GO EAST No External In an article in the Chicago Record-Herald teiling how a frugal little wom-Symptoms.

The blood may be in bad condition, yet with no external signs, no skir eruption or sores to indicate it. The symptoms in such cases being a variable appetite, poor digestion, an indescribable weakness and nervousness, loss of flest and a general run-down condition of the system - clearly showing the blood has lost its nutritive qualities, has become thir and watery. It is in just such cases that S. S. S. has done some of its quickest and most effective work by building up the blood and supplying the elements lacking to make it strong and vigorous.

'NERVE WASTE"

One of the most helpful books or nerve weakness ever issued is that en-titled "Nerve Waste," by Dr. Sawyer, of San Francisco, now in its fifth thousand. This work of an experi-enced and reputable physician is in agreeable contrast to the vast sum of false teaching which prevails on this interesting subject. It abounds in carefully considered and practical advice, and has the two great merits of

wisdom and sincerity.

It is indorsed by both the religious and secular press. The Chicago Advance says: "A perusal of the book and the application of its principles will put health, hope and heart into usands of lives that are now suffering through nervous impairment.

The book is \$1 by mail, postpaid. One of the most interesting chap-ters—chapter xx, on Nervines and Nerve Tonics—has been printed separately as a sample chapter, and will be sent to any address for stamp, by the publishers, THE PACIFIC PUB Co., Box 2658, San Francisco

Delicions Drinks.

Pineapple juice drained from the ment. fruit and mixed with currant, lemon. blackberry or raspberry juice makes a delicious drink. A few wedges left to float in the lemonade bowl improves the flavor of that beverage.

Nothing else on a hot summer afternoon will give the guests so much real comfort as a big bowl of delicious lemonade placed in convenient access t the drawing room or veranda, says the New York Tribune. A cone of sherbet towering from the center of the bowl adds to its sightliness and flavor.

A Bell That Never Rang.

A curious legend is that connected with the bell of St. Mura, in Ireland. The bell was said to have descended from the sky ringing loudly, but as it approached the earth the tongue de tached itself and returned to the skies. The people concluded from this that the bell was never to be profaned by sounding on earth, but was to be kept for purposes more holy and beneficent.

An Act of Gratitude.

A gentleman saved the life of a clothes dealer who had been capsized in a boat. The latter was profuse in his thanks and said to his rescuer: "I see that you have spolled your clothes on this auspicious occasion. Allow me to take the opportunity of handing you my business card. Ten thousand elegant summer sults at 46 marks!"-Filegende Blatter.

"Last May," says Mrs. Curtis Ba-Last May, Says Mrs. Curtis Ba-ker of Bookwalter, Ohio, "an infant child of our neighbor was suffering from cholera infantum. The doctor had given up all hopes of recovery. I took a bottle of Chamberlain's Colic. Cholera and Diarhoea Remedy to the house, telling them I felt sure it would do good if used according to directions. In two days' time the child had fully recovered, and is now (nearly a year since) a vigorous, healthy girl. I have recommended this remedy frequently and have never known it to fail in any single instance." For sale by City Drug Store,

Cloud Mountains.

The highest of all the clouds are those delicate, white, fibrous, detached masses of frozen vapor; always seem ligh against the blue sky. The topnost point of the highest of these may be ten miles above the earth. They are alled cirrhus clouds. Altogether there are ten principal types of clouds. The owest, known as the stratus, are really porizontal sheets of lifted fog seen on damp days or in very damp localities. These clouds are only a few hundred

feet above the earth. Some of the vast bodies of vapor are higher than the tallest of the Alps. They are undoubtedly snow cappedveritable mountains of ice and snow. It has been discovered that the temperature on one such summit was 75

degrees below zero. Were it possible for us to ascend in a balloon and penetrate one of these snow capped peaks from base to summit we should travel first through a layer of dry air, vapor and water, a third of freezing vapor, water and ice, and finally through the summit, composed of dry air, vapor and ice, but no

CASTORIA For Infants and Children. The Kind You Have Always Bought

The ordinary chiffon parasols are flounced in every conceivable pattern. Often all flounces except the outer one are applied in points or scallops, the bizarre effect being further enhanced by the application of black edgings of lace or chiffon ruchings. Some of the shades are flounced and then decorated with appliqued centerpleces in lace or colors. The lace cover over colors ts popular with those who can afford it. Provided the lace is of good quality it tooks quite well, but the ordinary cheap imitations are an abomination. All over embroideries applied on chiffon produce handsome effects, says the Springfield Union. A sunshade of chiffon sprayed with embroidered popples was a bandsome affair. Scarlet and gold is a fashionable combination for certain dashing types, but its general popularity is waning. Red has too great a suggestion of high temperature to be quite sultable for summer.
