SAURDAY, NOVEMBER 6

UNION SENTIMENT GROWING.

The union sentiment is growing in every county in Oregon, with the possible exception of Multnomah, says the McMinnville Register.

And the Portland Tribune adds: The Yamhill county paper may be about right in both its statement of fact and its prediction.

THE HIT OF THE DAY.

The day before Henry George's tragic death in New York he made this striking declaration from the platform:

"It is all very well for Mr Croker to tell me to go to the grand jury or district attorney. Mr Croker knows very well that I cannot do that as a private citizen.

THE CIRCUIT JUDGESHIP.

Several persons are being bothered about the judgeship of this judicial district according to the Roseburg Review.

"The Republican party will not be lacking for candidates for the circuit judgeship next year. Some of those said to be in the field are: District Attorney W E Yates, Judge Hufford, of Benton, A C Woodcock, of Lane, and A M Crawford, of Douglas.

There are over 459,000 miles of railway in operation in the world, and, according to Mr Robert P Porter, the century will close with over 500,000.

The Masonic fraternity of Arizona is going to have the grandest treat ever experienced in the territory, if not in the United States.

Alaska salmon packers are experiencing the usual result of rasping without sowing. The supply is rapidly decreasing and unless salmon are artificially propagated in the northern waters the noble Alaskan salmon will soon be a thing of the past, commercially speaking.

Hanna is at his old game. The vote in Ohio had not been counted when he claimed the legislature was surely Republican.

FLORENCE-ALASKA EXPEDITION

A Full Description of the Places and Vessel.

The public is becoming greatly interested in an enterprise started at Florence, Oregon, with a view to securing a share of the wealth of the golden North.

In the enthusiasm and energy displayed by the inauguration of this expedition, one is reminded of the Argonauts of old, the Spanish galleys of middle history, laden with gold found in new lands, and the more recent similar expeditions from England and elsewhere to the gold fields of Australia and South Africa.

No one need be reminded of the wonderful success of those apparently visionary exploits. Indeed, it is a matter of history that in those very same gold-hunting adventures were laid the foundations of many of the greatest fortunes of both the old and new worlds.

Those who, from old age, infirmity, or other conditions could not go, put in money and sent others more able to withstand the hardships of the new and unexplored country, and thus those expeditions found themselves well equipped with young and energetic blood and all necessary furnishings.

So it is now in the little seaport of Florence that is but 10 years old, we find all classes bending every energy to get this Alaska expedition started with all things needful to successfully meet the new conditions of that country and wrest from her frozen bosom the coveted gold.

The objects of this company and the energy displayed in bringing them to a successful issue command the respect and admiration of every person who understands them. New lands and new gold! The spirit of adventure and hope of fortune, always strong in the true American heart, is being aroused by this new opportunity, and with every stroke of the shipbuilders' ax the enthusiasm grows apace.

Every report from Alaska confirms the statement that gold exists there in paying quantities over a territory 100 miles long and 400 miles wide; that nine-tenths of this vast area have not been prospected beyond establishing the fact that gold is found in paying quantities. This Alaska Gold Mining and Navigation Company is organized for the purpose of co-operation and mutual protection.

The advantage in going with known parties and whose interests are mutual, is apparent to every one. It gives every man a chance, from the poorest to the richest. The man who has nothing but his labor may work on the vessel, now building, and earn his passage to Alaska, where labor is abundant at wages from \$10 to \$20 per day.

The man who has means to invest may put it in shares of stock, send a trusted man to the mines of Alaska, and share the profits of the expedition in proportion to the amount of funds invested.

A base of supplies will be constantly maintained at a convenient point in the gold-bearing district, and distributed to the stockholders at actual cost. A light-draft steamer especially adapted for service in the Yukon will be chartered or built and run in connection with the ocean vessel now building at Florence.

This company has information about the mines of Alaska that is recent, direct and reliable. The true story of their richness reads like a fairy tale. Every returning miner confirms these reports and proves the facts with the golden nuggets.

The mineral districts of Alaska and the Yukon are enduring, enormously rich and extensive in magnitude. The quartz mines and placers of Alaska produced in 1896 \$4,600,000, and only a beginning was made. In 1884 there was not a quartz mill in the entire territory, and even now there is no quartz mill farther than three miles from tide water.

When railroads and steamboats penetrate the interior and unlock nature's great treasure house, such fortunes will be made as will make all former achievements seem insignificant in comparison. It is a foregone conclusion that the mining industry of Alaska must increase at a very rapid rate for the next 50 years. It is the purpose of this company to secure its stockholders their share of this great wealth.

This expedition will succeed because (barring accidents) it can not fail, the vessel and cargo being fully insured, reducing the risk to the lowest minimum. Every properly equipped steamer entering the Alaska trade must make money, because the demand for steamer service will be greater than the supply.

While such an enterprise is new to Lane county people, it is only a repetition of what has been carried to success in hundreds of instances elsewhere. Our people are waking up to the innumerable opportunities for making money in Alaska. Lane county should send with this Florence expedition 100 men, and with the average success of the Alaskan miners, they should return with \$6000 each, or a grand total of \$600,000.

Every young and able-bodied man should investigate this opportunity for securing a competence. Every person who can spare or raise a sum of money should secure shares of the stock. I do not mean that you should mortgage your home—for if you had \$10,000 you could never buy anything better than a home—but many who have money to spare could invest it in this enterprise with the prospect of enormous returns.

Men have grubstaked friends at a cost of only \$400 or \$500, and thereby become half owners in mines worth hundreds of thousands. Doubtless this or similar experience will be repeated in this expedition. The enterprise is in the hands of men of energy and experience. "Old men for wisdom and young men for action," forms a combination that will make success reason-

ably certain. The company has increased its stock from \$20,000 to \$100,000, divided into shares of \$10 each. All unsold stock will remain the property of the company, of which every stockholder will own his proportionate share.

Portland, Astoria, or some seaport accessible by railroad will be the point of departure from which this steamship will make regular trips to Alaskan ports.

A committee of five was appointed to select a question for debate between Willamette and the University of Oregon of Eugene, to be held in Salem on the 14th of January next. Willamette submits the question and U of O chooses sides. The subject for debate must be forwarded to the U of O before the 10th inst.

A YOUTHFUL CRIMINAL.—Tuesday's Salem Journal: Sheriff J H Gray and guards, Percy Davis and Joe Hinkle, of Crook county, today brought Wm Stroud and Jos Dillman to the penitentiary.

The former was convicted of assault with a dangerous weapon and received a sentence of one and a half years. The latter will serve one year for larceny. Dillman is a mere youth being but 17 years of age.

He was employed by a rancher near Prineville. One day his employer returned from the county seat with \$800 in coin which he had drawn from the bank. This amount was placed in the house where the boy afterwards discovered it. He could not resist the temptation and took the money.

Suspicion fastened upon him and he was arrested, whereupon he refunded the \$800 but his trial and conviction followed and he received a sentence of one year. It seems too bad that a youth of 17 years should be incarcerated with rough criminals.

UNLIKE EUGENE MEN.—A remarkable instance of tender conjugal consideration is that of the Los Angeles man who steadfastly refuses to work because he fears that his wife may be stolen in his absence. It is probable that other men are not united in a desire to possess his only own, charming as he describes her, but no one could make him believe it. So in his great, tired love he sacrifices his disposition to labor and loaf around home in order to protect her. It is an affecting instance, but no one knows what excuse he would offer if he did not have a wife.

G W Handaker, steward for the insane asylum at Salem, writes: "We have raised on the asylum farm this year nearly 10,000 bushels of potatoes; we are getting along nicely with sowing fall grain, have about 175 acres sown; also raised 10,500 pounds of grapes." From which it may be inferred they are not all sluggards there.

Nov 5, 1897. J B Pengra, of Springfield, was in this vicinity Saturday buying cattle.

R C Edwards and wife visited the county seat last week.

Rev Bennett, of Philomath, came up Saturday to hold the United Brethren quarterly conference in place of Elder Wyatt who was killed recently by a runaway horse.

M E Edwards is attending E R Parker's school at Trent.

Several parties in this vicinity contemplate bidding on mail routes. When it comes to bonds there may be trouble, as two bondsmen are required each worth double the amount of the bid.

R Holbrook has returned from Washington where he had been at work a few months.
