THE ANGURA GOAT.

Lane County Provided With Natural Range and Climate for the Animal-A Welth Producer.

During the past two years, we have, on different occasions, briefly called the attention of our enterprising subscribers in Lane county, especially those who have interests in stock-raising, to the importance of the Angora coat as a factor in the future presperity and development of the county, as well as the large personal benefit that may be secured in the adv in ement of this profitable business. There is no doubt as to the possibilities of this industry, or as to the personal success and financial affluence to be secured by those who will intelligently and actively engage in the work. It is not a mere hap hazard occupation, but one that was a forcible illustration of the will certainly pay a large percent survival of the fitest. The remainder of 2,500,000 acres constitute a vast extent of hilly country, which will furnish an incalculable amount of feed for the next one hundred years. It is the natural home of the goat in every particular; well-watered, a salubrious climate and an exhaustless supply of natural food. The total number of Angora goats now in this county will certainly not exceed 5,000, while it is estimated, by specialists in this business, that A Number of Them in the Volunteer Lane county alone could easily and

How frequently a woman asks this question! How much thought and study she devotes to it! It is natural. A woman hates to think that sh, is growing day by day less charming and attractive and youthful to her husband's eyes than in the days of contaship.

A woman may always retain her charms and the vivacity and freshness of youth if she will take the proper care of her health. A tremendous percentage of it! health in women is due to weakness and disease of the distinctly feminine organism. Dr. Pierce's Favorite Prescription is an unfailing remedy for all disorders of this nature. It allays inflammation, heals ulceration, stops debilitating drains and soothes and tones the nerves. From this may be seen something of the extent and result of introducing the Angora goat on a large scale. It is entirely practicable for farmers and stockmen to add immensely to the material in this industry. We have mentioned that there is no chance speculation in this business for it has been experimentally and suck cessfully tested in the mountainous parts of Benton and other counties. and, in proof of this, we will she rily resent our readers with an inter esting account of the Angora goat as a wealth producer as taken from the Corvallis Times of the 12th inst. We devote this large space in the GUARD to this matter because of its direct importance to our readers and not for any personal interest in the subject, as we are unfortunate in not being the possessor of a welibred flock of goats.

In response to many inquiries we shall make additional mention of this profitable business in the
