At length I was induced to try Electric Bitters and the result was marvellous. I improved at once and now I'm completely recovered." For Liver, Kidney, Stomach and Bowel troubles, Electric Bitters is the only medicine. Only 50c. It's guaranteed by City Drug Store. A New Commandery. His Last Hope Realized. (From the Sentinel, Gebo, Mont.) In the first opening of Oklahoma to settlers in 1890 the editor of this paper was among the many seekers after fortune who made the big race one fine day in April. During his traveling about and afterwards his camping upon his claim he encountered much bad water, which, together with the severe heat, gave him a very severe diarrhoea which it seemed almost impossible to check, and along in June the case became so bad he expected to die. One day one of his neighbors brought him one small bottle of Chamberlain's Colic Cholera and Diarrhoea Remedy as a last hope. A big dose was given him while he was rolling about on the ground in great agony, and in a few minutes the dose repeated. The good effect of the medicine was soon noticed and within an hour the patient was taking his first sound sleep for a fortnight. That one day's little bottle worked a complete cure, and he cannot help but feel grateful. The reason for bowel disorders being at hand suggests this item. For sale by City Drug Store.

Attracting Much Attention. The Southern Pacific Co., and the United States in general, is rapidly becoming alive to the fact that Crater Lake and the route thither afford scenery and entertainment that can be found in few regions. Hence steps are being taken to bring those workers in touch with the outside world. One of the preliminaries thereto is the recent visit of Gilbert Hassel, who, as before stated in these columns, was sent out by the S. P. Co. to take photographs of the most interesting points for use in literature that it will issue in the near future. He returned this week, and although hampered by deep snow at Crater Lake, took a number of fine views, which will be seen next season. When I was at Malaga, the light-house was out of order, and some Americans had complained officially that their shipping interests were being damaged. No answer was received for two years. Then it was declared that it was the fault of the earthquake which had taken place many years previously. Finally the light was put out altogether because it interfered with the fireworks. When a pair of boots I had ordered did not fit and I complained to the maker, he arrived indignantly to protest. "They fit here," he said, prodding my tender toe, "and they fit there," another prod. "You cannot expect them to fit everywhere all at once."—Blackwood's Magazine. The Discovery of Felt. Felt is a union of animal hair with wool in such a manner as to produce a firm, compact substance. Its discovery was of so much importance that it seemed necessary to attribute it to divine agency, and hence we have a tradition of saintly origin. When St. Clement was fleeing from his persecutors his feet became blistered, and in order to abate the pain he placed wool between his sandals and the soles of his feet. On continuing his journey the wool, by the perspiration, motion and pressure of his feet, became a firmly compact substance, which was afterward denominated felt. Swelled the Conscience Fund. The legislator took up his hat to leave the statehouse, it comes in Conscience some years ago. Tucked under the sweatband was a roll of greenbacks. The legislator counted the bills. "Hi! Five hundred dollars," he said, and put the money into his pocket. Later in the day he encountered a man with a shift of place of the eye who asked him, "Did you, ah, that is, b'm, did you find anything in your hat?" "Yes, I found something in my hat," "Well, it was a mistake," "It looked like one." "See here, that roll was meant for another hat, see?" "I see." "As it's a mistake, I suppose you are willing to rectify it?" "Not I," said the legislator. "I'm going to send that money to the conscience fund. Good morning." Brahmins and Leprosy. Mr. Jonathan Hutchinson, who believes that leprosy is caused by eating imperfectly cured fish, is not disturbed by the argument that leprosy prevails among the vegetarians of India. He does not believe that the Brahmins really abstain from fish, but accepts the Hindoo proverb that "where there are no eyes there is no caste."

HORSES AND HORSEMEN. All Providence's events—stakes and purses—will be three in five. It is rumored that the Hartford Futurity will be raised in value to \$15,000. Charles Dickson is to star next season in "The Spellbinder," a new comedy dealing with politics. Francesca da Rimini will be one of the characters in London's "Dante," a forthcoming Irving production. Eleonora Duse's next appearance will be in Italy, as she has given up her projected engagement in Germany. William Gillette will be in London about Easter time preparing for his production of "Hamlet" in England. Count Hochberg, who has been in-tenant of the royal theaters in Berlin since 1886, retires from his office at the end of the present year. E. H. Sothern may appear later on in a romantic poetical play by Percy Mackaye, the son of the late Steele Mackaye, founded on the poem of the "Canterbury Pilgrims." CONSTIPATED BOWELS. To have good health the body should be kept in a laxative condition, and the bowels moved at least once a day, so that all poisonous wastes are eliminated. A Massachusetts farmer drives a team of cows. A gust of wind blew a Washington woman's watch off her pin and out of sight. A Newark (N. J.) man was stricken dumb by fright when arrested for theft. Charles F. Schuetz of Laporte, Ind. died at the age of forty-seven of senile debility. A New York woman married a burglar to reform him and then became his accomplice. A fourteen-year-old boy in Chilton Wis. knows by heart the definition of every word from "a" to "z" in Webster's Dictionary. A Box of Coins Unearthed. A box of coins supposed to have been buried by the Tories during the revolutionary period was recently unearthed by laborers working on one of the eastern railroads, but as the coins were about two centuries old they would probably have no more value to-day than many of the remedies compounded for stomach, liver and bowel disorders. It is therefore necessary, if you want to recover your health, to be sure in selecting your medicine that it will restore the appetite, purify the blood, and cure headache, indigestion, dyspepsia, constipation or liver and kidney troubles. You will make no mistake if you try Hostetter's Stomach Bitters, because it will positively cure these diseases. Hundreds of people have voluntarily testified to this fact during the past fifty years. BEST CEREAL COFFEE. Boil from 5 to 10 minutes only. ALL GROCERS.

LIGHTED BY A FISH. This Water Specie Is Also the Indiana Calendar. Alfred Yngve of Castle Valley has in his library a package, tied with red silk, that resembles a bundle of smoked herring. In a visitor's presence the other evening he took one of the long, lean, shriveled fish out of this bundle, held a lighted match to its head, and it began to burn with a clear flame, like a candle. He used it as a candle, indeed, in leading his visitor in the dusk through his house, exhibiting his bibelots and treasures. "But this fish—this fish that burns like a candle—what is it, anyway?" the stranger asked. "It is a candlefish, a Thaleichthys pacificus," returned Mr. Yngve. "It is very fat, and the Indians eat it, use it for illuminating purposes and also make a candle out of it. "It is fourteen inches long and as round as a sausage. It looks a little like a smelt. Not till March does it begin to run, and the Indians hail its appearance as a harbinger of warm weather, a sign of the spring's coming. They rejoice then; they celebrate their Easter festival. This is the fish calendar. "It is a first rate candle, as you see. That is because it is so full of oily fat. It can be burned either with or without a wick. Those that I brought home with me have wicks in them. They burn better so. But without wicks they burn pretty well, though then they smoke a little and have a fishy odor. "They are eaten in oil. I tried them once, but it was no go. They were too oleaginous for me."—Philadelphia Record. Duties of "My" Doctor. Such a man as Rockefeller or Morgan is a life study for a physician, and the man who can keep in perfect order a human machine of vast importance in the community is worthy of Schvvalinn compensation. The big insurance companies are willing to employ a physician at \$100,000 a year to keep either of the gentlemen mentioned alive ten years longer. "My" doctor in such a case must know what medicine to prescribe whenever Morgan or Rockefeller sneezes, frowns, swears, limps, groans, growls, thunders, kicks over the waste basket, smokes too many cigars, drinks too much water, eats too heartily of corned beef and cabbage or commits any other little indelicacy that billionaire flesh is heir to. He must be familiar with the slightest symptom and ready with his dose.—New York Press. If The Baby Is Coting Teeth.
