WOMEN AND MICE.

The reason why a woman is afraid of a mouse is a profound mystery—indeed, it has never been very clearly proven that she is. But some women are constantly in such a nervous, irritable condition that the slightest thing annoys and startles them. The cause of this unfortunate state of affairs is usually some functional derangement; some distressing or painful irregularity, some derangement or peculiar weakness incident to bersex; or, it may be due to inflammation, ulceration or displacement, of some of the pelvic viscera, or to other organic lesions peculiar to her sex. From whichever cause it may arise, Dr. Pierce's Favorite Prescription is a positive remedy, so certain in its curative results that its manufacturers sell it, through druggists, under a guorantee of its giving satisfaction in every case, or money paid for it will be promptly refunded. As a soothing and strengthening nervine, "Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, exhaustion, prostration, hysteria, spasms and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the womb. It induces refreshing sleep and relieves mental anxiety and despondency.
