case had been reported by the grand jury he mounted his horse and rode out of town, leaving his bondsmen to foot the bill. At last accounts the sheriff had been unable to locate him.

Corvallis Times, Oct 27: Oregon hard wood is in demand. Fletche Linn, of the Oregon Furniture Manufacturing company, Portland, was in town Monday buying everything in the shape of ash and maple lumber that he could find. Even a 200 foot lot owned by S N Wilkins was purchased. In all he secured in Corvalits three car loads. Mr Linn, it is said, visited every town along the west side and purchased the same sort of lumber, wherever he found it.
