"Way is He so Irritable" This question is often heard and nearly as often unanswered. It is not always remembered, as it should be, that the occasion of ill-temper and irritability is often to be found in the physical condition of the person affected. What is the use of trying to "harmonize" a man whose liver has gone back on him? If a man is tortured with rheumatism, how can he be expected to be affable and agreeable? C. A. confirmed dyspeptic he is expected to be cheerful and always ready to tell a funny story? The only way to remove the irritability is to get at the cause. Dyspepsia, rheumatism, impure blood and liver troubles lead to Hood's Sarsaparilla; this is why it is an effective tranquilizer, a peaceful messenger, and a preventive of domestic quarrels.
