

Helping Them

Two of my little boys had eruptions on their faces. I began giving them Hood's Sarsaparilla, and before they had taken the first bottle the sores were all gone. We are now giving Hood's Sarsaparilla to our babies for hives, and it is doing them good. -Mrs. C. A. Bates, Stayton, Mo.

Hood's Sarsaparilla

Revolutionary Seat.

A seat especially adapted for use on trolley cars, for the overhead seats in houses, for benches in public parks, for country houses, etc., is described upon the principle of the rolling chair, so that there is always a surface during the rainy or snowy weather. As a covering for the ordinary fixed rails or solid wood seat there is an endless roll, formed of flat strips of wood, riveted securely to bands of metal, pyramoid or similar material, presenting an even surface, the width of a single seat, which is rolled around the seat board. By means of sunk buttons or rings laced at suitable intervals this roll can be easily revolved, bringing any portion into position for a seat, as may be required. Thus, in the event of the seat being exposed to the rain and rendered unfit for use, the person desiring to sit on has simply by means of the revolving holes or rings to draw the roll forward, and a perfectly dry portion is brought into position, whilst the roll of such length that another dry portion is sufficient for a seat is still in reserve, if found necessary. In addition to this the roll is revolved in either direction it is underneath the seat, though in contact with an india-rubber paper which takes off all the heavy moisture so that even the portion of the seat which has been exposed to the rain is very quickly dried and again rendered fit for use.

Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Kidney and Bladder Cure. See full particulars in circular. DR. R. H. KLINE, Ltd., 235 N. 2d St., Philadelphia, Pa.

A seven-foot granite monument in a garden at Garmisch, Germany, has an iron tablet inscribed: "Here, in the year 1871, the first trials were made with the cultivation of the potato."

We will forfeit \$1,000 if any of our published testimonials are proven to be not genuine. Tus Pico Co., Warren, Pa.

The death penalty is rarely enforced in Germany, Austria, Denmark or Sweden. In New York 11 out of 12 murderers escape without any punishment, and in the United States only one murderer in 50 suffers capital punishment.

A portable X-ray apparatus no bigger than a Webster's dictionary, but powerful enough to enable a surgeon to look through a man's body, has been invented for use in war by Professor Rignold A. Fessenden, of Pittsburgh.

The photographic action of light, though not destroyed at very low temperatures, is diminished by 20 per cent, the loss being greatest in the violet light which at ordinary temperatures is the most effective.

Professor Dewar recently stated in a course of a lecture at the Royal Institution of Great Britain that there is now a great development in the liquefaction of liquid air as an anaesthetic agent.

No parental care ever falls to the lot of a single member of the insect tribe. The general eggs of an insect are designed to be hatched long after the parents are dead, so that most insects are born orphans.

Clocks can be accurately leveled by new shelf which has a fixed wall side supporting a pivoted, adjustable self-leveling level in the top, to set thumb screws on the upper side.

When dead bodies are entered as a cargo on a ship they are often recorded in the invoice as "statuary" or "natural history specimens," to allay the suspicious fears of the crew.

COULD NOT SLEEP.

Mrs. PINKHAM Relieved Her of All Her Troubles.

Mrs. MARGE BAIRCOCK, 176 Second Grand Rapids, Mich., had ovarian trouble with its attendant aches and pains, now she is well. Here are her own words: "Your Vegetable Compound has made me feel like a new person. Before I began taking it I was all run down, felt tired and sleepy most of the time, had pains in my back and side, and such terrible headaches all the time, and could not sleep well nights. I also had ovarian trouble. Through the advice of a friend I began the use of Lydia E. Pinkham's Vegetable Compound, and since taking it all troubles have gone. My monthly periods used to be so painful, but have had the slightest pain since taking your medicine. I cannot praise your Vegetable Compound too much. My husband and friends see such a change in me. I look so much better and have more color in my face."

Mrs. Pinkham invites women who are tired to write to her at Lynn, Mass., for advice, which is freely offered.

Make money by successful speculation in Chicago. We buy and sell wheat on margin. Fortune has been made on a small beginning by trading in wheat. Write for full particulars. Best of references given. Several years' experience in wheat trade, and a thorough knowledge of the business. Send for our free reference book. D. W. WING, HOPKINS & Co., 100 Board of Trade Building, Chicago, Ill.

WHEAT. PISO'S CURE FOR CONSUMPTION.

FIRED THE FIRST SHOT.

Gunner Charles Cavanaugh Opened the Battle at Manila.

CHARLES CAVANAUGH.

Letter was received from Cavanaugh by Charles Barber, a cousin, in which he said the fire of the Spanish fleet was at all times very wild, and that to the American sailors it was simply an exciting target practice. Gunner Cavanaugh is just 21 years old, and has been in the American navy nearly two years. He enlisted in November, 1896, and was drilled in the recruiting ship Independence. The following March he was sent across the Pacific in the mail steamer Peru, and after his arrival in Japan April 15 he was transferred to the flagship Olympia. He learned the tricks aboard ship very quickly, and was transferred to the Yorktown and back to the Olympia. His promotion was rapid, and he soon was placed in charge of one of the big guns.

BULLETS IN '01.

But Cheers of Welcome for the Bay State Troops in 1868.

The reception accorded recently in Baltimore, Md., to the Sixth Massachusetts Regiment, on route to Falls Church, Va., to fight the Spaniards, was in striking contrast to that given

ATTACK UPON THE SIXTH MASSACHUSETTS IN BALTIMORE.

Street between Gay and Bowley's wharf, April 19, 1861, where a mob of 10,000 assailed the troops.

the same regiment in the same city April 19, 1861, when the New England troops were on the way to Washington to defend the capital against a Confederate attack.

In '61 the troops were savagely attacked and blood flowed freely. Recently the troops were received with every demonstration of joy and patriotic fervor. Truly has time healed the wounds of the civil war. In '61 the Sixth Massachusetts Regiment, after leaving the President street railway station were proceeding along Pratt street, between Gay street and Bowley's wharf near Calvert street, when stone throwing and pistol firing by those opposed to the passage of the troops was commenced with great vigor. A large pile of cobblestones was piled up on the side of the street here and these were used to drive back the soldiers. There were thirty killed in the mob and more than 100 wounded. Five of the soldiers were killed and twenty-four were injured.

Among those who welcomed the Bay State soldiers last month were fifteen of the men who stoned them in '61. They made up in enthusiastic welcome for the dark event of thirty-seven years ago.

Duck Eggs in an Albumen Factory.

Near Chingkiang, China, is a great albumen factory, for the utilization of the duck eggs which are produced in that region in enormous quantities. flocks of 4,000 and 5,000 ducks being by no means uncommon. The eggs are broken at the rate of from 40,000 to 60,000 per day by women, who separate the white from the yolk, the former being carefully cleaned and dried until they resemble fish glue, when they are packed in 400-pound cases lined with zinc. The yolks are passed through sieves into twenty-five gallon receptacles, mixed with a salt and borax solution, packed in 500-pound barrels, and used in Europe for preparing and dressing articles of superior quality. The albumen finds a ready market in England, France and Germany for dyes for the best cotton goods.—Philadelphia Press.

Liverpool and Slave Trade.

The great wealth of the merchants of London and Bristol enabled them to enjoy a practical monopoly of the African slave trade for a long period prior to Liverpool having any share in it, says Gomer Williams "History of the Liverpool Privateers." Liverpool adventurers with a small capital were unable to equip vessels and purchase goods specially adapted to the African market and of no use outside of that market, nor could they afford to avail the uncertain results of round voyages, sometimes prolonged to more than a year and subject to terrible dangers unknown to any other description of trading adventures. Early in the eighteenth century, however, a successful rivalry with Bristol in exporting provisions, coarse checks and silk hedderebels of Manchester made

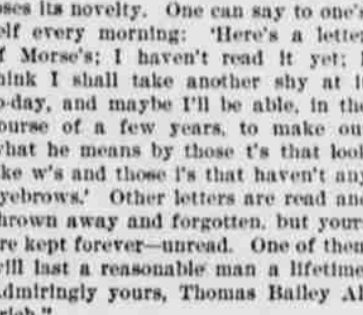

FILTHY SAN JUAN.

Porto Rico's Walled City Looks About as It Did 250 Years Ago

San Juan is a perfect specimen of a walled town, with portenillas, moat, gates and battlements. Built over 250 years ago, it is still in good condition and repair. The walls are picturesque and represent a stupendous work and cost in themselves. Inside the walls the city is laid out in regular squares, six parallel streets running in the direction of the length of the island and seven at right angles. The houses are closely and compactly built of brick, usually of two stories, stuccoed on the outside and painted in a variety of colors. The upper floors are occupied by the most respectable people, while the ground floors, almost without exception, are given up to negroes and the poorer classes, who crowd one upon another in the most appalling manner. In one small room with a flimsy partition a whole family will reside.

The ground floors of the whole town reek with filth, and conditions are most unsanitary. There is no running water

in the town. The entire population depends on rain water caught on the flat roofs of the buildings and conducted to the cistern, which occupies the greater part of the courtyard that is an essential part of Spanish houses the world over, but that in San Juan, on account of the crowded conditions, is small. There is no sewerage, except for surface water and sinks, and the risk of contaminating the water is great, and in dry seasons the supply is entirely exhausted. Epidemics are frequent, and the town is alive with vermin, mosquitoes, and dogs.

STREET SCENE IN SAN JUAN.

The streets are wider than in the older part of Havana and will admit two carriages abreast. The sidewalks are narrow, and in places will accommodate only one person. The pavements are of a composition manufactured in England from slag, easily broken and unfit for heavy traffic. The streets are swept once a day by hand, and are kept very clean. From its topographical situation the town should be healthy, but it is not. The soil under the city is clay mixed with lime, so hard as to be almost like rock. It is consequently impervious to water and furnishes a good natural drainage. The trade wind blows strong and fresh, and through the harbor runs a stream of sea water at a speed not less than three miles an hour. With these conditions no contagious diseases, if properly taken care of, could exist; without them the place would be a veritable plague spot.

FOR THE AMATEUR.

Very Convenient Triple Photo Graphic Plate Holder.

Here is a triple slide holder, which consists of a water-proof case for holding three double dark slides, with an extra space at the back for prints, memorandum book or small focusing

CONVENIENT PLATE HOLDER.

cloth. In the front is a white matte surface washable tablet, on which may be recorded particulars of the exposure, and in each partition is a tape which enables the slide to be easily pulled out. A pencil and pencil holder are included, and altogether this makes an excellent protection for dark slides, either in the camera case or in the holder alone.

Two Most Remarkable Rivers.

From the beginning the Nile was an exceptional river. Its sources were unknown. There were those who thought that the Nile flowed down from heaven; that it welled up from streams that disappeared under the earth on another continent, or, at the very least, that its springs were inaccessible to man.

There was no such mystery about the Euphrates. From the remotest times its sources seem to have been known by hearsay, if not by observation, to the dwellers on the coast.

The Nile was beneficent even in its floods. The people learned to let its waters flow over their lands at the time of the inundation, and where they raised dikes and sunk canals and basins it was to let in the water, not to keep it out.

The Euphrates also had its floods, but these were destructive. They scarred the soft earth with ravines and swept the fertile soil onward to build new lands along the edge of the Persian Gulf. The people anticipated the overflow with dread, and their most absorbing task was to restrain the river within bounds. They became more intimate with the earth than their Egyptian contemporaries. They learned how to mold the clay and to make their houses and the houses of their kings and their gods out of the material under their feet. The Egyptians learned something about brick manufacture, but they had no need to depend wholly upon that sort of building material. It was easy for them to obtain stone, as their huge piles attest.

Engineering Under the Earth.

The newest wonder in American engineering has just been inaugurated at Houghton, Mich., viz., the Red Jacket shaft of the Calumet and Hecla—the greatest mining shaft in the entire world. It is 4,900 feet deep, and, compared with it, the deep silver mines of the Comstock lode in Nevada, or the wonderful mines in Austria, worked for many centuries past, are but shallow pits. There are six compartments, each of an ordinary mining shaft, four of these being used for hoisting rock and lowering timber; one is used for the ladders, and the sixth and last compartment carries the wires and pipes for telephones, light, power, water and compressed air. The underground workings of the shaft are laid out with mathematical accuracy, the undeviating course of the copper-bearing lode allowing work to be planned thousands of feet ahead of the mineral picks. The great pumps which free the mine of water are operated interchangeably by compressed air and electricity. The power drills which eat the holes for the dynamite cartridges are run by compressed air alone, and there are more than 300 of these drills, each doing the work of a dozen men, working both night and day, in the Calumet and Hecla mine.

REDUCTION IN BICYCLE PRICES.

It is said that western capitalists are contemplating the organization of a great bicycle company, which hopes to make first-class wheels and sell them as low as \$10. Whether this be true or not, the fact remains that Hoyer's Stomach Bitters is a first-class remedy for the stomach, liver and blood, and the price puts it within everybody's reach to be well and strong. For fever and ague it is a specific.

TRY ALLEN'S FOOT-EASE.

A powder to be shaken into the shoes. At this season your feet feel swollen, nervous, and hot, and get tired easily. If you have smarting feet or tight shoes, try Allen's Foot-Ease. It cools the feet and makes walking easy. Cures swollen and sweating feet, blisters and callous spots. Relieves corns and bunions of all kinds, gives rest and comfort. Ten thousand testimonials of cures. Try it today. Sold by all druggists and shoe stores for 25c. Sent by mail for \$5; in stamps. Trial package FREE. Address: Allen S. Olmsted, Le Roy, N. Y.

WAGONS IMPROVED.

The new improved Stoughton wagons stand the racket. Two car loads have just arrived. It pays to have the best. Write for free catalogue. JOHN POBLE, sole agent, foot of Morrison street, Portland, Or.

HOIT'S SCHOOL FOR BOYS.

In 1794 the habitual users of the English language did not number more than 30,000,000; in 1897 their number was estimated at 100,000,000.

KEEPING THE DYE.

A little cream rubbed into black kid gloves will prevent the dye from coming off. It also gives them a nice gloss

A Total Disability Claim of \$1,650 Paid to a Man Who Was Afterward Cured.

The Montreal, a newspaper published at Meaford, Ont., Canada, first discovered this case two years ago, and published it at length, which now seems, owing to the cure of the patient, to be a remarkable fact. The facts were so remarkable that many people doubted the truth of them. They said: "It is too remarkable; it cannot possibly be true; the paper is mistaken, and the man, although he may think himself cured, will soon relapse into his former condition," etc., etc. The accuracy of the report called into question the Montreal, and it was found out, definitely whether the facts were as stated and whether the man would really stay cured. They accordingly kept a close watch on the case for two years after the first article appeared, and have just

published another article about it in which the original report is re-verified, and the cure is pronounced, and a check for a full sum of the claim for the Canadian Mutual Life Association for \$1,650.00 amount of total disability claim paid by them to Mr. Peck.

The first article stated that the patient (see address below) had been a paralytic for five years, that there was such a total lack of feeling in his limbs and body that a pin run full length could not be felt; that he could not walk or help himself at all; for two years he was not dressed; furthermore that he was blinded, was for that reason almost unrecognizable, and could not get his clothes on. The paralysis was so complete as to affect the face and pro-

STREET SCENE IN SAN JUAN.

duced him from opening his mouth sufficiently to take solid food. The doctors called the disease spinal sclerosis, and all said he could not live.

For three years he lingered in this condition. Then by some friends he was advised to take Dr. Williams' Pink Pills for Pale People. He took them and there was a slight change. The first thing noted was a tendency to sweat freely. This showed there was some life left in his helpless body. Next came a little feeling in his limbs. This was followed, followed by pricking sensations, until at last blood began to course freely, naturally and vigorously through his body, and the helpless gave way to returning strength, the ability to walk returned, and he was restored to his old time health.

The above is the substance of the first article published by the Montreal. Now follow some clippings taken from the same paper two years afterward, and there is not the slightest shadow of a doubt, in view of this testimony, that Mr. Peck's cure is permanent. Here follows the account:

On being again questioned, Mr. Peck said: "You see those hands—the skin is now natural and elastic. Once they were hard and without sensation. You could pierce them with a pin and I would not feel it, and what is true of my hands is true of the rest of my body. Perhaps you have observed that I have now even ceased to use a cane, and can get about my business perfectly well. You may say there is also no doubt as to my cure being permanent."
