## "It is an Ill Wind

## That Blows Nobody Good."

That small ache or pain or weakness is the "ill wind" that directs your attention to the necessity of purifying your blood by taking Hood's Sarsaparilla. Then your whole body receives good, for the purified blood goes tingling to every organ. It is the remedy for all ages and both sexes.

## IMPROVED TOURIST SLEEPERS.

Bailroads Are Acceding to Demands of Middle Classes Who Want Better Sleeping-Car Service.

In response to the demand of the times the O. R. & N. and its connections are placing in operation a much better grade of tourist sleepers for Paific coast service than at any previous time. The largely increased traffic to this section of the country has demanded all the improvements of latterday transportation, and in consideration of tihe the railroads are establishing a service which is excellent in every particular. Not only are the wishes of the first-class passengers served, but those who are traveling to and from the East on second-class tickets are splendidly cared for. There are was a time when a tourist sleeper appealed to a limited number of people who were traveling on the "cheap" order, in every meaning of the term. Now, however, there has been a radical change. With the better tourist sleepers in operation the class of passengers has been improved, and one may now travel upon them and enjoy all the privileges of a first-class sleeper at a

greatly reduced rate. Daily, on the O. R. & N. Eastbound fast mail, is attached one of these latest improved tourist sleepers, a model of beauty and handsome appointments. The new cars are almost an exact counterpart of the first-class sleepers.

One noticeable feature of the new tourist cars is the absence of a smoking apartment. The new cars being built by the Pullman Company are not porvided with smoking apartments. This new departure has been taken because of the fact that most through trains are provided with composite cars, which provide a smoker for the sleeping-car passengers.

Kit Carson's rifle, which was carried by him for more than 40 years, is now in the possession of the Montezuma dge of Masons, at Santa Fe, of which lodge Kit was a member.

#### MINES OF ALASKA. TRANSPORTATION INADEQUATE.

Rates Are Moving Up and Have Bearing

Favorable Report From Head Waters of the Big Horn-Glowing Reports From the Porcupine.

Herman Olson has returned to Skagway from the headwaters of the Big Horn river, which empties into Taku Arm opposite the Golden Gate. He found a foot or 14 inches of snow at Ptarmigan pass on his return, and a week ago there was even more of it in the Big Horn mountains. While the snow was too deep for Olson to reach the highest point desired, he was fortunate enough to find another copper and gold ledge, which is from 25 to 50, feet in width, and carries ore which looks remarkably similar to the wonderful rock taken from the famous Engineer's group on Taku Arm. Olson staked four claims for his principals on this ledge.

#### Cook's Inlet Country.

John W. Cliff and Captain S. B. Johnson and wife, have just arrived at Skagway from Cook Inlet. "We left Sunrise City, Cook Inlet, September 15," said Mr. Cliff, "making the trip down in 14 days. The mining season for that part of the country had about closed when I left. This has been one of the most favorable seasons, so far as climate conditions are concerned, even seen in that country. But few, if any, new gold discoveries have been made on the Kenai peninsula this season. The old established mines have been resonably successful. Mills creek, Lynx creek, Granite creek and Upper Six-Mile river, may be mentioned among those that have produced well in the Sunrise mining district. They are all sluicing propositions. The prop-erties mentioned have yielded all the

way from \$8 to \$100 per day to the man for part of the season. The Turnagain Arm district has several paying streams, among which are Resurrec-tion, Bear, Palmer, California, Glacier, Indian and Crow creeks."

#### Fortune in Gold Dust.

There came to Skagway the other day 11 boxes of gold dust, each weighing nearly 400 pounds, and the whole valued at \$750,000. The gold dust was brought out by the Flyer Line Steamboat Company for the Canadian Bank of Commerce, and on its arrival there was taken to the Brannick hotel and deposited in the downstairs front room, in which a bed was laid for the guards, H. E. Rudd and G. H. Burns, who have lived with it ever since it left Dawson. Rudd and Burns were formerly mounted Policemen and went in with Major Walsh in 1897, when Rudd remained in this town for nearly a year. These men say this is certainly the largest shipment of dust that ever came out this way, and they believe it is the

### Dyes Is Reviving.

Dawson.

E. B. Whalen made a business trip to Dyea from Skagway and found the town easily carrying its new honors as a prospective railroad terminus. The old narrow gauge tram is being torn up, and standard gauge railroad bed is being constructed along the street and out to Canyon City. At Sheep Camp the new company has constructed a large commissary building and also a bunk house, and it is sail 11 men are now at work on the tunnel; but this is not likely, as the engineer has scarcely had time to make the exact location of

on Export Trade. Bradstreet's says: More nearly, perhaps, than ever before, does the volume of general trade and industry tax existing transportation facilities handling the same. From nearly all parts of the

country, but particularly from the West and South, come reports of car scarcity. Some of this congestion seems to be the result of a diversion of traffic ordinarily carried on by water routes to already crowded railroads. The inability of present transportation facilities to cope with the existing situation is, however, not confined to do mestic trade lines. From both coasts of this country come reports of insuf-

ficient tonnage offering to handle goods seeking a foreign outlet, and freight rates are considerably higher than they were a year or more ago. This latter feature, in fact, is one which may have

important effects upon our foreign trade during the balance of the year. With few notable exceptions prices continue strong. A number of lines have advanced quotations, while the great body of staple articles manifest

all their old firmness. Some weakness in wheat prices is directly traceable to higher freight rates because of the partial closing of the door to relief from growing domestic stocks.

Raw wool is firmer and even higher on better demand at the East, some heavy speculative transactions being reported.

The strength of lumber is apparently undiminished.

Business failures for the week num per- 221, as compared with 164 last week, 213 in this week a year ago, 225 in 1897, 202 in 1896, and 259 in 1895. Business failures in the Dominion of Canada for the week number 20, as compared with 19 last week, 24 in this week a year ago, 27 in 1897, 48 in 1896, and 36 in 1895.

Something New in Cookery.

Saved Through Chest.

In 1886 Mohammed Balba usurped the crown of Granada in spite of the superior claims of his elder brother Jussef. He was very unsuccessful in his conduct of the war against the Christians and was at length assassinated by poison absorbed through his skin from a shirt. He entertained a desperate dislike to the brother whom had injured, and when he knew that his own fate was sealed he sent an order to the governor of the prison in which Jessuf was confined that he should be executed immediately. When the order arrived Jessuf was playing chess with the chaplain of the prison. With great difficulty Jessuf obtained a respite from the governor permitting him to finish the game.

Before it was ended, however, news came that the usurper had died of the poison. This cancelled the order of excution, and Jussef, instead of going to the scaffold, mounted the throne.

#### When Navigation Closes.

Charles Sperry says the Yukon was closed by ice at an unusually early pe-riod last year. He says that in 1886 he was at the mouth of Stewart river dlings, \$22; shorts, \$18; chop, \$16 peron the Yukon, and the river did not ton. close that year until on Thanksgiving day, November 24, on which day three scows, bringing 13 men, arrived at Stewart river. On November 10, 1888,

Mr. Sperry and another man, took their store, 22 % @ 27 % c. dog team in a boat and started for Circle City, but on the 13th of the same month they were blocked by ice at the mouth of the Klondike river. From these experiences it appears that there have been years during which naviga-tion was open much later than last year, when it closed at Dawson, November 3.

#### Bennett Is Booming.

Bennett is experiencing a great boom, says the Skagway Alaskan. The whole lake shore is lined with men building scows and there are not enough restaurants to feed the people. All kinds of business is flourishing, and it is probable that things will remain in this state until the close of navigation.

#### Conditions at Dawson.

Private telegrams were received by E. S. Busby, Canadian customs inspector in Skagway, saying that Dawson was enjoying fine weather and excel-lent business. His advices also conveyed the information that there is a scarcity of socks, potatoes, hay and oats in the Klondike capital. A great deal of provender is passing through Skagway, but most of the hay and oats is for the Canadian Development Company. Within the last two weeks over 200 tons of hay have gone forward from
