ENGINEERING CORPS.

Daily Guard, Sept 21

A GUARD representative this forenoon made the acquaintance of John Bays, of Portland, who has received the contract for grading and doing the rock work on the Mohawk branch railroad, between Eugene and the new town of Wendling, the location of the large Booth-Kelly Lumber Co's mill. He is an agreeable gentleman. Mr Bays said that he is expected to be throwing dirt on the line by next Monday morning. He will hire six men and teams here in Lane county if he can procure them. If not; he will bring his regular plant here, which has 100 head of horses, the same at present being near Snake river where he has just completed a contract on the O R & N Co's line. Some 80 scrapers will be unloaded from the cars at Henderson station tonight to be used in the work. He will first grade the road between where the branch leaves the Natron line, above Springfield, and the crossing of the McKenzie river, so the road can be used in delivering bridge materials. After this he intends to grade the low portions first in the Mohawk valley, completing the high ridges at his pleasure. He expects to complete the contract in 60 days if the weather holds good. He is accompanied by his son-in-law, Mr Phillips, who will be time-keeper and will also have charge of the commissary department. Tents, of all descriptions; to be used in the work, will be here Tuesday.

Engineer H H Hollidge returned from San Francisco this morning and he will immediately start out engineering parties setting grading stakes.

When his discharge came, in San Francisco, the boys in his command wanted him to return with them, but he preferred the Pacific Coast, the land of his nativity. To show their esteem they presented him with a valuable gold watch, handsomely engraved. Creed was all through the Philippine campaign taking part in seventeen engagements.

DREYFUS FREE

The French Government Pardoned an Act of Tardy Justice

HIS DEPARTURE UNOTICED.

RENNES, France, Sept 20—Capt Alfred Dreyfus at 3 o'clock this morning left the prison in which he had been confined since his return from Devil's island, and proceeded to Nantes, where he took a train bound for Nantes. His departure was completely unnoticed.

M Virgule, chief of the street service, and M Dureau arrived at the prison after midnight, bringing the order of the minister of war for the release of Dreyfus.

THE NIGHT RELEASE.

Dreyfus walked from the prison to the boulevard L'Enfer, where he entered a waiting carriage and was driven to the Verne station outside of the town. Mathieu Dreyfus met him at the train, and accompanied him to Nantes.

While this dramatic turn in the Dreyfus drama was taking place all Rennes slept, and the departure of the famous prisoner of Devil's island was no more noticed than that of an ordinary traveler.

NO EQUINOCTIAL STORM.

Mr Pague is Not a Believer in Such Things—Continued Good Weather.

Many persons begin to look for the equinoctial storm about this season of the year. Mr Pague says there will be no equinoctial storm this year, nor any other year. In fact, he declares that there is such a thing. He produces records to back himself up in this declaration too.

He says that September is the month in which the season changes from summer to fall, and that weather disturbances are likely to occur some time in the month. A good, hard storm may take place on some day of the month, and people are accustomed to speak of this storm as the equinoctial storm.

The same thing is true, he says, concerning the change of the season in the spring. He emphatically denies that either March 21 or September 21 are any more storm days than any other days of those two months.

"The records here for 23 consecutive years show that March has a daily rainfall of 0.159 of an inch," said he. The same records show that on March 21, for the same number of years, the daily average for that day is 0.123 of an inch; that for the five days previous to March 21, the daily average is 0.089 of an inch, and for the five days after, the daily average is 0.187 of an inch, so it is seen that for the 11 days, March 21, the five days before that and the five days after, the daily average rainfall is 0.141 of an inch, which is 0.048 of an inch below the daily average for the month. If unusual weather conditions prevailed about the equinox does it not appear reasonable to assume that such would be shown by 23 years' record, and that more rain would be shown within the 11 days than during the other 20 days of the month?

The record shows less rain than the average during this period, hence the conclusion that there is no credence to be placed in this old legend."

They do not think, up in the office where they keep track of the weather, that any storm will occur this week. The indications up there point to more sunshine in a day or two.

But there's no need to feel like that. Listen to J W Gardner, Idaville, Ind. He says: "Electric Bitters are just the thing for a man when he is all run down, and don't care whether he lives or dies. HOP HARVEST

Nearly All the Yards well Under Way.

PRICES.

Quite a number of yards have completed picking, but some will not detach until next week.

Dealers generally look for a fair opening of the market, and confidently expect a good price, though in some instances it is thought the market will not be as good as could be desired for the reason that England, Belgium and Germany will have a greatly increased yield, while Russia, formerly a heavy importer, now produces sufficient hops for home consumption, and has a few to spare for the balance of the world. This with a good yield in all hop sections in the United States, with the possible exception of New York state, may prevent the price of hops from reaching great heights, but a fair compensation for expenses incurred and a reasonable profit, is assured to the growers who gave their crops the necessary attention and care.

Salem Statesman: "The market has not opened as yet, and is what might be termed extremely dull, for there are no sales to record, and local dealers all agree that no orders have been received from the East. Eastern hop dealers are anxiously awaiting reports of the output of the Pacific coast yards, before placing orders, and they also wish to see a full line of samples before purchasing, as it is believed that the samples of the first pickings and those of the last will show a considerable difference."

Oregonian: "The hop harvest is drawing to a close, and there is considerable disappointment over the partial wrecking of the bright prospects of a few weeks ago. It is still too early to ascertain the exact amount of damage that has been wrought, but it has been considerable. The price situation remains about the same as last week. Brewers are very indifferent about taking hold of any new-crop business, even at figures much under the price at which some of the contracts were made last summer, and exporters have not yet begun to talk prices."

IMMIGRATION INVITED

Hawaii Will Endeavor to Secure Settlers From Northern Italy and Sweden.

New York, Sept 19—A special to the Herald from Washington says: Immigration from the north of Italy and from Sweden is to be invited into Hawaii. He said that he was on his way to Europe to secure immigrants from among the better classes of Northern Italy and Sweden to Hawaii.

\$10,000 BILL.

One Is Missing and the Government Wants It.

Who has the \$10,000 bill?

The government is anxious to call in a greenback of this denomination, the only one at large. It was issued during the civil war among others of its fellows to pay war expenses. After the war they were gradually retired until until the government got them down to 348 million dollars and in 1880 congress passed an act declaring that they should not go below that amount. Of them there are now outstanding 50,000 bills of the denomination of \$1000, three of \$5000, one of \$10,000, 25,000 of \$500, more than nine million of \$10, more than two and one-fourth million of \$1, and almost one and a half million of \$5. As soon as these greenbacks become worn out they are returned to the United States treasury and new greenbacks are issued in their place. There are outstanding 1200 gold certificates of \$10,000 each which are practically only certificates of deposit with the government except that they draw no interest.

The Winter Solstice.

Today the sun crossed the imaginary equinoctial line that encircles the earth, and day and night are of equal length. While the earth is moving nearer towards the sun, winter conditions approach. The northern hemisphere commences to lean or tilt from the sun so her rays are obliquely received. Hence colder weather.

Sumpter, the second largest town in Baker county, and already a rival of Baker City, has an "even dozen" of saloons, one church edifice, with no resident pastor, and is otherwise known to fame. The Sumpter Miner pointedly says, there is almost as rich and virgin field there for the laborers of those who seek to lay up treasures in heaven, as for those who are hankering to accumulate this world's goods.
