

Oregon Editorial Association.

Pursuant to a resolution adopted at the last meeting of the Oregon Editorial Association, the next session of said body will be held at Albany on Friday, October 14, 1887.

Business of importance, affecting the journalistic fraternity of the State, including the amendment of the constitution previously adopted and the adoption of a set of by-laws for the future government of the Association, will be transacted.

Those who wish to become such, are requested to Oregon newspapers please copy.

CHAS. NICKELL, Secretary to E. A. Jacksonville, Oct. 21

Born in Massachusetts and Ohio Democrats are making a fight to elect Senator on Democratic principles without stuffing or evasion.

In many cases this kind of a fight to win means a winning fight, even in such hopelessly Republican States as those named above.

The order of the government regarding the grants of indemnity lands to railroads has gone into effect.

Roads in this State are generally affected, which have been selected are now open to settlement and entry as public lands without notice to the company.

It may be worth noting that Mr. Blaine recently said that nothing but a money panic would spoil Mr. Cleveland's chance for a re-election.

The next day after this remark was printed the New York Tribune began to panic. It has kept up the cry ever since, but it has not amounted to anything yet.

The President's trip through the western States has been unqualified success. Such large assemblies of people and spontaneous enthusiasm never have been seen there before.

The longer Mr. Cleveland and his party travel the greater the crowds become and the madder the Republican organs get.

Portages have declined in price in the Portland market a short time ago they brought a cent a pound there, and now they are only 80 cent per cent, and there is no market for them at that price.

They are about to be brought down to stored away for winter. The crop is not so short in the Willamette valley as was supposed, and there will probably be a large quantity to export in the spring.

The regular baseball season is over and the Detroit club has been awarded the championship of the League.

The Philadelphia club gets second place, Chicago is third, New York fourth and Boston fifth. The St. Louis club was first in the games played by the Association and a series of contests have been arranged between it and the Detroit for the baseball championship of the world.

The struggle promises to be close and interesting.

Fluxes between Sonoma and Santa Rosa, Cal., are growing worse. The atmosphere is smoke-laden, and the air looks like an eastern Indian summer.

Fire has swept over ten miles in the last twenty-four hours. Several fences and vineyards have been burned, and several houses swept away. Great damage is reported as have been done by forest fires in Rincon valley, in the same county. A number of people have been rendered homeless.

The X. Y. Commercial Bulletin reports that the sugar combination is rapidly approaching consummation. Representatives of Eastern and Southern refiners have been in New York city, and it is positively known that many important conferences on the subject of a great trust formation have been had during the past few weeks, at which a final arrangement is believed to have been arrived at. The Bulletin mentions \$50,000,000 as the probable capital, and the personnel taking in the entire Atlantic seaboard and New Orleans.

Every vote for prohibition will represent a dollar of taxation upon every acre of land and other taxable property in the State of Oregon, to pay the costs of wholesale prosecutions and line the pockets of justices of the peace, lawyers and those who make money off the troubles and quarrels of the people. If it were possible to count the money that is now being poured into the pockets of these men, it would not be so much profit, but it is experience, the only true test, says no. If it would stop the traffic, the Statesmen say that possibly we might afford to make all the justices of the peace and lawyers rich. But it isn't stop it.

Among the holders of domestic wool fleecings the feeling is becoming more confident. No important advance in price is expected, but a moderate advance is looked for. Buyers are more frequent in the market, and less shading in price is done. Among the sales at New York recently were 4,000 pounds of spring California at 52; 2,000 pounds of spring California at 52; 2,000 pounds of spring California at 52.

The Philadelphia market shows a slight improvement. In hops, buyers buy sparingly, but the market is firm on strictly first class goods. Cotton crop 1886, best 12 1/2; same, common to good, 10 1/2 to 12 1/2; good to prime, 10 1/2.

"The American saloon threatens our very civilization," writes a "professional prohibitionist." This is extravagant speech. Every one knows it is not true. The saloon is not so much a cause as an effect. It exists because it is wanted. It does not exist in spite of the wish of a community, but only because the community in which it is found does not support it. It is in comparison with any other in the history of mankind, more cursed with evil. Intemperance in speech is an evil, but it is not intemperance in drink, says the Oregonian.

ANTI-PROHIBITION.

REPORTED ESPECIALLY FOR THE TIMES.

Gen. E. L. Applegate, who is campaigning the State against the proposed prohibition amendment to the constitution, delivered the third address of the series, at the U. S. Hall in Jacksonville, Tuesday, Oct. 4th, to a fairly good audience.

General Applegate, who has been throughout the State to request extended personal notice at our hands, having twice canvassed the State, once against the extension of slavery, and once as a presidential elector in the campaign of 1876. He is one of Oregon's earliest pioneers, having crossed the plains to this State in 1844, at the age of ten years, and is a man of extensive learning and profound research, having acquired a classical education, almost without tutelage. Possessed of an insatiable desire to acquire knowledge, that is a distinctive characteristic of the Applegate family, he bowed out for himself an imperishable pathway through the sciences, studying Greek, Latin and Hebrew around the campfires of the earliest pioneers, and reveling in Homeric verse amid the shelving rocks and sheltering caves of our grand primeval forest. Here amid the danger and solitude of the unbroken wilderness he formed a character that must draw strong lines on all leading questions, his ability being strongly and strongly anti-slavery, and having watched our nation as it passed through the throes of fratricidal strife on that question, and emerged with Stars and Stripes undimmed, it is but a natural sequence that his opinions should be strongly and strongly anti-slavery, and having watched our nation as it passed through the throes of fratricidal strife on that question, and emerged with Stars and Stripes undimmed, it is but a natural sequence that his opinions should be strongly and strongly anti-slavery.

He is a man of extensive learning and profound research, having acquired a classical education, almost without tutelage. Possessed of an insatiable desire to acquire knowledge, that is a distinctive characteristic of the Applegate family, he bowed out for himself an imperishable pathway through the sciences, studying Greek, Latin and Hebrew around the campfires of the earliest pioneers, and reveling in Homeric verse amid the shelving rocks and sheltering caves of our grand primeval forest. Here amid the danger and solitude of the unbroken wilderness he formed a character that must draw strong lines on all leading questions, his ability being strongly and strongly anti-slavery, and having watched our nation as it passed through the throes of fratricidal strife on that question, and emerged with Stars and Stripes undimmed, it is but a natural sequence that his opinions should be strongly and strongly anti-slavery.

The general began his address with out preliminaries, making it a special feature to follow Prof. F. Campbell, who had twice addressed Jacksonville audiences in favor of prohibition. He says that Prof. Campbell has grouped together a glittering string of fallacies, amounting to what he has called the "greatest of all fallacies," and that he will not bear logical digestion. The first starting declaration of the Prof. was that "Alexander conquered the world, and wine killed him." The gentleman then proceeded to show that Alexander did not conquer the world, and that wine did not kill him. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.

He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good. He then proceeded to show that the prohibition amendment is a mistake, and that it will do more harm than good.
