asibility, and how important that

no taint of disease is left in the blood to be transmitted to the helpless child, entailing the most pitiable suffering, and marking its little body with offensive sores and eruptions, catarrh of the nose and throat, weak eyes, glandular swellings, brittle bones, white swelling and deformity.

How can parents look upon such little sufferers and not reproach themselves for bringing so much misery into the world? If you have any disease lurking in your system, how can you expect well developed. healthy children? Cleanse your own blood and build up your health, and you have not only enlarged your capacity for the enjoyment of the pleasures of life, but have discharged a duty all parents owe to posterity, and made mankind healthier and happier.

There is no remedy that so surely reaches deep-seated, stubborn blood troubles as S. S. S. It searches out even hereditary poisons, and removes every taint from the blood and builds up the general health. If weaklings are growing up around you, right the wrong by putting them on a course of S. S. S. at once. It is a purely vegetable medicine, harmless in its effects, and can be taken both old and young without fear of any bad results.
