alyses have shown that there is not the slightest danger to the consumer of the fruit from poisoning the trees thus early in the season when the apples are very small. Experiments show, however, that late poison is dangerous, and furthermore, is without effect upon the codlin moth. Paris green was found most effective. Experiments were made under widely varying conditions during two successive years and on several varieties of fruit. It is estimated that the general use of the spraying

who then and there invited the who then and there invited the to his house.

Inventive genius has found a new use for electricity. American members of the gambling "profession" will have to see to it that they are not distanced by these brethren in the effete monarchies of the old world. A correspondent writes that in a gambling house in Moscow the walls and ceiling were covered with paper on which stars are stamped. Among the stars in the ceiling holes were cut, and a man laying on the floor in the room above saw the hands of those playing cards and telegraphed them, by means of wires connected with his shoes, to his confederate.
