Recognizing the fact that the United States is the greatest silver producing country in the world, and that both gold and silver were equally the money of the constitution from the beginning of the republic until the hostile legislation against silver, which unduly contracted the circulating medium of the country, and recognizing that the great interests of the people demand more money for use in the channels of trade and commerce, therefore we declare ourselves in favor of the free and unlimited coinage of silver and denounce any attempt to discriminate against

Aunt Fanny repeated the phrase in a musing tone, while a soft light came into her dark eyes and a smile hovered over her lips. The next evening Laura and Bertha, in

All his father's debts were paid, and his lawyer spoke of large sums invested in various ways. So the result was the bril-liant assemblage which Laura and Bertha were to honor and where that "little old maid," their aunt, was to appear in

society after ten years' seclusion. The hero of the evening had not appeared when the trio, under the escort of Mr. Leslie, Bertha's and Laura's father, entered, but soon a movement near the door announced his arrival; a tall, dis-tinguished looking man of 35 or 36, with inished manners and well modulated volce-a man to notice in any circle, but now, with the glitter of his wealth, a man, Silverdale thought, to fall down be-

tarifl charges, at the behest of the sugar trust, will not be returned to the people from whom it was exacted, but will be spent in "improvements" on the island. The sugar kings contributed vast sums towards McKinley presidential election expenses, and the people will not be allowed to buy cheaper sugar, even from the newly acquired islands that are now as much an integral portion of the country as Lane county, or the state of Oregon. Congressman Johnson, of Ohio, hit the nail on the head when he told the majority of the house some facts Saturday. He said:

The president is a good poli-tician. He has heard from the country. He is trying to square himself and you with the people who protested, in the name of justice, against the unconstitutional and iniquitous tariff bill you passed Wednesday. Miss Hobson, the Lame Impostor, Doing this Section.

Miss Hilds Hobson, who has been victimising people along the Southern Pacific, from Ban Francisco to Port-

land, is said to be in Coburg, and may arrive at Eugene at any time. Miss Hobson's methods are peculiar.

She strikes a town, looking for a brother or some relative who lives a short distance in the country. Of course he fails to arrive. She has just been robbed of \$175, or some other convenient sum, and secures a "loan." She scorns with pride any charity, but agrees to repay the loan on reaching

her destination. It never arrives. Miss Hobson is a cripple, and claims to have a silver thigh bone as the

result of an Eastern railroad accident, and states she now has pending a suit for damages against the company. She frequently deviates from this story and tells others. Miss Hobson is a rank fraud, and should not be assisted.

Marville Watts, of Athena, is out for the democratic nomination for heads of the soldiers in the front ranks. county school superintendent. He has spenty announced that he would like the naming and seems to have struck a popular chord among the democrats.

"In fact," said a close friend of Mr. Watts to the East Oregonian, "I have seen surprised at the number of republicans who have spoken of Mr. Watts' candidacy with warm favor and I am of the opinion that he would command very strong support, holding the entire iemocratic vote and drawing heavily from the republican."

Mr. Watts is a graduate from the University of Oregon at Eugene, and of the Eastern Oregon state normal chool at Weston, and has taken a law course besides. He has taught in this county and is a bright young man, fully fitted for the position. It looks much as though he would meet little opposition in the convention, and, in the event he comes out for the office paper has been enlarged to a five colas a nominee on the ticket, it also umn folio. Ridiculous Guns.

Although China is making rapid progress in the art of war, the introduction of railroads and other modern improve ments, the government continues to manufacture the ridiculous "two men breechloading jingals" that have been used by the soldiers of the Chinese empire ever since the invention of gunpowder.

The jingal is a curious weapon that looks more like a telescope than a gun. It is mounted upon a tripod six or eight feet high, so that it can be fired over the The barrel is about nine feet long, the bore about 11/2 inches in diameter, and the projectile can be either solid or a bunch of small shot tied up in a bag of thin rice paper. It has an effective range of from 200 to 300 yeards only, and foreign officers who saw it in use in the late war with Japan say that it is no more to feared than any other old fashioned blunderbuss. It takes two men to load and fire it, and when it is dismounted they carry it on their shoulders like a piece of scantfing.-Chicago Record.
