WEEKLY MARKET LETTER.

Trade Conditions in the Leading Cities of the World.

Professionals are now of the opinion that there are but two considerations in the market, the crop prospects and the stocks. They believe that the price of the conditons likely to make the winter wheat harvest an early or late one. The general sentiment is rather bearish on the price, but it is borne in mind delay the harvest so as to cost a July short seller a good deal of money. The feeling as to September and December is that anything around 80 cents will be a high price unless the crop prospect is disturbed in an important way. With these futures it will make little difference whether the harvest is late or early. If a crop of 700,000,000 bushels, or even 600,000,000 bushels is secured, it is taken for granted a price anywhere around 80 cents is too good to expect. Wheat speculators know very well that crop conditions abroad are as important to the price as the conditions at home; and so when they talk of 80 cents as a high price harvest prospects the world over. That is the outlook now, although there are some complaints of unseasonthere are of "rust and cluch bugs in without some complaint from some quarter or without some crop mishap. So far, however, the harvest outlook is in a general way a fine one the world over. Each week now finishes a large wheat area, and in three weeks the result of the entire winter wheat crop will be settled.

The new military conversation, or rather the host of military phrases, heard these days is exceedingly interesting. A girl returns from some shopping expedition. Before the war was started she would have said very simply: "I'll go up and tell mother about Now her phrase is, "I'll go and give the countersign to mother." Or, telling a sister to say such and such to her father, she will say, "Report to headquarters."

"Advance into the other room," is the proper way to put it now, and, instead of speaking of going up or down stairs you should say, if you would be really in form nowadays, "I'm going aloft," or "I'm going below."

Betaking one's self to one's downy couch is expressed by the words, "I'm going to turn in," and on the street, when two, or three or four girls are walking together, there are often to be heard these words of command, "Right about face!" and "Forward, march!"

and used for the apparatus by which photographs from a succession of ple tures are thrown on a screen and made to appear as moving figures. "Blo graph" and "motograph" are the simplest, "Panoramograph" and "chronophotographoscope" are among the longest, "Cinematograph" and "kinetoscope" are among the most common in use. "Phantoscope" and "vitagraph" are the most poetleal sounding, "Theatograph" and "motorscope" are not bad. What "lobsterscope" and "corminograph" are derived from no one but the inventors know. Cows With Ear Rings. A cow is the last creature one would expect to see with ear-rings, yet every cow in Beligum must wear them now. The director-general of agriculture has issued a regulation that all animals of the bovine species are to wear earrings as soon as they have attained the age of three months. Breeders are obliged to keep an exact account of the animals raised by them and the ring on which is engraved a number is fastened in the animal's ear to prevent the substitution of one animal for another.

"You May Fire When Ready, Gridley. "You may fire when ready, Gridley." That phrase of Commodore Dewey's, as the Olympia steaming slowly, was getting the range of her guns on the Spanish fleet, is likely to be long quoted and widely remembered. Surely, says The Criterion, it breathes coolness, care, confidence in the face of an enormous and pressing responsibility. Compare it with the thunder it instantly wakened, the tremendous forces it let loose, the terrible destruction that followed, and you will find it the most typical Americanism of the quarter-century. Mark, too, its politeness, as well as its touch of comradeship.

Bells in Jerusalem. Turks and Jews, as well as Chris-

tians, according to The Kolnschie Volkszeitung, have been much excited by the sound of the three bells of the new Protestant Church in Jerusalem. For several centuries the use of bells by the Christians in Palestine, or elsewhere within the Ottoman Empire, had been Horrr, Ph. D., Principal. prohibited by the Great Turk, who has conceded it now, however, to his friend and ally, the Evangelical German Kaiser. In the Theatre de la Turquie, published in 1688, it is said, Turks hate bells, as a symbol of Christianity, and do not permit even the Christians to use them. Only in a few remote mountain convents, or in lonely islands, where there are no resident Mohammedians, is the use of a bell tolerated."
