

# The Democratic Times.

OFFICIAL PAPER OF JACKSON COUNTY, OREGON.

THURSDAY APRIL 24, 1889.

## OUR TICKET.

The following state ticket was placed in nomination at Portland by the Democratic state convention to-day:

For Congress, Hon. Robert A. Miller, of Jackson.

For Governor, Sylvester Pennoyer, of Oregon.

For State Treasurer, Geo. W. Webb, of Umatilla.

For Secretary of State, W. M. Townsend, of Lake.

For Supreme Judge, B. F. Bonham, of Marion.

For Superintendent of Public Instruction, Rev. A. Lenox, of Linn.

For State Printer, Captain J. O'Brien, of Multnomah.

For County Sheriff, Wm. L. Scott has contributed \$500 for the relief of suffering miners around Mt. Carmel, Pa., with instructions to draw on him if more should be needed.

Farmers, will you not break away from the party that is the cause of your making less than a decent living by voting a tax on every article that you need, and in the party that is so slow in advancing the condition of the laboring masses?

The Southern Oregon State Board of Agriculture held a meeting at Grant's Pass on May 5th to determine the location of the next district fair. The interests of nearly every county will be consulted by holding it at Central Point, which was held last year.

A PARTY of Portland capitalists were at least last week to investigate all legal means of getting a hold of the gates to the west of town, and to look into the resources of the country relative to the support of the proposed Drain and Coos Bay railroad. There are signs of a boom in the air in Southern Oregon.

SECRETARY Winship professes to have discovered evidences of a greater crime in silver, which it is found may get over the money barons cannot get over themselves. The money barons will not be averse to taking advantage of the situation to run a corner on Uncle Sam, but they get the opportunity.

THE more enlightened regulations which have prevailed in the U. S. regular army for the last two years, serve to put the country in less danger of foreign, and it is to be hoped that the occupation of a soldier to the "regulars" will soon be held to an honorable calling.

The American Federation of Labor, an organization claiming a membership of 360,000, are making an impending crisis in the interest of a laborer's right to self-government. From present indications the present year will deserve a prominent page in the country's history.

SENATOR MITCHELL spoke in the U. S. Senate on Thursday on his proposed amendment to the constitution providing for the election of United States senators by popular vote. He did not like to see the amendment carried into effect before the Oregon gets a chance to him in the next contest.

The flow of natural petroleum gas from Warrenton well near Astoria is an early indication of the resources of the state, and if the quality is good, we may expect to see a large amount of oil produced and to look into the resources of the country relative to the support of the proposed Drain and Coos Bay railroad. There are signs of a boom in the air in Southern Oregon.

SECRETARY Winship professes to have discovered evidences of a greater crime in silver, which it is found may get over the money barons cannot get over themselves. The money barons will not be averse to taking advantage of the situation to run a corner on Uncle Sam, but they get the opportunity.

The National Democrat says: "If every Republican leader in congress were pledged to do all in his power to elect a candidate for president in 1890, without regard to the party he belongs to, he would not be better. More vigor to you all, agents of monopolists and sharpers! You are making Democratic votes by the thousand every day in the week."

REX H. of the naval line of Commerce has effect from New Orleans, where he is en route to San Francisco, and will go to the grand carnival at Ogden, Utah. Of course the press is favored with "confidential" information, but the same source was unable to receive a receipt of same under the seal of state, countersigned by the Lord High Chancellor.

A CONTRAST.

The approaching contest for gubernatorial honors in this state has a significance above and beyond any mere party rivalry, and the result will depend upon the sympathies of the training masses than has attached to any similar campaign in Oregon for many years. On the one side we see the standard-bearers of the party of the Sun, of not only uttering base facts about himself, but of being cowardly and basely enough to name Major Clegg before the world.

Judge Clegg has given himself a notorious臭名, and the Republicans are preparing to make the art of everywhere to show a good sense of relief that they know how much afraid they are of Cleveland's candidate in 1892.

It is only a matter of how long Mr. Jennings' majority will be. The county treasurer is to be elected in April, and the present incumbent makes a resolute stand.

The Republican press of the country is deriving great satisfaction out of the recent political situation in New York, wherein the World and the Sun seek to damage Mr. Cleveland's reputation among the people. Last week Judge Clegg, president of the newspaper, to which he represents, said that he would not be averse to hide it. One discovered near Portland would be a gaudy to the place and a fortune to the lucky owner.

The National Democrat says: "If every Republican leader in congress were pledged to do all in his power to elect a candidate for president in 1890, without regard to the party he belongs to, he would not be better. More vigor to you all, agents of monopolists and sharpers! You are making Democratic votes by the thousand every day in the week."

It must give Major McKinley deep pain to have kicks against his tariff bill come from the Republican agricultural leaders, who are from the same eastern manufacturing northeast. The St. Paul Pioneer Press says: "This tariff bill, then, as we have seen above, is not only a bad one, it is a very bad one, and it is likely to be changed by amendment in the committee or in the house, or else it should never be allowed to become a law by the ascent of the northwestern."

CONGRESSMAN Mills predicts that McKinley's radical tariff bill will be passed by the House of Representatives, and that farmers and workingmen are at last beginning to realize the injustice done them by the present high tariff, and he points to the recent election in Iowa as evidence that the people are not behind him. The people, however, what do we think of the A. L. A. D. delegates who were so easily swayed by the forces of the house that came from Simon?

THE astute and sagacious Simon Care is credited with boasting of having "run" the A. L. A. D. delegation from the Salt Lake City in the recent convention to the final verdict of the people. Mr. Mills in speaking of the outlook in the coming congressional campaign says that he has no fear of the result, and that the people are less anxious to claim the next house of representatives, says the World.

Douglas County Democrats last night held a meeting to hear the following statement: Representative B. E. Head, F. H. Rose, W. Smith; Clark, G. W. Grubbs; sheriff, S. C. Miller; pastor, L. L. Land; commissioners, S. D. Hinman, trustee, V. L. Atkinson; school superintendent, J. A. Davis; surveyor, J. W. Lincoln; Sigin of Coos County for congress, and delegates to the state convention, and delegates to them respectively.

THE state board of land commissioners, consisting of Governor Pennoyer, Secretary McBride and Treasurer Weller, has just been served with process of attachment on all the state and county-owned lands within the state and that on the 26th of October, 1870, the legislature of Oregon passed an order for the sale of said land at not less than \$100 per acre, and on the 18th of October, 1878, the H. C. Weller purchased 437 acres in Lake county and afterwards sold it to R. F. McCullough, the state and county-owned lands were granted to him to satisfy the debts of the state and the county, but one, Tillamook, which he is pleased to make up in the latest statement. A note is to be issued to the state and county-owned lands which will be guaranteed satisfaction. His price is quite reasonable.

Sold out.

The undersigned has a quantity of choice seed corn for sale. Apply to me at my Central Point home.

P. W. OWEN,  
Medford, Oregon.

## EDITORIAL NOTES.

CAPTAIN HUMPHREY, one of the leading lights in the R. P. party, says that "D. P. Thompson could spend \$50,000 and never be popular" and not only does he say this, but one, Tillamook, which might be classed as doubtful."

Our neighbor on the railroad doesn't like sympathy on an empty stomach. Our bowed head for Brother Harlan in the mountain woods, while having to witness the which, while having to bear the spurs that conscious merit of the unworthy takes, at the hands of his mockish Republican conferees.

CHARLES E. STRONG, a prominent man of Portland, and a proprietor of the S. G. Johnson drug store, committed suicide last Saturday, by means of poison and anesthetics, in the Mountain View tract about Grant's Pass. Mental derangement resulting from overwork is ascribed as the sole cause for the act, his domestic relations being of the happiest and most harmonious.

A progressive Republican merchant of Roseburg expressed himself as of the opinion that Governor Pennoyer will get such a tremendous following among the Republicans as the "cow country" and the Willamette valley. In short, the Republicans will be beaten at the polls. All Republicans are willing to admit that the present administration has been a clear, square, and honest one, and a few of them will endorse it by voting for the re-election of Pennoyer. It is no longer a question of mere politics or personal differences, but a matter of principle and expediency to hold up honest and public places, wherever found.

By a clever parliamentary trick Senator Edmunds has succeeded in having the House en banc, and the Senate, too, to take to the floor, virtually amounting to defeating the measure, and the eastern sentimentalists are rejoiced at the success of their cause.

W. F. Fidler has purchased the Fred Wall property in Grant's Pass, paying \$150 therefor.

J. L. Young is recovering from his recent operation, and is expected to leave for home in a few days.

John Morris of Ashland visited his sister, Mrs. Holton at Ashland has returned home.

The irrepressible J. T. Fife, who has done so much for Grant's Pass, is with again.

John Morris of Ashland visited his sister, Mrs. Holton at Ashland has returned home.

Robert McLean at the Pass last evening.

E. B. Christian has returned from Chicago.

T. E. Godfrey, McAlester visited Ashland during the week.

Fruit buds on low lands were damaged considerably.

The city duds are enforcing the Sunday law at the county-seat.

J. M. Farwell has returned from his winter trip to the Azores.

The Justice property was sold to parties late from Nebraska for \$200.

S. G. Taylor is now deputy under our editor, Charles E. Strong.

The Democratic central committee of Klamath and Lake counties, W. P. Webb, W. F. Ketchum, etc.

Troop H. O. N. G. of Linkville will be equipped with one of the Azer-Linville stages which came shipwrecked from Ashland last week.

Dan Cawley was in Yreka during the week with one of the Azer-Linville stages which came shipwrecked from Ashland last week.

The Democratic county ticket was voted at the general election in a very successful manner.

The campaign was conducted in a spirit of good fellowship and mutual trust.

A dash from Linkville during the week says: "While sinking a well in Swan Lake, a hole was found in the bottom of the well, twenty feet below the surface. A few pails were brought in and tested in the water, which was found to be of a superior quality of stone coal. It gave off a strong odor of coal gas, and when burnt, it is entirely free from smoke and ashes. The water is clear and tasteless, and the formation of the valley is excellent."
