## NORE <br> The Assessments of lane County and The Goid Standard

MARK HANNA'S WORK
The mortgages of Lane county wo have shown from the official records increased since October 1896 in the sum of $\$ 45,000$. And some gold standard advocates have actually shouted "Hurrah for Mark Hanna" when confronted with these figures, saying that mortgages were an indication of prosperity---probably of the Gold Standard kind. This is prooably true if you are the President of the Mortgage Loan Company that has received it, but on the other hand if your little home has been plastered for the necossaries of and Condons in the world cannot make you believe it a blessing.

## Total Gain

Citizens of Lane county study these figures well 280 carefully. What do they mean?

## Loss of taxable property in 4 years

## Gain of polls

Think of it... 2373 polls paying taxes on 8777,373 less
prop rty in 1897 than 593 polls did in 1893. Does not
this mean bankruptey for our people?
These figures are official
y calling at the clerk's office and citizen can ascertain yent rolls

This is the kind of "prosperity" that the Gold Standis giving the country.
Be careful how you vote June 6. The Union ticket is in favor of gold, silver and greenbacks, the money of the constitution. The republican ticket is in favor of the
