

# SCROFULA

I beseech to my children Scrofula with all its attendant horrors, humiliation and suffering. This is a strange legacy to leave to posterity; a heavy burden to place upon the shoulders of the young.

This treacherous disease dwarfs the body and hinders the growth and development of the faculties, and the child born of blood poison, or scrofula-tainted parentage, is poorly equipped for life's duties.

Scrofula is a disease with numerous and varied symptoms: enlarged glands or tumors about the neck and armpits, catarrh of the head, weak eyes and dreadful skin eruptions upon different parts of the body show the presence of tubercular or scrofulous matter in the blood. This dangerous and stealthy disease entrenches itself securely in the system and attacks the bones and tissues, destroys the red corpuscles of the blood, resulting in white swelling, a pallid, waxy appearance of the skin, loss of strength and a gradual wasting away of the body.

S. S. S. combines both purifying and tonic properties, and is guaranteed entirely vegetable, making it the ideal remedy in all scrofulous affections. It purifies the deteriorated blood, makes it rich and strong and a complete and permanent cure is soon effected. S. S. S. improves the digestion and assimilation of food, restores the lost properties to the blood and quickens the circulation, bringing a healthy color to the skin and vigor to the weak and emaciated body.

Write us about your case and our physicians will cheerfully advise and help you in every possible way to regain your health. Book on blood and skin diseases free.

THE SWIFT SPECIFIC CO., Atlanta, Ga.

## Bright's Disease.

The largest sum ever paid for a prescription changed hands in San Francisco Aug. 30, 1901. The transfer involved in coin and stock \$12,500 and was paid by a party of business men for a specific for Bright's Disease and Diabetes intractable diseases.

They commenced the serious investigation of the specific Nov. 10, 1901. They interviewed scores of the cured and tried to get the merits by putting over three dozen cases on the treatment and watching them. They also got physicians to name chronic, incurable cases, and administered it with the physician or judges. Up to Aug. 28 eighty-seven per cent of the test cases were either well or progressing favorably.

There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceeds of the investigating committee and the clinical reports of the test cases were published and will be mailed free application. Address JOHN J. FULTON, CO.

## Central Point Notes.

Mrs. Briscoe of Trail was trading here on Saturday.

Marion Shields spent a day at Ashland last week.

Miss Edie Roundtree of Jacksonville visited friends here last week.

Several of our citizens attended the Carnival at Grants Pass last week.

Harry Riddle and wife of Grants Pass visited relatives here this week.

A party from Hornbrook, Cal., will open the Kearney Hotel here this week.

Wm. Carey, one of Gold Hill's prominent business men, spent Sunday in town.

Miss Mary Jacobs, who has been spending several weeks at Coles, returned home Friday.

Mrs. Lulu Chausse of Ashland attended the funeral of little Amy Leever last Wednesday.

Mrs. A. L. Harvey of Gold Hill spent a day here last week, visiting old friends.

Mr. and Mrs. W. Scott visited their daughter, Mrs. Day, at Grants Pass last week.

C. H. Ercanback of Santa Barbara, Cal., arrived here Sunday evening for a visit with relatives.

Mrs. W. F. Griere of Prospect is visiting her sister-in-law, Mrs. Thomas Herriott, this week.

Wm. Nichols left with Mr. Martin's sheep for the summer range on upper Rogue river, Tuesday.

Mrs. Palmer and daughter, mother and sister of Mrs. J. B. Holme, arrived here from Chester, Ill., last week to spend the summer.

J. L. Downing, undertaker of Ashland, came down Tuesday to conduct the funeral of little Lulu Leever.

Van Vleet & Doran, contractors, will erect a fine dwelling near Eagle Point, for Harry Carlton, next month.

John B. Cook of Eagle Point left for Siskiyou county, Cal., Sunday, to canvass for a Chicago book company.

Mr. and Mrs. Marion Hartley of Griffin creek spent Sunday with Mrs. Hartley's parents, Mr. and Mrs. J. S. March of this place.

The ice cream social given Saturday at the G. A. R. hall netted something over \$30, which will be used to purchase an organ for the hall.

F. M. Adams of Table Rock precinct, who has been dangerously ill with rheumatism of the heart, is much improved at this writing, and are pleased to say.

John Grievie is employed in building a small barn for Mr. Evans.

M. A. Houston, ex-commissioner, was in our city a few days ago.

Elder Jones preached last Sunday morning and evening in the brick hall.

Wm. Grievie, ex-deputy assessor, of upper Rogue river, was in town a few days ago.

A sister of Mrs. J. M. Gibson and her daughter arrived here last week from Ohio.

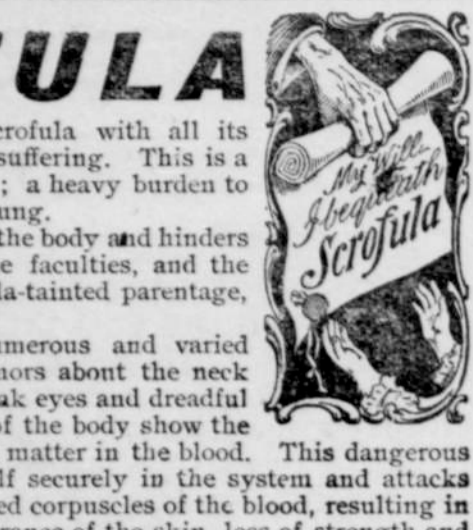

This section of the valley is needing rain badly. Corn looks well and a rain now would make a good crop.

Alfa's hay is ten dollars per ton delivered in town. Milk cows will be likely to take a fall, in consequence.

Frank Amy and his wife went to Rock Point Sunday morning on their wheels, to visit with Wm. Downing and wife.

John Watkins, postmaster Florey and others of Eagle Point attended the G. A. R. meeting held here last Saturday.

The Town Trustees granted G. B. Ross a liquor license for six months, last Saturday. His first position was, he led the remonstrance having the most voters.

## CURRENT COMMENT.

THAT Brooklyn preacher who declares he would be proud to make up Booker Washington's bed should invite that colored gentleman to stay with him and prove that he is suffering from a lack of good sense rather than from hypocritical cant.

APPARENTLY Balfour, Chamberlain and the English aristocracy are tired of having to come to America to invest in steel the trust and similar monopolies, so they are asking for a protective tariff at home. They have been unmercifully turned down, however. The English are firm believers in free trade.

THE total gold product of the world, from the discovery of America by Columbus to the year 1900, is, according to the United States mint, in round numbers, nine thousand eight hundred and eleven million dollars. Pure gold of this value would occupy space equal to 27,000 cubic feet, or a solid 30-foot cube, very nearly, which would weigh about 16,272 tons.

Rushville, Ind. Messrs ELY BROS.—I have been a great sufferer from catarrh and hay fever and many things, but found no permanent relief until I found it in Ely's Cream Balm about eight years ago, and we have been fast friends ever since. (Rev.) R. M. BENTLEY. Messrs ELY BROS.—Find enclosed 50 cents, for which please send me your Cream Balm. I find your remedy the quickest and most permanent cure for cold in the head, catarrh, etc. Yours truly, W. J. HELL, Postoffice, Gen. Mgr. Arizona Canning, Mining Co.

The grand cabin of the Native Daughters of Oregon closed its annual session, held in Portland last week, after electing the following officers: President, Mrs. Julia Gault of McMinnville; first vice-president, Mrs. Christenson of Portland; second vice-president, Miss Flossie Shambrook of Roseburg; secretary, Mrs. Mary Humphreys of Hillsboro; treasurer, Mrs. Edith B. Linton of Eugene; grand trustee, Miss Anna Roe of Forest Grove. The new president is the daughter of Richard and Laura Jane Arthur, pioneers of 1843, who came across the plains with an ox team to Oregon.

WITH the end of the present fiscal year in sight, the land-office official estimate that over \$15,000,000 will have accrued to the benefit of the national irrigation reclamation fund that date, the receipts from the sale of public lands being in round numbers \$7,600,000 from July 1, 1902, to June 30, the balance having been already made available. It is encouraging and most satisfactory news for the West and for those who are interested in seeing the government develop great tracts of desert land through national irrigation. Much can be done with \$15,000,000, especially as the money will all come back again to the government in annual payments from the settlers who receive the benefits, to be immediately used over again in the construction of additional irrigation works.

A MAN will work like a high-gear machine for 16 hours a day with zest and enjoyment when he has some direct interest in the results of his work. The owner of an enterprise finds his pleasure in his work; it is his recreation and vacation, because he reaps a gain proportionate to his efforts. It is perhaps too much to expect a hired man or even the son to take as keen an interest, yet what a treasure such a man would prove if he could be found. There are a few who are faithful, intelligent and industrious; but they never lose sight of the amount of their wage, and while conscientiously striving to earn it they do not often try to do

**Millions of Unsuspected Suns**

Visitors at the Lick Observatory are usually shown the moon, Saturn, Mars or Jupiter, if they be in position. When none of these are to be seen in the earlier part of the night, the telescopes may be turned to a fine nebula like that in Orion, to a brilliant star like Vega or Sirius, to Rigel as a double, or the interesting quadruple in Lyra, or a great star cluster like that in Hercules. Of these only the moon and the planets, our near neighbors, will be visibly magnified by the telescope. The others, infinitely remote in comparison, become only more brilliant, or are fitted to be seen in the earlier part of the night, the telescopes may be turned to a fine nebula like that in Orion, to a brilliant star like Vega or Sirius, to Rigel as a double, or the interesting quadruple in Lyra, or a great star cluster like that in Hercules. Of these only the moon and the planets, our near neighbors, will be visibly magnified by the telescope. The others, infinitely remote in comparison, become only more brilliant, or are fitted to be seen in the earlier part of the night, the telescopes may be turned to a fine nebula like that in Orion, to a brilliant star like Vega or Sirius, to Rigel as a double, or the interesting quadruple in Lyra, or a great star cluster like that in Hercules. The others, infinitely remote in comparison, become only more brilliant, or are fitted to be seen in the earlier part of the night, the telescopes may be turned to a fine nebula like that in Orion, to a brilliant star like Vega or Sirius, to Rigel as a double, or the interesting quadruple in Lyra, or a great star cluster like that in Hercules. Of these only the moon and the planets, our near neighbors, will be visibly magnified by the telescope. The others, infinitely remote in comparison, become only more brilliant, or are fitted to be seen in the earlier part of the night, the telescopes may be turned to a fine nebula like that in Orion, to a brilliant star like Vega or Sirius, to Rigel as a double, or the interesting quadruple in Lyra, or a great star cluster like that in Hercules.
