### BREVITIES.

Russian detectives have been told off to watch Russian students studying in Germany for the purpose of ascertaining whether they have had anything to do with fomenting the disturbances in Russia. German students in Berlin have been molested by the detectives, who have followed them into houses and cafes and questioned them.

Consul Mahlin of Reichenberg says that, according to a report from Brussels, a Belgian engineer by the name of Toblansky has discovered a method by which smoke can be turned into light. In operating his device the inventor collects the smoke from any kind of a fire and forces it into a receiver. It is then saturated with hydrocarbon, and a brilliant light results.

The Salvation Army commander some three years ago bought 1,000 acres of land in Colorado, to which has lately been added 1,000 more, and the task of colonizing great farms in the west with the surplus poor of the cities is being prosecuted with great earnestness and with great success as well. These farm colonies are now being multiplied in all parts of the country.

The Paris fire department has adopted automobile fire engines and hook and ladder trucks, and they are notably superior to the old apparatus. The engines are run by storage batteries. The electricity is used not only to propel the engine, but to work the pumps also. There is no delay getting up steam, and one charge of the accumulators will keep the pumps going five hours.

For a number of years the largest ships using the Suez canal have sailed under the German flag. Further, Germany has on the average larger ships than England, for while the average size of the German vessels is 4,431 registered tons the average size of British vessels is only 4,016 tons. Twenty years ago only 15 German vessels passed the canal, and now the number has reached 462.

A Paris schoolmaster has petitioned the French chamber against kings still being portrayed on French playing cards. He suggests that kings should be replaced by pictures of Thiers, MacMahon, Grevy and Carnot and queens by equally prominent republican women. The parliamentary commission sitting on the petition has replied that the change is impossible since it would ruin quite a number of playing card factories.

An imperial ukase decrees the building of the Russian Northern railroad, which is to connect St. Petersburg, Tichwin, Tacherepovetz, Valogda, Bul, Galich and Viatka. This line is to be begun next year and will be built by the government, as also a branch from Bul, to connect at Danilow with the Moscow-Yaroslavl-Archangel line. A part of the latter is to be broad gauge, and a bridge is to be built to cross the Volga at Yaroslavl.

### Hundred Year Clubs

Are becoming numerous. The idea is to promote longevity. It is interesting to note that the means through which long life is to be obtained, is food and the stomach. Long life and good health are not possible unless the stomach does its work properly. There is a way to make it, if it does not. Hostetter's Stomach Bitters is an ideal strength restorer. If you would be cured of dyspepsia, indigestion, belching, constipation, insomnia, nervousness, biliousness, try the Bitters. Everybody should try it to help nature rid the blood of all impurities. It possesses valuable curative properties, and as a specific for malaria, fever and ague it is unequalled. Don't fail to give it a trial, but be sure you get the genuine.

### When Stovepipes Were Scarce.

One of the old settlers of Kansas tells the Belt Gazette of an incident in his pioneer days which illustrates the scarcity of materials with which the early settlers had to contend and particularly of that very common household necessity, pipe for stoves. After moving his family into a dugout on his claim the old settler found that he did not have pipe enough to reach through the roof. So the pipe was extended through a window, where it performed its function very well save when the wind was blowing from the direction in which it was pointed. On these occasions the stove would be moved to the other side of the room and the pipe extended through another window, and the old settler says it was a common remark in his household all through the first winter to have some one say, "Come, boys, let's shift the stove over."

### Three Extra Clean Cities.

No loose paper in the future is to be thrown on the streets of Moline, Ill., for Chief of Police Kittelsen has declared war against all offenders. Besides this, store sweepings are not to be swept out to the sidewalk nor ice washed on the streets nor water from the scrubbing of saloons or stores to be swept across the sidewalk nor garbage or offensive matter to be placed on the streets nor kitchen refuse to be placed elsewhere than in galvanized iron cans holding between three and ten gallons under a penalty of from \$3 to \$100. Mayor Barr of Joliet, Ill., has instituted a similar campaign in his city. President Grove of the Cleaner Dallas league of Dallas has warned the inhabitants of his town that the ordinances covering the same items as mentioned above will be strictly enforced.—Municipal Journal and Enquirer.

## Bird-Shot For Tiger.

No use to hunt tigers with bird-shot. It doesn't hurt the tiger any and it's awfully risky for you.

Consumption is a tiger among diseases. It is stealthy—but once started it rapidly eats up the flesh and destroys the life. No use to go hunting it with ordinary food and medicine. That's only bird-shot. It still advances. Good heavy charges of Scott's Emulsion will stop the advance. The disease feels that.

Scott's Emulsion makes the body strong to resist. It soothes and toughens the lungs and sustains the strength until the disease wears itself out.
