

TO ADVERTISERS.

The TIMES has a circulation of 2500, the largest enjoyed by any newspaper published between Portland and Marysville, California, a distance of 700 miles. It therefore offers the best inducement to advertisers. Our list is principally confined to Jackson, Josephine and Klamath counties. Business men should take note of this.

HEWITT won the bicycle race at Portland last week, making 355 miles in 18 hours, which time is the best on record. Staver might have won but for the accident which befell his wheel. He finished third and Eli Lee second.

The two-minute pacer has arrived. Flying Jib, the great rival of Robert J., made a mile a few days ago in 1:59 1/2. His time, however, will not affect Robert J.'s record, as the performance was made with a running mate, which style of going is barred from competition for the record.

The S. P. company is cutting down expenses in all departments. The last move is the retirement of R. H. Pratt, assistant general superintendent. Mr. Pratt's retirement has created a big surprise in railroad circles, as he is a very old employee of the company. His department will be abolished.

The great running race between the three cracks of 1904—Henry of Navarre, Clifford and Domino—for a purse of \$5000, was won at Morris Park last Saturday by the first-named horse, who is by far the best campaigner and the most reliable. He made the mile and an eighth in the last time of 1:24 1/2.

The president has appointed the following postmasters: G. H. Lettler, at Green Basin, Klamath county; W. T. Shive, at Keno, Marion county; Mrs. Martha Hogan, at Lone Rock, Gilliam county; J. B. Kepler, at Macksville, Clackamas county; M. E. Hutchinson, at Morton, Klamath county; and Riley Shelton, at Scio, Linn county.

AGREEABLE to the hopes of all true Democrats Senator Hill has accepted the nomination for governor of New York. Lockwood accepted the nomination of lieutenant-governor, but Judge Gaynor declined and Chas. Brown has been nominated for judge of the court of appeals. Mr. Hill is easily the strongest and best equipped man for governor of the great empire state, and in ordinary years would distance Morton. He accepted the nomination very reluctantly, but felt that he could not ignore his party's call.

The Democratic party has kept faith with the people in the matter of economy in public expenditures. It has reduced appropriations over \$28,000,000 for the current fiscal year, and for the first time in twenty-five years has shifted a part of the burden of taxation from consumption to wealth by passing an income tax law of a per cent, upon all incomes over \$5,000, and by making federal securities taxable has added \$50,000,000 to the taxable wealth of the United States. Besides, it has reduced the tariff on the necessities of life to the amount of many millions of dollars.

MR. ECKLES, comptroller of the currency, who recently returned from an extended western trip, said on his return to Washington that he found everywhere unmistakable evidences of a general revival of business, and he believes that this improvement in business is going to be an important factor at the polls as soon as the situation is generally understood. His idea is that the men who were so quick to blame the Democratic party for the bad times will be equally as prompt to credit the party with the return of prosperity and vote to keep it in power as a reward therefor.

THE Lexow investigating committee is stirring up a lot of rottenness in the New York police department. If there is truth in one-half of the testimony that has been produced New York is a den of robbers who prey on unsuspecting strangers. A well-known Portland man had an experience in New York city recently that would be of value to Dr. Parkhurst's "committee of seventy." He was lured into a sharpener's crib in one of the most prominent business centers of New York city and robbed of several thousand dollars. When he reported the matter to the police he was told that such affairs were of everyday occurrence in that city, and the subject was dropped. The police and the robbers stood in together. With all its wickedness Chicago can make a better showing than that, and unless New York can reform itself the travelers with money in their pockets will all go to Chicago.

EUGENE LEIGH has bought the great racer Kingston for breeding purposes at a good round sum. The admirers of the "brown whirlwind" have probably had the last opportunity of seeing him race. Kingston, who is now a ten-year-old, was a high-class performer from a two-year-old to the present day. Not until age began to tell upon him was he ever beaten. In the opinion of the Breeder and Sportsman and nearly everyone else he was the best horse the Americans have ever seen. He has won at all distances, from half a mile to a mile and a half against the best of the land. Out of 136 starts he has been first on no less than eighty-eight occasions (the largest number of races ever won by any horse) and was unplaced in but four races in the eight seasons he has been on the turf. Among his best performances are 1 1/4 miles in 2:06 1/2, 122 pounds up; mile in 1:40 4/5, 123 pounds up; seven furlongs (circular course) in 1:26 1/2, 150 pounds up; six furlongs in 1:13 1/2, 137 pounds up. This is a record unequaled. Kingston is by Spendthrift, dam Imp. Kapanga, by Victorious.

A dispatch received at the state department from United States Minister Strobel at Quito, Ecuador, announces the approval by the congress and the executive of the Mahany-Vasquez treaty, providing for the submission to arbitration of the claim against Ecuador of Julio Santos, an American citizen. This notice marks one of the final steps in this attempt of what was in the past a famous case—one that very nearly involved the United States in war with Ecuador, and one that has run through four administrations. Santos was doing business in Bahia. In 1884 he was arrested in Guayaquil and thrown into jail on a charge of participating in a revolutionary movement, and his property was also seized.

Corbett has covered Fitzsimmons' deposit of \$1000 for a fight for the championship of the world and their representatives will meet to-morrow to decide on the details of the contest. The Press Association.

The annual meeting of the Oregon Press Association, which took place at Pendleton last week, was one of the most successful and interesting ever held by that organization. Notwithstanding the fact that the distance from the scenes of their labors made it inconvenient for many members who reside in western and southern Oregon to attend, yet the attendance was good. Considerable important business was transacted. The next meeting of the association will be at Newport in August, 1905. The following officers were elected for the ensuing year: President, John R. Beggie, of the St. Helen's Mist; first vice-president, C. C. Doughty, Dallas Observer; second vice-president, Frank G. Hull, Milton Herald; secretary, A. The strike is off, and harmony prevails. Tell all your people—and don't you forget it—that the Northern Pacific R. R. is now open and running through trains on schedule time between Portland and St. Paul, without change of cars. No delays or transfers.
