During the visit of King Chulalongkorn, of Siam, a highly prized paper that no one had been able to decipher satisfactorily, because of the mixture of Slamese and Chinese characters, was uncarthed and shown to the Slamese visitor.

The King glanced at the precious paper and then laughed heartily, after which he went on to explain that this carefully guarded and highly prized document was merely a fire insurance polley drawn up for a Chinese company by some Slamese firm, and that his own signature, which it bore, was such as all similar documents contain. It was, moreover, written by one of his secretarles detailed for that work.

That document is not so highly prized as it was.

### HOUSE WITH A HISTORY

Structure Which Has More than Common Interest for Masons.

In Canton, N. Y., stands a house which has more than a common interest for the masons of the country. It shows, in the first place, "the royal arch," which seems to be a shape of mystic meaning to the order. And in the second place, it was built to flaunt the principles of its builder, Paul Boynton, in the faces of his enemies, the anti-Masons.

Boynton came to Canton in 1831 and was prominently identified with the Masonic order. About that time a cruhope of the farmer lies in the conser- ' sade against the organization started; there were pamphlets published on "Masonry Exposed" and the like. In the excitement one prominent opponent of the Masons disappeared and his comrades alleged foul play. Boynton's house was burned in the trouble that followed.
