

The Democratic Times.

Official Paper for Jackson & Josephine Counties.

CHARLES NICKELL, EDITOR.

SATURDAY, NOVEMBER 8, 1873.

"IN A HORN."

The Sentinel, in attempting to reply to our assertion that it was either woefully ignorant or intentionally misrepresented the facts when it says that Nesmith carried Jackson county by a reduced majority, only proves more conclusively that our assertion is true.

It must indeed be highly edifying to Sheriff McKenzie to have his vote paraded as the standard Republican vote, when it is well known that his was the smallest vote any Republican, except Tenbrook, received; and it is equally well known that his small vote was owing to a number of Republican tickets being issued from the Sentinel office with the name of Zigler, instead of his own, for Sheriff.

An Audacious Thief.

It is stated, says the Portland News, that Hodge, the Paymaster who stole half a million dollars, and whom the President pardoned because he knew too much, is a silent partner in one of the infamous ring paving companies that exist at Washington, and that is robbing the country without limit or check.

For Washington.

Col. Nesmith, our newly elected Congressman, sailed from Portland on the 7th instant on his way to the National Capital. Mr. Nesmith, when in the U. S. Senate, accomplished more for the material interests of this, as well as other sections of our State, than all the Republican Senators and Representatives we have ever had put together.

THE "WORLD" SUMS UP.

The New York World draws some important conclusions from the results of the October elections. That the redemption of Ohio and Oregon; the great gains in Pennsylvania; the triumph of the Democratic party in Newark, by which the early redemption of New Jersey is secured, and the shattered condition of the Republican party in Iowa, will exercise a very decided influence on parties, is undeniable.

First. The Liberal Republicans, as an organized party, have taken no root in American politics, and have no element of growth on which they can build any hopes for the future. It is certain that they cannot be the nucleus of future opposition to the Administration of General Grant.

Second. The idea that the Democracy will disband and dissolve their organization, is an exploded idea. The opposition party, for the next four years, will be the Democratic party, and no other party. The hundreds of thousands of citizens who have been waiting and watching, holding back from joining the Democratic organization in the expectation that it would be supplanted by some other, will now see that they are reduced to a choice between the same two great parties which have been arrayed against each other for so many years.

Third. The success of the Democratic party is in proportion to the courage and steadiness with which it maintains its distinctive principles. Our most signal success has been in Ohio, where the party has stood most firmly on its own proper ground. Grant carried Ohio last Fall by 37,531 majority; and now we have certainly elected the Legislature, and the State officers too.

Fourth. The Democracy gain by a bold and active canvass, and have nothing to fear from the zeal and ability of their opponents. The Republicans, as well as the Democrats, have made a vigorous campaign in Ohio, bringing out Morton, Sherman, and their heaviest guns. But they have been unable to stand against the bold Democratic onset, led by Senator Thurman. As splendid results may be achieved elsewhere if the party elsewhere will be equally bold, vigorous, and aggressive.

How is This?

The Sentinel says it has not changed tune on the Modoc question, but is inclined to think that the Modocs rightfully belong to the Federal Government, and it had a right to take them where it pleased. It was only last Spring, if we do not seriously err, that our cotemporary went for the Federal authorities quite lively, when it hinted about taking them to Angel Island, before letting the State get through with them, and it is here that he changes tune considerably. He also thinks that the officers ought not to be censured for following instructions, but at the same time assails Gov. Grover for attempting to enforce the laws of the State. Our inclinations are that our cotemporary is very inconsistent as well as changeable on the Modoc question.

A Merited Chastisement.

Col. Thompson, of the Salem Mercury, last week administered a chastisement to Frank Meyers, of the Forest Grove Independent, which is as merited as it was severe. Meyers had published some very libelous articles on Thompson's character, and on his refusing to retract or give the names of his correspondents, he was treated to a caning.

ASHLAND ITEMS.

Harvey B. Maxwell, in a letter to the Yreka Journal, gives these items: "My little hammer has been geologizing the crags and peaks of this old and fossilized region, and I've 'so't' down on an auriferous ledge, and she lives about three miles in any direction from this point. She is four feet wide, crops out splendidly, fore and aft, and her name, I've called it Mary Ann. She assays \$300 per ton, and I've located 300 yards of the laws of Oregon under my Mary Ann, with all her dips, spurs, angles, and I warn all 'fellers' off, and not to prospect the said Mary, as I intend to work the same, always, and provided she's not a slide, or upheaval, which things 'is' detestable. Having twice visited the Golden Eagle, or Wagner Creek quartz mine, I feel thoroughly amalgamated with valuable impressions, so I'll squeeze my sponge a little to see what'll 'drop.' The ledge is some ten miles from Ashland, on Wagner creek, and nearly half a mile from the quartz mill, which is an eight stamp water power, thirty feet over shot mill. Only four stamps are running, owing to lack of water, and crushing some four tons of rock in twenty-four hours. It is conveniently located, with a graded road to the mine. Hallock, part owner and Superintendent, Anderson, Brooks and Rock-fellow, are proprietors. The first run yielded ten dollars per ton, which the Superintendent assured me was satisfactory to all parties. The rock shows well in free gold, is very rotten, and as a ledge, irregular and ill-defined. One of the miners assured me, with a jolly dip of his left optic that it, the ledge, 'is the dirtiest thing in all Oregon;' but I forgive him, I'm sorry for him, he never saw my Mary Ann! I've seen the mastodon, or his remains, found some two years ago in the '49 diggings. A small piece of lower jaw, containing one tooth, weighs twenty-six pounds. It and other principal bones, are in possession of Prof. Skidmore of Ashland Academy. This mastodon lived in the Tertiary period, 4,000 or 100,000 years ago, a few years don't matter, and his remains to be religiously accurate and exact, were imbedded in an ecocene, miocene or pliocene formation. I hope your readers understand this, as I feel an honest pride in being intelligible on scientific points, in fact, I know just how old this monster animal was; but modesty, excessive modesty, overpowers my worldly ambition. Yes, I hope you understand it, for I don't, and I should feel very sorry to write anything that no one can understand. As the bones were found eight feet from the bed-rock, and fifteen from the surface, he probably lived just prior to the 'drift,' and long before the creation of man. They were found on the west side of the valley, the wood and mineral side, and about two miles from Phenix, and, as a matter of course, he died of fever and ague!

The "Off Year" Dodge.

The Republicans in Ohio were defeated as they were in this State, and like the Oregon Republicans, they have resorted to the "off year" dodge to explain the circumstance and keep up the spirits of the disheartened rank and file. The New York World very conclusively disposes of the "off year" argument of the Ohio Republicans as follows:

It was not the "off year" that defeated the Republicans; the "off year" never defeated a political party; but the strong impression made on the public mind by the salary grab, the Credit Mobilier evidence, the exposure of the Washington Ring, the Louisiana usurpation, and other kindred iniquities which have either been perpetrated or been brought to light since the Presidential election. These enormities would have produced more effect if many of the Democracy had not remained in a state of depression and despair, and if other indignant citizens had not kept waiting to see whether a new opposition party would be organized. Those causes of inertness are now fully removed, and the fresh accusations against the Administration party will have their full practical effect, as will be seen this month in New York and New Jersey.

The Stokes' Trial.

This burlesque has at last ended, and Stokes found guilty of manslaughter in the third degree, and sentenced to four years' imprisonment. This is another instance where money has rescued a guilty man from justice, and proves that the wealthy are exempt from the immunities of the common law. There is no probability of Stokes serving out his sentence, but that he will be a subject of executive clemency ere long is certain.

PACIFIC COAST NEWS.

Building operations on the N. P. R. R., west of the Mississippi, have been suspended.

A school teacher named Rice, at Roseburg, whipped a pupil last week, was arrested and held to bail in \$500, for assault and battery.

H. S. Sale, of Astoria, has received a request to furnish grasses, etc., to a New York firm, to be transmitted as plants through the mails.

The fourth and last of the robbers who stopped the stage above Redding, nearly a month ago, has been arrested and lodged in jail at Shasta.

Sergeant M. Kennedy, a Modoc warrior, has presented to the San Francisco Pioneers a piece of the rope where-with Captain Jack was hung.

The Oregon City Woolen Mills are in operation day and night, with a full force of operatives, and yet cannot meet the demand for their goods.

We see it stated that nearly all the flouring mills on the Pacific coast are running to their full capacity to supply orders for the United Kingdom. The man who has a "grist mill" this year is in luck.

A rich coal mine has been discovered on Pass Creek, and Ben Holladay, J. J. Comstock and A. G. Cunningham have formed an incorporation with a capital stock of \$50,000 to work this and other mines in other counties in the State.

GENERAL NOTES AND NEWS.

The public debt statement shows an increase during October of \$3,039,000. Tweed is now undergoing trial in New York on an indictment which contains five hundred counts.

It is estimated that the coin in this country in banks and the treasury is \$135,000,000 gold, and \$5,000,000 silver.

Over \$38,000,000 in gold and silver was coined at the United States Mint and branches during the year ending June 30th, 1873. Including gold and silver bars over \$72,000,000.

This year is expected to witness the completion of halls with an aggregate valuation of \$4,000,000, which are in course of erection by or for the Masonic fraternity in the United States.

Commissioner Drummond in his annual report recommends again the repeal of the pre-emption land law, he being satisfied that it encourages speculators and affords them a cover for the commission of many frauds.

NEW THIS WEEK.

That Favorite Home Remedy, PAIN-KILLER!

Has been before the public for over THIRTY YEARS, and probably has a wider and better reputation than any other proprietary medicine of the present day. At this period there are but few unacquainted with the merits of the PAIN-KILLER; but, while some extol it as a liniment, they know but little of its power in easing pain when taken internally; while others use it internally with great success, but are equally ignorant of its healing virtues when applied externally. We therefore wish to say to all, that it is equally successful, whether used internally or externally. It is sufficient evidence of its virtues as a standard medicine to know that it is now used in all parts of the world, and that its sale is constantly increasing. No curative agent has had such a wide spread sale or given such universal satisfaction.

DAVIS' PAIN-KILLER is a purely vegetable compound, prepared from the best and purest materials, and with a care that insures the most perfect uniformity in the medicine; and while it is a most effective remedy for pain, it is a perfectly safe medicine, even in the most unskillful hands.

It is eminently a FAMILY MEDICINE; and by being kept ready for immediate resort, will save many an hour of suffering, and many a dollar in time and doctor's bills. After over thirty years' trial, it is still receiving the most unqualified testimonials to its virtues, from persons of the highest character and responsibility. Eminent Physicians commend it as a most effective preparation for the extinction of pain. It is not only the best remedy ever known for Bruises, Cuts, Burns, &c., but for Dysentery, or Cholera, or any sort of bowel complaint. It is a remedy unsurpassed for efficiency, and rapidity of action. In the great cities of India, and other hot climates, it has become the standard medicine for all such complaints, as well as for Dyspepsia, Liver Complaints, and all other kindred disorders. For Coughs and Colds, Canker, Asthma, and Rheumatic difficulties, it has been proved by the most abundant and convincing testimony to be an invaluable medicine.

We would caution the public against all imitations of our preparation, either in name, or style of putting up. 42x45. H. P. JOHNSON. P. A. HEARN.

JOHNSON & HEARN, Successors to RANTZAU & SHAW AND COMSTOCK & MARTIN, Forwarding & Commission Merchants, REDDING, CAL.

MARK YOUR GOODS CARE OF J. & H. By close attention to business we hope to merit a continuation of the patronage heretofore extended to the old firms. 291f.

NOTICE IS HEREBY GIVEN THAT I HAVE appointed James W. Criteher, Esq., my agent, to attend to all necessary business during my absence in the East.

I have also placed my notes and accounts in the hands of H. K. Hanna, Esq., for collection. Parties interested will govern themselves accordingly. JAMES T. GLENN, Jacksonville, October 18, 1873. 437f.
