## Fruit! HOMES IN ORCHARDS. Fruit!

We challenge the reader to successfully controvert the assertion that an acre of thrifty, well-cultivated, producing orchard trees in the valley of Rogue River will yield a net yearly income of \$100. It will average 100 trees to the acre, and the estimate is based upon the demonstrated fact that each fruit tree will produce \$1 in value, net, of ST. MARY'S ACADEMY,

In other words an acre of producing fruit trees has a valuation of \$1000. It is better than any bank-for the bank is sometimes carried into Canada by the cashier, Dame nature-a trust-worthy guardian takes care of the principle, and the dividends never fail. Of course if S day, and the first stages of consumption broken in a week, we hereby glarantee Dr. Acker's English Cough Remedy, and will represent the property of the proper nourishment by making a cornfield of the orchard ground, and invite nourishment by making a cornfield of the orchard ground, and invite the birds and orchard pests to make a restaurant of your orchard, you must not complain that your horticultural methods have precipitated a included in the English course, form no extra must not complain that your horticultural methods have precipitated a

#### foreclosure of the mortgage on your orchard. CULTIVATE YOUR ORCHARD

With half the care you give wheat-fields, and it will yield an income on a valuation of \$1000 an acre. There is not a wheat-field in this county which yields such an income, and EVERY orchard does. We propose to sell you an acre of fine alluvial soil, within cannon shot of five growing towns, close to the steel rails of a trans-continental railroad, in the most beautiful valley on the slope of the Pacific, with one hundred growing, thrifty producing fruit trees, to be selected by STROHECKER-In Grant's Pass, June 14, you. Buy it for a home to shelter you if adversity or the winters of

#### old age overtake you and find you penniless.

IT IS WORTH \$1,000. We give away the land. Pay us \$10 a month, 10 cents a tree, for SICNAL TEHAMA GEORGE two years, and we will present you a warranty deed of the acre, and GUARANTEE it to have a thrifty, growing, producing orchard. Despite these facts the farmers of the country continue to value their land high, and rob its soil by sowing it with wheat and competing in the markets of the world with the seris of Russia and the slaves of India. "Export the wheat of a country and you ship away the vitality of its soil," says a great economic writer. The people of Jackson |

county should learn this as an axiom. Every bread-winner at the forge or near the cutting saws, or in sound of the hum of the shuttles, or the thunder of the factories, or toiling late over desk and counter, should study our plan well. It means a home for a life-time out of the meagre savings of 2 years' work. A more beautiful and a larger home than ninety per cent. of the population of the civilized earth can claim to own. Write to us, and we will send you our illustrated book of this great

valley and our Orchard Home. THE ORCHARD HOME ASSOCIATION
