guidance of members of the congress a real live Newcomen engine was discovered at a colliery at Rutherglen, Drug Store. near Glasgow. It is almost certainly the oldest engine now at work and is really a quite remarkable case of

the survival of the unfittest. A few years ago an engine of James Watt's manufacture, with sun and planet wheel complete, was taken down at a London brewery. It had been continuously working for 102 years and was not at all decrepit when dismounted. It pow forms an archæological exhibit in the museum of Sydney university. But this engine, though interesting and of about the same age as the Glasgow Newcomen, was of a comparatively modern type. It did not represent an extinct race.

The Newcomen engine at Farme colliery Rutherglen, was built in 1809 and has worked continuously to the present time.-Cassier's Magazine.

Spring Gardening Hints.

Azaleas in any number of vivid

shades come in April and May. The tamarix throws out its lovely shafts of feathery pink bloom in May. It should be remembered that there are a half dozen varieties of syringa that blossom in June.

From the 10th to the 20th of April is the time to plant shrubs. Amateurs should keep this in mind.

Althreas of various shading will show their "Rose of Sharon" flowers in August and September. Plants of sweet william must be pur-

chased for a new garden, as those grown from seed sown in the spring will not blossom until the spring following. Once started, however, they will continue year after year. Flowering almonds adorn their long

branches in delicate pink for April. In "I have used De Witt's Little Early April, too, come the Louicera alberti, magnolias, soulangeana and lennel, as well as the Prunus triloba and the Japanese flowering prunus. The goldenrod makes an excellent
