## ALMOST A MIRACLE

### THE WONDERFUL RECOVERY OF A MINNESOTA MAN

His Lower Limbs Had Become Useless and He Drugged Himself Around Like a Snake.

When the story of the wonderful recovery of John Hunter in the little town of Chico, Calif., from paralysis and locomotor ataxia is still fresh in the mind of everyone, an account of another equally remarkable and somewhat similar case comes from Minnesota.

Near Northfield, Minn., lives P. A. O'Brien, known to everybody round about the town. In the fall of 1900 he was obliged to give up work, because of a disease which one of the physicians who attended him called locomotor ataxia and another paralysis. He suffered for more than three years and, for part of the time, lay in a harness by the doctor's direction. He grew worse and the physicians pronounced him incurable. But at last, like a miracle, came his cure. Let him tell the story: "I had been in bed for nearly three years. A cold number commenced in my feet and worked upwards. It grew worse, and, in November, 1900, I had to quit work. The disease but me over, and when I attempted to straighten up, it felt as if someone were cutting in the pit of the stomach with a knife. I always felt tired and could not rest at night, my feet felt as if they were needles sticking in them and my legs so numb that I could not walk. They would shake so sometimes that I could not hold them still with both hands.

"When I got so that I could not walk and I had to pull myself around like a snake. When I got excited my heart would palpitate and I would choke up. My kidneys also became affected and I could not sleep.

"I had been told that Dr. Williams' Pink Pills for Pale People would help me. I had never heard of them before, but from that on I had a steady faith. I will never stop until I get well. Dr. Williams' Pink Pills, for they have been a new name to me.

"At all druggists, or direct from Dr. Williams' Medicine Company, Schenectady, N. Y., fifty cents per box; six boxes for two dollars and fifty cents.

## Pains in the Back

Are symptoms of a weak, torpid or stagnant condition of the kidneys or liver, and are a warning it is extremely hazardous to neglect, so important is a healthy action of these organs. They are commonly attended by loss of energy, lack of courage, and sometimes by gloomy foreboding and despondency.

"I had pains in my back, could not sleep and when I got up in the morning felt worse than the night before. I began taking Hood's Sarsaparilla and now I can sleep and get up feeling rested and able to do my work. I attribute my cure entirely to Hood's Sarsaparilla." Mrs. J. N. PERRY, care H. S. Copeland, Pike Road, Ala.

### Hood's Sarsaparilla and Pills

Cure kidney and liver troubles, relieve the back, and build up the whole system.

The steel bridge across Bear creek, at Medford, was completed Tuesday evening, and is now in constant use. It is a handsome, substantial structure, second to none in Southern Oregon, and reflects credit on those connected with its construction. There is no danger that the waters of the stream will ever affect it, under any ordinary emergency, while no weight that can be put on it will break it down.

We inadvertently neglected to comment on the interesting programme printed in our columns and rendered at the Presbyterian church not long since. The principal feature was the beautiful song service, which was participated in by the choir, composed of Mrs. J. H. Hoffman, Miss Ethel Barber, Mrs. Gus Newbury, Prof. Washburn, H. G. Dox and Miss Carrie Beekman, the organist, assisted by John F. Miller. The following solos were cleverly sung: "His Deeds and Rejected," by Miss Ethel Barber; "Calvary," by J. F. The masquerade ball held at Central Point Thanksgiving was a great success. All who were in attendance report having enjoyed themselves thoroughly. The same can be said of those who partook of the supper under the auspices of the Epworth League.

Work on the Klamath Lake railroad is being carried on energetically, with expectation of completion to the timber belt above Fall creek, Siskiyou county, Calif., within the next two months. Rails are laid as far as that point; but there will be no travel over the road at present.

The case of the State vs. Betsy Pomplun, tried in the circuit court for Klamath county for the killing of her mother, Dr. Hannah, in June last, was given into the hands of the jury Friday night; but an agreement was not reached until 24 hours later, when a verdict of acquittal was returned.

The dancing party given on the night of Thanksgiving day was the event of the season. Orly's hall was crowded with the votaries of the torch and presented a brilliant scene. The Native Daughters, under whose auspices the ball was given, have every reason to be congratulated upon the success which attended their efforts.

She mistook the lantern for the headlight of an engine and leaped from the bridge, her life being dashed out on the rocks below.

Gold Hill has one of the best and newest papers in Jackson county, but they haven't space enough to tell "all the world" at one time that A. P. Estabrook, the leading druggist, is headquarters for drugs, good and pure, druggist sundries, rubber goods of all kinds, high grade stationery, a full line of optician's goods, a reliable optician in Gold Hill that keeps an up-to-date line of perfumes; as large a line of fancy and school tablets as ever brought to Southern Oregon. The Roseburg-Myrtle creek stage was held up near the Ireland place, a mile and a half from Olalla. The only persons on board were Driver Sawyers and A. W. Perkins, a commercial traveler. ## THE CRATER LAKE NATIONAL PARK.

### Recommendations of the Secretary of the Interior Concerning this Great National Wonder.

By act of Congress, approved May 22, 1902, the tract of land bounded north by the parallel 43 deg. 4 min. north latitude, south by 42 deg. 48 min. north latitude, east by the meridian 122 deg. west longitude, and west by the meridian 122 deg. 16 min. west longitude, having an area of 240 square miles in the state of Oregon, and including Crater Lake, has been reserved and withdrawn from settlement, occupancy, or sale under the laws of the United States, and dedicated and set apart forever as a public land, to be preserved and maintained as a national park, to be known as Crater Lake National Park.

The tract of land is placed under the exclusive control of the Secretary of the Interior, who, among other things, is authorized to establish rules and regulations and to cause, subject to the approval of the Secretary, to be taken for the preservation of the natural objects within said park and also for the protection of the park and the prevention and extinguishment of forest fires.

In the deficiency appropriation act of July 1, 1902, an appropriation of \$2,000 for the protection and improvement of the park and the repair and improvement of roads therein was made. Thereafter W. F. Arant, of Klamath Falls, Or., was appointed superintendent of the reservation, at a compensation of \$900 per annum, and rules and regulations for the government of the park were promulgated. A suitable number of copies hereof were forwarded to the superintendent by his guidance, and for distribution among tourists in the reservation.

The act setting aside these lands for park purposes differed from the act of Congress creating other national parks in that it provided among other things, that the reservation should be "open to the location of mining claims and the working of such claims, but in such a manner as not to interfere with, or prejudicially affect the general purpose for which the reservation was established." The regulations for the government of the park clearly define the conditions under which this privilege is to be exercised.

The superintendent reports that he has established headquarters in the park at a place known as Bridge Creek Springs, about two miles from the crater; that he has selected the principal camps-places in the reservation, and found a large number of camps. No forest fires were found burning in the reservation, and no other property in the park destroyed. He states that in conversation with those camping and traveling through the park he finds there is a strong sentiment among them in preserving the natural picturesqueness of the reservation and all the usual attending activities, and that they are desirous to protect rather than to destroy.

A plan has been approved for the construction of a new road along the base of the Crater Lake Mountain to the rim of the crater, a distance of approximately five miles, and work thereon will be completed as soon as weather conditions permit. The project has also been taken looking to the survey and the marking of the boundaries of the park. Work thereon will be commenced under the supervision of an examiner of surveys of the General Land Office as soon as the surveying season opens next spring, and be vigorously prosecuted thereafter to completion.

An estimate of \$3,000 has been submitted to Congress for the protection and improvement of this reservation during the next fiscal year.
