Bright's Disease.

The largest sum ever paid for a prescription changed hands in San Francisco Aug. 30, 1901. The transfer involved in coin and stock \$112. 500 and was paid by a party of business men for a specific for Bright's Disease and Diabetes hitherto incurable diseases.

They commenced the serious investigation of the specific Nov. 15, 1930. They interviewed scores of the cured and tried it out on its merits by putting over three dozen cases on to the the treatment and watching them. They also go physicians to name chronic, incurabl cases, and administered it with the physician for judges. Up to Aug. 25 eighty-seven per cent. of the test cases were either well or progressing favorably.

There being but thirteen per cent. of failures the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address JOHN J. FULTON CO. 420 Montgomery St., an Francisco, Cal.

Solving the Indian Problem.

The bill pending in congress, introduced by Representative Vreeland of the Thirty-fourth New York district, providing for the allotment of lands within the Allegany and Cattaraugus reservations among the Indians of the Seneca Nation and making these Indians citizens of the state of New York and of the United States, is of general public interest, as furnishing the only ultimate solution of the Indian problem. It has long been held by those best acquainted with the Indian question that the maintenance of tribal relations, particularly where reservations are adjacent to or surrounded by thickly settled white populations, is inimical to the best interests and highest development of the In- We always have and expect

dians, both morally and materially. In their communal life they seem to have absorbed from their environments Fashionable about all the vices and few of the virtues of the white man's civilization. It has been urged in opposition to

the Vreeland bill that the Indians are not qualified for citizenship, Upon this point testimony was recently given before a subcommittee of the house committee on Indian affairs by Representative Vreeland, who for over thirty years has had an intimate acquaintance with New York state Indians; by Dr. A. D. Lake, who has been United States dispensary physician on the Cattaraugus reservation for twenty-eight

(🐲)

years; by Mr. A. W. Ferrin, for nearly eight years United States Indian agent, and by Hon. Merril E. Gates, for eighteen years a member of the board of Indian commissioners and its present secretary. Their testimony was to the effect that a large majority of these Indians are as competent for assuming the duties and obligations of citizenship as the average white men of the same walks in life.

All these gentlemen unhesitatingly declared their convictions, based upon long acquaintance with the Indians and their knowledge of the conditions which exist upon the New York state reservations, that the interests of the Indians demand an abolition of their tribal relations and the bringing of the reservation residents under the laws of the state. Dr. Gates, representing a body of men of the very highest character who have long been identifled with the cause of the Indians in this country and who are recognized as among their very best friends, was particularly emphatic in his condemnation of the present reservation system and in his advocacy of the changes proposed by the Vreeland bill. It is generally conceded that intellectually the American Indian is supe-

rior to some of the elements of our
