

Jacob's Oil cures Rheumatism. Jacob's Oil cures Neuralgia. Jacob's Oil cures Lumbago. Jacob's Oil cures Sciatica. Jacob's Oil cures Sprains. Jacob's Oil cures Bruises. Jacob's Oil cures Sores. Jacob's Oil cures Stiffness. Jacob's Oil cures Backache. Jacob's Oil cures Muscular aches.

Did't Get Her Share.

Mrs. Newcomb (as she puts down her family paper, fondly to her husband)—Oh, Herbert, if I could only get such a lovely obituary notice in paper about you as I've just read about a man down in Pittsboro. Some blessings seem to me to be awfully unevenly divided nowadays.—Judge.

ARE IN THE RIGHT

Protocol Allows Discussion of Philippine Question.

REPLY OF OUR COMMISSIONERS

Justification of the Occupation of Manila by the United States Troops.

Paris, Nov. 11.—Today's session of the peace commissioners began at 2:15 P. M. and ended at 3 P. M.

When the meeting opened the Americans presented to their Spanish colleagues the answer of the United States to the claims submitted Saturday last on behalf of Spain. The document in which the American answer was set forth consisted of nearly 50 sheets of typewritten matter. It was a refutation of the Spanish allegation that because the words "possession," "ownership" or "cession" do not occur in the protocol clause touching upon the Philippines the peace commissioners have no right to discuss them here, and that even if they do so it must be in the light of the alleged fact of an exterior agreement that Spain's sovereignty should be impaired. The Americans also answered Spain's claim for the restitution of her public moneys and customs collections taken by the United States officials since the capitulation of Manila, and made reply to Spain's claim for an indemnity on account of the alleged imprisonment by the United States authorities of Spanish troops of Manila, and for their subsequent restraint from being of service to Spain in the suppression of the insurrection and the preservation of property.

The American commissioners, in their reply, held that there was jurisdiction under the terms of the protocol, for the discussion of the future of the Philippine islands, and they also claimed that the occupation of Manila is a military occupation which justifies the United States in collecting the revenues, administering the government and exercising all the functions of possession.

The joint session was short, because Senior Montero Rios and Judge Day concurred in the service of the American rejoinder upon the Spanish commissioners without formal reading of the paper, which would occupy many columns in an ordinary newspaper, and an adjournment was taken until Saturday.

It is quite safe to say that the Americans have made no proposition regarding the question of the Philippines, but confined themselves to a discussion of the proposals and assertions made by Spain at the previous meeting. Just what were the terms of the American rejoinder cannot, of course, be ascertained. But despite persistent assertions here to the contrary, there is no ground, as has already been cabled, for the Spanish contention that the United States acquiesced, at the signing of the protocol, in some reservation by Spain of her Philippine sovereignty. This utterly unfounded rumor is now quite well understood to have come from a high source not in sympathy with the United States.

Scrofula

In the Blood

Scrofula lurks in the blood of almost every man, and unless its poisonous taints are thoroughly expelled from the system, it is able to break out at any time in sores, eruptions, hip disease or other painful forms. Hood's Sarsaparilla cures scrofula promptly and permanently.

Hood's Sarsaparilla

American's Greatest Medicine. 21c; six for \$1.25. Hood's Pills cure indigestion. 25 cents.

Schilling's Best

A monster sewing machine, weighing one and one-quarter tons, is in use in East London. It sews cotton bolts.

No household is complete without a box of the famous Jesse Moore Whiskey. It is a pure and wholesome stimulant recommended by all physicians. Don't neglect this necessity.

The bitterness of a grain of strychnine can be tasted in 1600,000 grains of water.

To Cure a Cold in One Day—Take the Laxative Bromo Quinine Tablets. It drags off the mucus if it fails to cure. 25c.

A cubic foot of new fallen snow weighs five and a half pounds, and has times the bulk of an equal weight of water.

If you want the best wind mill, pumps, blaws, planes, wagons, bells of all sizes, millinery, engines, or general machinery, see JOHN POOLE, foot of Morrison street, Portland, Oregon.

In India the average duration of life of the natives is 24 years as against 44 in Britain.

Piso's Cure for Consumption is the best of all cough cures.—George W. Loitz, Bucher, La., August 26, 1885.

One Method of Treatment—Jones—Our minister is apt to take original view of any subject. He preaches next Sunday on the parasite of the prodigal son.

Smith—I don't see how he is going to say anything new about that.

Jones—You can't tell. He may make his sermon an expression of sympathy for the fatted calf.—New York Journal.

The Kaiser's Tour.—The Kaiser's Pilgrimage to the Holy Land has a prominent place in the issue of Collier's Weekly for November 5. There are interesting pictures of the Kaiser representing the women gathering to repair the roads before the emperor's arrival.

The drill of the Roman soldier was exceedingly severe. It comprised not only the use of weapons, but running, jumping, climbing, wrestling, swimming, both naked and in full armor.

An iron-mill company in Ohio has succeeded in making a fine quality of cement from furnace slag.

TESLA'S NEW INVENTION.

PACIFIC COAST TRADE.

Will Control Moving Vessels Without Wire Connections.

New York, Nov. 10.—Nikola Tesla, the electrician, in a newspaper interview, describes an application of electricity whereby, without the intervention of any artificial medium of communication, one man can control and direct, with absolute exactitude, the movements of any type of vessel, balloon or land vehicle, at any distance that may be desired. From a station on shore, or from the deck of a vessel under way, a torpedo-boat equipped with Mr. Tesla's controlling device may be propelled either on or below the surface, maneuvered at will in any direction, and finally brought into contact and exploded against the side of a hostile vessel at any point within range of vision of the operator. More than this, assuming that it were possible to accurately locate the position of the vessel which it is desired to destroy, the torpedo-boat could be directed to it, even if the ship lay in the harbor of Southampton and the operator was stationed at Sandy Hook.

Mr. Tesla said that some months had elapsed since he had fully developed his device, for which he has applied for a patent. When it was learned that Admiral Cervera was bottled up at Santiago, it was his intention to apply his mechanism to several launches and similar craft loaded with high explosives and annihilate the fleet at anchor. Admiral Cervera, however, came out and met his fate under the guns of the American fleet before the necessary arrangements could be made. Then Mr. Tesla planned a raid on the Spanish vessels in Havana harbor, only to be thwarted by the proclamation of the suspension of hostilities.

LOOK FOR EARLY CONCLUSION.

The Administration Encouraged by the Advice From Paris.

Washington, Nov. 10.—The advice that has come to hand so far from the commission at Paris are said to be rather encouraging than the reverse, and there is a disposition here to agree to the statement rather curiously made by the Spanish cabinet yesterday that there will be three or four more meetings of the joint commission. This is taken to indicate that the Spaniards themselves are not looking for a break in the negotiations, but they rather expect a peaceful conclusion in a short time.

The foreign bondholders have at last moved formally to protect their interests in Cuba and Porto Rico. The initial steps have been taken through the agency of the French embassy, which, in these cases no longer as the representative of the Spanish government, but for French subjects. Through the embassy a formidable statement has been presented to the state department, being an account of the various Spanish bonds owned by French citizens, chargeable against the territories either seized or set free by the act of the United States government. The sum of these bonds runs far into the millions. Just what it is expected shall be done with them is not clear. The United States government, of course, will not pay them, but it may help the French government to cause the independent government of Cuba to assume liability for the redemption of the bonds charged against that island when that government shall have been duly installed by the act of the United States.

LABOR AND INDUSTRY.

Camden, Me., manufactures more ships' anchors than any other place in America.

Ninety-five per cent of the railway tracks in the country are laid with steel rails.

More steel is used in the manufacture of pens than in all the swords and gun factories in the world.

Alabama produced 947,881 tons of pig iron last year, while the output of Tennessee aggregated 272,780 tons.

With the exception of the phenomenal record-breaking fiscal year of 1892-3, the fiscal year of 1897-8 is the biggest on record for the cigar industry. An increase of one of over half a million, or to be exact, \$11,132,730, in the cigar production, after five years of stagnation and actual retrogression, is an event to be marked.

All of the air-brake appliances we see upon the trains through the country are manufactured in Pittsburgh. One plant has an annual capacity for turning out air brakes for 250,000 freight cars, 6,000 passenger cars and 10,000 locomotives.

An individual who delights in statistics has figured out that the transportation of this year's wheat crop will require the loading and unloading of 640,000 freight cars, provided large cars are used. The modern wheat car has a capacity of 60,000 pounds, or 1,000 bushels.

A correspondent of the London Times, in a recent letter from St. Petersburg, says that during the last 16 years the production of pig iron in Russia has nearly quadrupled in extent, the output of manufactured iron has increased quite 80 per cent and the manufacture of steel has considerably more than doubled.

Since the introduction in 1894 of the serum treatment of diphtheria, the mortality from that disease has declined in Vienna from 11.2 per cent to only 3.65 of all cases.

NICARAGUA CANAL.

A Great Thing for the Pacific Coast.

Would Be a Favorable Aid in Western Development.

The Nicaragua canal is a subject very much discussed just at this time on the Pacific coast.

From statistics carefully cleaned by the most authentic authorities, it is shown that from the different nations of the world and the islands of the sea there would pass through the canal a possible annual traffic of 14,000,000 tons, a probable traffic of 10,000,000 tons, or a certain traffic of 8,000,000 tons, on which, if a toll of \$2.50 a ton was imposed, an annual revenue of \$20,000,000 would be obtained, or over \$100,000,000 over and above operating expenses. A saving of \$2.50 per ton on what would amount to 25, 7 cents per bushel, and on lumber to \$5 per 1,000 feet. A careful examination made by the Maritime Canal Company show that a possible one-half of the 8,000,000 tons traffic, which is claimed will pass through the canal, is American commerce, either coastwise or exports and imports. It seems to be fully determined that if the canal is built at all it must be built and operated as the property of the United States government—built with the people's money. It should be open and free and without tonnage charge to all American commerce, coastwise, exports and imports; and to compensate ourselves for our outlay we should lay a toll of at least 2¢ per ton on all traffic passing through between foreign nations.

It is estimated that it will require not to exceed \$100,000,000 to construct the canal, although it is claimed, in a recent statement made by Lyman E. Cooley, a celebrated engineer of this country, that, by reason of certain discoveries on the part of the commission, sent by President McKinley to investigate the feasibility of the project, the cost of the canal will be reduced much below the figure of \$100,000,000, on account of favorable dredging in the lower end of Lake Nicaragua, non-existence of rock in the San Juan river to Toro Rapids, good foundation for immense dam at Ochoa, favorable conditions for embankments at San Francisco basin, and a new site for a dam at Tambo Granada.

The farmers of California, Washington, Oregon and Idaho, now further from the world's markets than any other agriculturists, would not only be placed as near Liverpool as their competitors in India, Chile and the Argentine, but they would also have an advantage over their competitors of 2¢ per ton, or 6 cents a bushel; for the wheat from India must bear \$2 per ton toll at the Suez canal, and we would have the Pacific South American states pay \$2 per ton on the Nicaragua canal.

Then, too, our Atlantic and Gulf ports would have this 2¢ per ton advantage over all their British and European rivals in the great markets of Japan, Korea, Australia and the Pacific islands, as their rivals would be compelled to pay the 2¢ per ton toll, whether they went to market via the Suez canal or the Nicaragua canal.

Still Short of Water.

The drought in California this year has not yet been relieved by fall rains, and on November 1 the South Yuba Water Company served notice on all the mines which are operated by its power that no more water could be furnished until after the rainy season had fully set in, as the company could not count on more than enough to fill their contract to furnish Nevada City and Grass Valley with water for municipal purposes. This will hang up nearly a thousand stamps in the district.

End of the Salmon Season.

The salmon packing season is at an end, there being no more vessels due to arrive from the north, and according to the best authorities, says the San Francisco Call, all the canneries on the coast are 1,000,000 cases, or about 33 per cent short of the 1897 pack. The Alaska Packers' Association is some 43,000 cases short, or less than 10 per cent of last year's pack. About 19,000 barrels of salt salmon were shipped from Alaska during the season of 1898.

Shipment of Lead to China.

The Puget Sound Reduction Company, of Everett, Wash., made a shipment of 60 tons of lead last week to the American Trading Company in Shanghai, China. Arrangements have been made for weekly shipments to China and Japan by way of the Canadian Pacific steamship line.

New Brickyard.

A new brickyard will soon be started at Port Orchard, Wash. The machinery has been ready for some time and last week a consignment of small tools was received at the point.

Northwest Jettings.

Baker City is to have an extensive candy manufactory.

It is estimated that \$30,000 net was received by Ashland peachgrowers this season.

Over 120,000 sacks of grain have been received for shipment at Alamo, Wash., this season.

A large portion of the Klamath Indians are buying flour and other supplies in Goose Lake this fall. Many Indian wagons are going and returning from Pine Creek mills each day.

The largest piece of coal that was ever brought to Spokane is now on exhibition there. It weighs 1,400 pounds, and it took seven men to unload it from the car and place it in its present position. It was taken out of the mine owned by the railroad company, at Roslyn.

The Columbia River Logging Company, of Golden, B. C., is preparing to do a big business this winter and the East Kootenay Miner says they want 160 lush men to work in the woods.

Wages in Washington lumber camps have advanced 25 per cent, and logs are worth \$1.25 and \$1.50 more per thousand than they were a year ago.

The Cathlamet Logging Company has closed down operations for the season, having put in over 2,000,000 feet and have timber enough to last two seasons more.

A new saw mill is being added to Lamont's shingle mill plant at Weller, Whatcom county, Wash., which, when finished, will be capable of turning out 20,000 feet of lumber daily, in addition to the daily output of 50,000 shingles.

CONJUGALITY.

A Missouri man filed an answer to his wife's suit for divorce an agreement signed by both "to disband."

Mr. Woodruff, the New York man who has accumulated 50 wives, simply makes Chicago's Bates-Gates, of seven-wives notoriety, look small.

"I have always had a desire to go on the stage," says the St. Louis young woman who was married last Saturday, and is now seeking a divorce. She not only wants to go on the stage, but she wants to begin as a star.

PERIODS OF PAIN.

Menstruation, the balance wheel of woman's life, is also the bane of existence to many because it means a time of great suffering.

While no woman is entirely free from periodical pain, it does not seem to have been nature's plan that women otherwise healthy should suffer so severely.

Lydia E. Pinkham's Vegetable Compound is the most thorough female regulator known to medical science. It relieves the condition that produces so much discomfort and robs menstruation of its terrors. Here's proof:

DEAR MRS. PINKHAM—How can I thank you enough for what you have done for me? When I wrote to you I was suffering untold pain at time of menstruation; was nervous, had headache all the time, no appetite, that tired feeling, and did not care for anything. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound, one of Blood Purifier, two boxes of Liver Pills, and to-day I am a well person. I would like to have those who suffer know that I am one of the many who have been cured of female complaints by your wonderful medicine and advice.

—Miss JENNIE R. MILLS, Leon, Wis.

If you are suffering in this way, write to Miss Miles did to Mrs. Pinkham at Lynn, Mass., for the advice which she offers free of charge to all women.

A canal connecting the Mediterranean with the Red sea existed as early as 600 years before the Christian era. Its length is 92 miles.

Seems to Get Ripe.

One complaint seems to get ripe in autumn, and that is neuralgia. To soothe the pain, strengthen the nerves and rid the system of it, use St. Jacob's Oil, the best known cure.

From China \$450,000 worth of human hair is exported annually. It comes mostly from the heads of male-factors, paupers and dead people.

THE "AMERICAN BOY" BATTLESHIP.

Every American hopes our school boys will succeed in their efforts to raise \$5,000,000 to be used in building a battleship. It costs great sums to build a warship, but you can build up your health with Hostetter's Stomach Bitters at small expense. This remedy is for all stomach, liver and bowel disorders.

Kochdale's Many Churches.

The town in England best provided with places of worship is the ancient one of Kochdale, where there are 145 churches and chapels. Fifty belong to the Church of England and 95 to the Nonconformists.

Follow It Up.

Sit down and cool off suddenly, and then regret it, for stiffness and soreness is bound to follow. Follow it up with St. Jacob's Oil and you will have nothing to regret from a prompt cure.

The New Frank Leslie's Popular Monthly.

Frank Leslie's Popular Monthly for November is the initial number in the new and improved form of this long-time favorite illustrated family magazine, with a handsome cover in colors and gold. Its price is reduced to ten cents, one dollar per annum. This is unquestionably a wise and popular move on the part of the publishers; and the return of Mrs. Frank Leslie to the editorship of the magazine assures for it a future as brilliant as its past has been prosperous.

Bicycles are taxed in Shoreham, Mass., the average assessment this year being \$50.

\$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: J. C. HENNEY & CO., Toledo, O. Sold by druggists. Hall's Family Pills are the best.

Stockings were first used in the 11th century. Before that cloth bandages were used on the feet.

When coming to San Francisco go to Brooklyn Hotel, 208-212 Bush street, American or European plan. Room and board \$1.00 to \$1.50 per day; rooms 50 cents to \$1.00 per day; single meals 25 cents. Free coach. Chas. Montgomery.

Some scientists assert that the purest air in cities is found about 25 feet above the street surface.

FIT'S Permanent Cure.

No other nervousness after first use of Dr. King's Great Nerve Restorer. Sold for \$3.00 trial bottle and treatise. DR. B. H. KING, Ltd., 50 Arch Street, Philadelphia, Pa.

The Aolian harp was the invention, it is believed, of Athanasius Kircher, who lived in the seventeenth century, and it is so called from Aeolus, the god or ruler of the winds.

How to Get Strong

A system which has become run down by the trying weather of the past summer is not in a condition to meet the severe winter of this climate and will easily fall a prey to disease unless a proper tonic is used.

Dr. Williams' Pink Pills for Pale People are the best medicine in the world for building up an enervated system.

Do not confuse these pills with ordinary purgative pills. They do NOT act on the bowels, thereby further weakening the body. They build up the blood and strengthen the nerves.

Major A. C. Bishop, of 715 Third Ave., Detroit, Mich., is a well-known civil engineer. He says: "When I had my last spell of sickness and came out of the hospital, I was a sorry sight, and could not walk over a block for several weeks. In the newspapers regarding Dr. Williams' Pink Pills for Pale People, which convinced me that they were worth trying, and I bought two boxes. I did not take them for my complaint but for strength. After using them I felt better, and know they did me worlds of good. I am pleased to recommend them to invalids who need a tonic or to build up a shattered constitution."—Detroit Free Press.

At all druggists or direct from the Dr. Williams' Medicine Company, Schenectady, N.Y. Price fifty cents per box.

STEEL SPIRAL CONVEYERS

We carry in stock a large supply of the above conveyers, both right and left, which we will sell at greatly reduced prices. Also all sizes of elevator buckets and bolts. Write for price-list and discounts.

PISO'S CURE FOR CROUPS, BRONCHITIS, WHOOPING COUGH, AND ALL AFFECTIONS OF THE THROAT AND LUNGS.

Consumption

SEVERAL MURDERS AND SHOOTING AFFAIRS REPORTED FROM TEXAS.

Dallas, Tex., Nov. 11.—Tuesday was a bloody election day in Texas. At Hubbard, Stephens county, Roscoe McCarty, Joseph Damsley and Jefferson Squires were killed, and J. F. McCarty and Riley Squires probably mortally wounded in an election quarrel. At Steuber, in Honkins county, R. E. Sutton and George Young were killed. At Aubrey, Denton county, Deputy Sheriff B. Taylor was shot through the neck and dangerously wounded. At Sheffield, in Trinity county, J. W. Ashfield was killed and his father probably fatally wounded. Many minor affairs occurred in various parts of the state as the result of election differences.

TRouble AT POLLING PLACES

Attempted Hold-Up in Butte Resulted in Murder.

Butte, Mont., Nov. 11.—Shortly before 5 o'clock Wednesday morning, while two judges were counting the votes in the Dublin Gulch precinct of Butte, two men with handkerchiefs over their faces appeared at the door of the polling place. They had revolvers in their hands. The order to throw up hands was given. There were five judges, two clerks, two checkers, a deputy sheriff and several spectators. Several threw up their hands. Dennis O'Leary, the deputy sheriff, jumped at one of the men. Both began firing. John Daly, one of the checkers, was shot in the stomach, and O'Leary's shoulder was shattered. The masked men escaped at once, and all efforts to trace them have been unavailing. Both wounded men were taken to the hospital. Daly died on the way there. The precinct where the shooting occurred is a strong Democratic precinct, and some think it was an attempt to steal the ballot-box. The general opinion, however, is that it was an attempt at robbery, as some of the men in the polling place were known to have considerable money.

BUFFALO BREAKS DOWN.

The Cruiser Unable to Proceed on Her Way to Manila.

Washington, Nov. 11.—The cruiser Buffalo, which sailed last Saturday from Sandy Hook, bound for Manila to join Admiral Dewey's squadron, put in at Newport, R. I., today, with her machinery broken down. Captain Hemphill, commanding the ship, reported to the department by telegraph that he had been unable to proceed further on his course, and had been obliged to seek a shore station to repair. The responsibility for the breakdown to fix the machinery was assigned to the Secretary Long responded immediately by appointing Commander John McGowan, superintendent of the main station; Commander C. H. Stockton, president of the war college, and Chief Engineer R. S. Griffin, with the Mayflower, a court of inquiry, with Lieutenant W. I. Chambers as judge-advocate. The court will meet at Newport.

Providence, R. I., Nov. 10.—Both Republican candidates for congress were returned.
