THE NEW STATE SALOON, Corner of California and Third Streets, Webb & Jones, Prop'rs. ENGLISH ALE AND PORTER, together with the finest brands of liquors and cigars always on hand.

GENERAL NOTES AND NEWS.

Fire at Lynn, Mass.; loss, \$35,000. The people of Coos Bay are pleased over a new tri-weekly mail. Small-pox has become an alarming epidemic in Montreal, Canada. Marshfield, Coos county, is a flourishing place of 600 inhabitants. It is proposed to form a Young Men's Christian Association in Salem. Gen. Pope recently made an important capture of some Cheyenne warriors. Corvallis has a man who wants to invest \$7,000 permanently. Let him start a newspaper. During the last two weeks of October there were 193 deaths in New York city from diphtheria. It appears that the revenue loses \$1,000,000 a year by the fraudulent use of "washed" postage stamps. Susan B. Anthony denies that she ever sat on any man's lap since the days when John Bunyan used to hold her. On her retirement from the stage, Miss Charlotte Cushman, the renowned actress, was crowned with laurel by the poet William Cullen Bryant. It is estimated that at least 90,000 men are now out of employment in New York city. Surely the prospects for the coming winter look rather gloomy for the poor of that city. The Pendleton Tribune, in publishing an obituary of an old citizen, concludes as follows: "He was an unflinching Democrat, never voting any other ticket. Oregon and California papers please copy." The telegraph announces that 5,000 English farm laborers think of emigrating to Mississippi. If the project is carried out, it will doubtless prove an excellent thing for the Englishmen and for Mississippi. Gen. Sherman's report shows a total enlisted army force of \$26,400, which by January 1st may be reduced to 25,000. The report praises the officers and men, and complains that the army is too much worked. The S. F. Times says there are 1,230 men employed on the Palace Hotel, at San Francisco. It is a perfect army; and if any one thinks they do not keep good time, let them be on hand when the dinner bell rings. It is now confidently said that that great and staunch Democrat, Hon. Jerry S. Black, will be elected U. S. Senator from Pennsylvania. The election of Charles Francis Adams from Massachusetts is also predicted. A deserted California wife found her lost husband in Polk county last week living on a \$12,000 farm with another woman. No. 1 made the "gold man" give her half the farm and \$4,000 in money, and No. 2 took the fellow and what was left, and left. Hon. Samuel J. Tilden, Governor-elect of New York, is prominently spoken of in connection with the Democratic nomination for President. Mr. Tilden would make a very strong candidate, and is most acceptable to the people as well as to the Democracy. It appears that the annexation of the Hawaiian Islands to the United States is soon to be a subject of diplomatic discussion at Washington, and the King's visit to this country has some connection therewith, as also with a closer commercial treaty between the two countries. More fires—fires everywhere. Fire at Batesville, Indiana; loss, \$7,000. Fire in New York; loss \$25,000. Fire at Cincinnati; loss, \$200,000. Fire at Peoria, Illinois; loss, \$50,000. Fire at Marsellus Falls, N. Y.; loss, \$50,000. Here are losses by fire, within the period of a single week, footing up at over \$300,000. Gen. Sheridan, in his official annual report, charges that the reservations shelter Indian raiders from punishment and encourage Indian depredations on the settlers of the great plains. He confirms the report that gold was found by Custar's expedition to the Black Hills, and asks the Government to establish a great military post in that country.

I. O. O. F. M.

The following from the Pacific Odd Fellow will doubtless be interesting to the balance of our readers as well as the Red Men, of which there are several hundred in this county and State: The Improved Order of Red Men is to be complimented on the flattering showing it made at the Great Council of the United States, held at Indianapolis, Indiana, on Tuesday, September 8th. There were representatives from every State in the Union present. The long talk of the Great Chief of Records gives a very good showing of the condition of the Order at the present time. The great Inchoonee's Journal is very concise, and at the same time gives a good showing. The manner in which the Red Men were "feted" and feasted proves that the Order is very popular. The banquet at the Occidental was a grand success. Hon. J. L. Mitchell, Mayor of the city, was President of the meeting, and Dr. R. N. Todd, Vice President. The papers of Indianapolis speak in the highest terms of the whole affair, and particularly mention the absence of wines from the banquet. Good for the Red Men! From the report the following is extracted: The total receipts of all the Tribes in the United States for the year were 299,693 fathoms, 3 feet 3 inches (\$299,693.33); the total expenditures for relief were 65,531 fathoms, 8 feet, 5 inches (\$65,531.85); while for widows and orphans the expenditures were 19,268 fathoms, 4 feet, 2 inches (\$19,268.42); making a total for relief of 94,800 fathoms, 2 feet, 7 inches (\$94,800.27); expended for educational purposes, 293 fathoms, 5 feet, 2 inches (\$292.52). The present membership is 38,988. During the year 7,554 new members were adopted. The Great Council adjourned on Saturday, Sept. 12th, to meet at Richmond, Virginia, on the second Tuesday in September, 1875. IRON HORSE ON THE FLY.—It almost takes a stationary man's breath away to read such an item as this: The people who will be such fools as to consent to travel 138 miles in as many minutes on a railway, ought to be put on a par with aeronauts who fly upon balloon trapezes 2,000 feet up in the air. The other day a party of railroad officials at Clinton, Iowa, started for Chicago on a special train; the conductor had positive orders to make the run as quickly as possible. The distance to be traveled was 138 miles, and the train reached Chicago in just two hours and thirty-three minutes—the most remarkable time ever made on a railway had been accomplished. Six stops were made, consuming not less than fifteen minutes, which leaves the actual running time 138 minutes, or a mile a minute for the entire distance. POISONING BY WHOLESALE.—Dr. Hutchinson, Brooklyn, N. Y., reports to the Board of Health of that city that it contains three hundred and forty-one candy shops which are selling candies every hour in the day little better than raw poison. The poisonous ingredients are in the coloring substances used. And yet they cannot be suppressed, because, as the doctor says, it would be necessary first to analyze the candies, and that would require ten thousand separate analyses, whereof a competent chemist could make only ten per day." That is to say, in one thousand days one competent chemist could tell what candies should be interdicted; or one thousand competent chemists in one day. In this state of the case, the best thing Brooklyn can do is to refuse to patronize the candy shops. THE RIGHT SORT.—There is a class of cosmetics we can safely recommend, and guarantee that they will produce not only a clear complexion but improve the general health. Our cosmetics are plain, wholesome, nutritious food, not vitiated with soda or spice, or lard, abundance of fruit (dried apples nicely cooked will answer), frequent ablutions of the entire body, accompanied with plentiful use of fine soap on the face as well as other portions of the surface, ample exercise in the open air, and early and long sleep. Three months' use of these cosmetics will improve the most hopeless complexion, and leave only the happiest after effects. A MASSACHUSETTS man named DuBois had the blood of a lamb infused into his veins as a cure for consumption, and it said he is doing well. It may be all right, but the probability is that next spring they may have to shear him. A WOMAN at Akron (Ohio) has a mania for buying corsets, and she has a stock of 231 on hand, and only two calico dresses to cover them. "He who by his biz would rise, must either burst or advertise."

THE DRILL IN SEEDING WHEAT.

The statistician of the Department of Agriculture has concluded an investigation of the extent and advantage of the use of the drill in seeding wheat. It appears that forty per cent. of the entire area is drilled in: fifty-two per cent. of the winter wheat, and but three-tenths of the spring wheat, exclusive of that of California. A line from Chicago to Leavenworth, produced to the Pacific, practically divides the production of spring from winter wheat; northwest of it scarcely two per cent. of winter wheat is grown, (except in California); southeast of it only four per cent. of the wheat is spring sown. Half of the area of winter wheat is seeded with the drill in New York; fifty-five per cent. in New Jersey; seven-tenths in Pennsylvania; three-fourths in Delaware and Maryland; three-eighths in Virginia; from North Carolina to Tennessee an average of less than three per cent.; West Virginia, four-tenths; Ohio, six-tenths; Michigan, one-half; Indiana, one-half; Illinois three-fourths; Missouri, three-eighths; Kansas, forty five per cent. In seeding spring wheat the broadcast seeder is most used in the Northwest. The drill is employed for three-eighths of the area in Wisconsin and Minnesota; one-fifth in Iowa; one-fourteenth in Nebraska, and elsewhere scarcely at all. It is shown that the use of the drill saves one-sixth of the seed, and increases the aggregate product of winter wheat ten per cent. TWO CENTURIES HENCE.—The following fancy pictures of what may be familiar enough two centuries hence is no more improbable on the face of it than our railway, electric telegraphs and the like, would have seemed a century ago: Scene—Library in the house of elderly gent; somewhere in Australia. Old gent telegraphs to the kitchen, and waiter ascends in a balloon. Old Gent—John, fly over to Calcutta, and tell Mr. Johnson that I shall be very happy to have him sup with me. Never mind your coat now, but go. John leaves, and at the end of five minutes returns. John—Mr. Johnson says he will come; he has got to go to St. Petersburg for a moment, and then he will be here. Old Gent—Very well, John. Now start the machine for setting the table, and telegraph to my wife's room and tell her that Mr. Johnson is coming. Then brush up my balloon, for I have an engagement in London at twelve o'clock. John flies, and the old gentleman runs over to the West Indies to buy a fresh orange. HOW CHINESE RECOMMEND FORMER EMPLOYERS.—When a Chinese servant is discharged from a family, and about to leave, he places his mark on the wall of the room he has occupied or in some part of the premises where the next coming servant will see it. Whatever difference may have existed between employer and employee, whatever disagreeable things, true or imagined, that it is possible to say against the people of the house, are duly recorded in a few calligraphic signs, and a housekeeper not posted will have a chance to wonder at some things seen in a new servant. A San Francisco paper tells of a family in that city which had a continual coming and going of Chinese servants. They treated the help well, the work was light, and the pay liberal, but no servant could be induced to a reasonable stay in the house. At last it was found that a refractory man, who had been discharged, had left on the wall certain uncomplimentary remarks concerning the family, and statements that could not be verified by facts. The writing was at once obliterated, and no further trouble was experienced. THE English Dobby is a race of about a mile and a half—single dash. It is for three-year-olds, and colts have to carry 122, fillies 112 pounds. The purse is made up by subscribers, each subscriber having a right to enter and start a horse, and half the subscription is forfeited by such subscribers as do not start. The entrance is 50 sovereigns. The second horse in the race gets 300, and the third 150 sovereigns. In the late Derby, won by the colt George Frederick, there were 212 entries; and 20 started. The winnings are reckoned as follows: 20 horses starting, 50 sovereigns each, 1,000 sovereigns; 192 entered that did not start, each half forfeit, or 25 sovereigns, 4,800 sovereigns, added to 1,000 makes 5,800. From this deduct 450 sovereigns, paid to the second and third horses out, we have what George Frederick won—5,350 sovereigns, or nearly \$26,750.
