WHAT THE WORLD WANTS

A NEW INVENTION, WHICH SPE-A cially supplies the wants of the Pacific States, has just been perfected and shaped into a regular WELL BORING AND PROSPECTING AUGER. It is constructed on purely scientific principles. and its perfect simplicity of formation well adapts it to all kinds of well boring and mining purposes. By its use the expense of obtaining water throughout the dry portions of the country, in aurface or artesian wells, will be greatly reduced, and for prospecting for minerais it will necessarily supersede all ther machines now in use.

This simple and practical machine can now be seen at work and thoroughly examined at Oakland Point Planing Mills. State and County Rights for sale.

The following testimonial from Professor Welwood Murray, of the University Enenburg, and of other

prominent colleges at the East, speaks for itself: No. 120 SUTTER STREET, ?

No. 120 SUTTER STREET, ?

SAN FRANCISCO, April 20, 1576. .)

MESSES, PRICE & MORGAN—Dear Stra: Having at your request examined and practically tested your machine. I take great pleasure in hearing testimony to its value for well-boring. Such a result could only be obtained from mature experience of the desiderate requisite, compled with mechanical skill, to devise such appliances so novel as the extension bit and cored auger, worked by a powerful screw, by which the entire system of well-boring is changed, facilitated and cheapened, and by the soil or debris being brought directly to the surface without uncounding, or any disturbance of the servering or boxing shaft. The operation is made so certain as to leave no question of the great benefits which will specully accrue to this State from its introduction.

gentlemen, yours truly, WELWOOD MUBRAY. All information obtained by applying TO PRICE & MORGAN.

log for you a rich pecuniary success, I remain,
