Here then was the bed of an "ancient river," flowing from the far north, west of the Cascades, through Willamette, Rogue and Shasta Valleys, uniting with an eastern branch south of Shasta Butte, then rushing grandly south- ward to the Golden Gate or Gulf of California. Upheavals and convul- sions dammed these grand old rivers and formed two vast inland seas, the other west of the Cascades. These seas cut through to the ocean in the present beds of the Columbia and Klamath rivers. The numerous lakes east of the Gascades are the last rem- nants of the great eastern sea.
