PATENT CAR COUPLING.—Mr. Harrison E. Smith of this county has invented a car coupling which it is thought is a valuable invention. The great advantage of Mr. Smith's patent is that by it the cars can be uncoupled any moment whether the train is under full speed or not. The action is automatic and requires but an instant of time to hitch or unhitch. Its use would prevent those frightful every day casualties of which we read.

Both of the honorable gentlemen admit, which we shall always think a correct conclusion, that they are two of the longest eared gentlemen in Hillsboro.
