WANTED. Live agents to sell Dr. White's Electric Cream, patented Jan. 1, 1900.

FOURTH OF JULY AT JACKSONVILLE.

A Big Crowd Assembled at the County Seat to See Base Ball and Boxing Contests.

Although Jacksonville did not hold a full-fledged celebration, on the 4th of July, having given two first-class ones consecutively, still a large crowd assembled there Saturday to witness the program of sports which had been prepared.

The base-ball game between Jacksonville and Roseburg nine was a jug-handled affair, the Umpqua ball tossers not being in it at any stage.

GROSS EXTRAVAGANCE.

Over One and One-Half Billions Appropriated.

It Would Take Nearly One Hundred Years to Count the Vast Sum—Expenditures More Than Doubled in Seven Years of Republican Administration.

The people of the United States have become so used to hearing about millions that but few really appreciate what a large sum a million dollars is, and yet to even count it, at the rate of one for every second of time, it would require over 277 hours, or nearly three days of twelve hours each, of continuous mental work.

It is only four years ago, during wartime, that a billion-dollar congress was convened, and the sum was appropriated for all purposes were \$304,862,627, but that was the last year appropriations were made by a Democratic congress.

During the brighter interval the Republican administration has increased the expense of running the government more than \$400,000,000 in seven years.

It is estimated that one-third of this enormous sum, which is beyond the computing of any man during his life, is either wasted or used for purposes for which the taxpayers do not receive any benefit.

THE POPE IS STILL ALIVE.

AGED PONTIFF MAKES A GAL-LANT STRUGGLE AGAINST THE REAPER.

Rome, July 6.—A bulletin issued by the pope's physicians says: Although his holiness passed the night almost without sleep, he is not so uneasy as he was yesterday.

The pope has been benefited by the injection of digitalis and camphor and the condition of his chest is normal. There is a slight cough, with some catarrhal emulsion.

Accumulated symptoms of general depression are appearing. The pope's respiration is more frequent and superficial and his pulse is so weak that sometimes it is imperceptible.

The amelioration in the pope's condition was so unnatural, considering the gravity of his illness, that it was feared that possibly it was the last flickering of the vital flame.

The pope's condition was so unnatural, considering the gravity of his illness, that it was feared that possibly it was the last flickering of the vital flame.

NEUROUS OVER SITUATION IN THE FAR EAST.

London, July 6.—The St. Petersburg correspondent of the Standard telegraphs that official circles there are nervous over the situation in the far east, especially Count Cassini's diplomatic methods.

The Russian government, continues the correspondent, would have looked with equanimity on the presentation of the Kishinev petition, which has nobody, if in return an understanding could have been reached respecting Russia's claims in Manchuria.

ANOTHER WRECK ON NORTH SHORE.

ENGINE PLUNGES OVER AN EMBANKMENT, KILLING THE ENGINEER.

San Rafael, July 6.—Another brave engineer has lost his life on the North Shore railroad. Engineer Frederick Hamilton was ground to death beneath the cab of his engine about a mile south of Pielston.

Upon striking the animal the engine (No. 4) jumped the track and, breaking loose from both the coaches, plunged over the embankment, and fell upon its side. Hamilton stayed at his post and was killed. His fireman, whose name is unknown, jumped and is said to be only slightly injured.

That section of the road runs through a cane country, and it is supposed that a band of cattle broke through the railroad fence and was feeding along the track when the train ran into them.

THE ESSENTIAL THING.

The primary class in Sunday school was listening to a lesson on patience.

The topic had been carefully explained, and as an aid to understanding the teacher had given each pupil a card bearing the picture of a boy fishing.

"Even pleasure," said she, "requires the exercise of patience. See the boy fishing. He must sit and wait and wait. He must be patient."

"Why," said the delighted Pat, "because his spare comes out of his head, don't it?" "Spare Moments."
