Advance in Freight Rates.

Freight rates on the chief commodities shipped from the East will be materially advanced January 18, by a general agreement among all transcontinental lines.

The new rates will affect the Pacific Coast, from Vancouver, B. C., to San Diego, Calif. The increased rates will be made on shipments from New York and common points, from Chicago and common points, from Omaha and Missouri river points and from the St. Louis territory.

In short, all shipments from the Missouri river east to the Atlantic will cost about 10 cents more for each 100 pounds brought to the Pacific coast. The result will be that farm machinery, canned goods, glass and other staple articles will be raised in price to absorb the loss from an increased freight rate.

The railroads assign no special reason for the increase. As one freight man expressed it, "The New York fellows needed the money and thought the West had it." Rates to the east remain unchanged.

The roads that will comply with the new rate agreement are the Northern Pacific, the Great Northern, Union Pacific, Southern Pacific, O. R. & N., and Santa Fe. These control the transcontinental business entirely.

Labeled the Girls.

A good joke was played on the girls recently by the young men of a certain town. The boys had been rather remiss in their attentions, and the girls decided to show their independence. Consequently five of them hired a bar at the theater and made a very charming theater party.

The play was "Wanted, a Husband," and the girls set scenes through it, never dreaming that the enemy had fastened one of the posters, "Wanted, a Husband," round the box so that the audience might read.

The Happier Man.

A north Missouri paper says, "Who is the happier, the man who possesses \$100,000 or the man who has seven daughters?" To which another exchange replies: "The man with the surplus girls, of course. The man with the money is not satisfied and wants more. The man with the seven daughters is satisfied. He has enough."—St. Louis Post-Dispatch.

In the Carnation House.

In the carnation house watering must be done carefully and always on the forenoon of a clear day, if possible, to allow the water to dry up before night. When watering is needed, a thorough one should always be given, enough to wet the bench through, and yet you should not make it so heavy as to wash all the fine particles of manure through the bottom. Sometimes a bench will dry out in spots, and the spots should be watered accordingly. But bear in mind always that nothing is more harmful to plant life than repeated dribblings.—James T. Scott in American Gardening.

RUSSIA MAY BACK DOWN

Special Council Said to Have Resolved That War Must Be Avoided

St. Petersburg, Jan. 18.—The czar's assurance given at the winter palace January 14, on the occasion of the New Year's reception, that he desires and intends to do all in his power to maintain peace in the far east, is regarded by the foreign diplomats as a hostage given for the world, for the preservation of peace, while the guarantee that Russia will recognize the open ports and other concessions in Manchuria will, it is thought, place the end to a rupture on Japan.

Most of the newspapers here join in the peaceful chorus, one paper remarking that it was strange for Russians to give a first hear of the czar's words by way of America.
