

Mining in Josephine.

Brownstons, June 8th, 1862. The election being now over, and supposing you would like a few items concerning the mining interests in our region, I propose to post you somewhat in regard to Altoona.

The Salmon river fever has almost entirely abated here; indeed, it were more coming in from the north now than are leaving for that beautiful region; and as great numbers, no doubt, will soon be returning in search of coal crete diggings, I will state a few of our strikes here.

The miners generally are making from three to four dollars per diem. A number of claims pay considerably more. Riley & Co. make \$6 or \$7 per day to the land; Stettler, \$5 or \$6; Wm. Robinson, \$8; Mulvany & Co., \$8.

In December last, Mr. Hall found a nugget weighing 25 ounces, valued at \$301; in April, Daniel Tierney found one weighing 18 1/2 oz., valued at \$318; A. Baker one worth \$44; Wm. Maher, one worth \$51; Mr. Stettler, \$105.

But our great chunk (which you have reported) was found on the left-hand fork, about a mile above the fork, by Messrs. Collins & Darcy, weighing 192 ounces, or sixteen pounds, and valued at \$2,000.

They found in their ground sluice enough to make up about \$4,000. Their claim has since paid about \$5 per diem.

Had this been found on Salmon, thousands would have gone to the rich diggings. Here it has caused so excellent whatever. I do not think that a dozen men have ever been to see the claim, or prospect around it, although the stream has been worked at, high up.

It is worthy to be noted that the board of official canvassers for Josephine county, presided over by that fine orator G. T. Vining, when they came to the vote of Dr. Vining's precinct, finding that there was a slight want of equality in the returns—as it stood twenty-four to two—proposed to throw it out entirely. A card being taken on the question of rejection, it carried. Three more precincts, all of them giving small majorities, being in the same file, shared the same fate.

Next came the returns from Williamson, with precisely the same inequality. What was to be done now? They that out and the whole vote ticket would be defeated. The scale was turned and it was soon evident that it was your ball that gave you 'em! And what do you suppose these conscientious quakers did? Why, they got over their scruples, reconsidered their vote, and their proxies to enable Dr. Vining's precinct to proceed, and let it all the voters as they came to them. But suppose said informally had only attended to prospects giving Union majorities, how would these fine patriots have acted then? If the facts are correctly stated by our informant, and we can not doubt them, it was the result, and not the principle that governed the extraordinary action of these conscientious (?) men. Here is charity for you! pure, simple, and doubly honorable!! If a want of formality made against the Union vote, it was to be passed to the latter side; if, on the other hand, it effected the result as a second victory, it was to be disregarded. All right. Such men will do to watch a little hereafter.

The Cause.—Owing to the continued severity of last winter and the very early period at which it commenced, but very little fall grain was sown. What little was put in, however, looks fine and promises an abundant yield. But this will not be more than sufficient to bread the people of this valley, much less to supply the dependent markets. Our only dependence, then, is on the volunteer crop. Much of this was badly injured by the floods and frosts of last winter. The season so far has been very favorable; warm and growing showers continuing up to the present, and bidding fair to continue through this month. Notwithstanding these favorable conditions, the volunteer crop will not be an average one. But a very few ears were sown this spring, and the volunteer crop will not amount to anything. There will be no barley raised in the valley this year worth mentioning. And the probability is that lager will advance a little per drink.

POPULAR MEN.—It will be seen by the official vote of this county, published in our last issue, that D. Wm. Douthett received twenty-eight votes for Prosecuting Attorney, P. Dunn received four votes for Assessor, O. Jacobs, three votes for Surveyor, and James Howard one for the same office. Had Mr. Howard and myself known that we were on the track, we possibly might have doubled the vote we received, and although Mr. Myer would have been elected, yet we would have had the satisfaction of "skering" him a little. Well, Mr. Howard, we beat you two to one, and as we feel pretty liberal in view of the fact, come down; you can smoke at our expense. Shouldn't wonder if Mr. Myer would do the thing up generous—don't want to dictate, but would like a few choice "beans"!! How is it with you Mr. Howard?

FRUITS.—The spring has been very backward and generally cold, but so far has been free from severe frosts. As a consequence, fruit trees, although late in putting out, never gave richer promise of an abundant supply of luscious fruit. The first experiment with fruit trees in this county, to a great extent, was a failure. Large orchards were put out at great expense, but were subsequently devoured by grasshoppers. The great majority of farmers were discouraged; a few however persevered and are now enjoying the benefits of thrifty-bearing orchards. Rogue River Valley will soon supply this market with an abundance of the choicest fruits.

LATEST.

The intelligence from the seat of war is significant of the rapid progress of the Union arms. Memphis is reported to have surrendered to Foote's flotilla without firing a gun. A dispatch from New Madrid, dated June 7, announces that the steamer Platte Valley, from Memphis direct, had passed that point-bound for Cairo. It is therefore believed that the Mississippi is open for trade and travel from St. Louis to New Orleans. If Memphis has fallen, Vicksburg can offer no serious resistance to the formidable fleet of war vessels we now have upon the Father of Waters. Foote and Farragut will soon shake hands over the completion of their work. The navy has performed a brilliant service in deciding the campaign in the great valley and restoring freedom to the grand highway between the Lakes and Gulf. The other points of absorbing interest are Richmond and Charleston. The great conflict in front of the rebel Capital is now the battle of Fair Oaks, that being the name of the nearest town to the field—a station on the railroad, five miles from Richmond. That rail road, the Shiloh of General Jo. Johnson's army. The rebel loss is estimated at about seven thousand, in killed, wounded and missing. Johnson was wounded in the groin, and General Gas. W. Smith succeeded him in command. McClellan's loss is estimated at about 7,000. Our loss since landing in the Peninsula must reach about 12,000 in killed wounded and captured. The Army of the Potomac has no compensation for its long inaction in the vicinity of Washington, and crowded the past forty days with glorious victories.

We have a statement, that on the 26th the gunboats ran the gauntlet of Drury's Buff Batteries, seven miles below Richmond, and that no less than sixty vessels of war threatened the rebel Capital. We should not be surprised if Richmond were already at the mercy of their guns. We have the long expected news of a combined military and naval attack on Charleston, where the seeds of rebellion were sown so many years ago, and where this iniquitous war originated. General Hunter and Commodore Dupont, with ample forces, were nearing Charleston on the 20th of May. They had made skillful use of Stone Island, and succeeded in getting within four miles of the city. Colonel George S. Ripley has been appointed Military Governor of Louisiana. The war in New Mexico is virtually at an end—the Texas rebels having retired from the contest. In Texas, it is stated, the Unionists are about to take the field, under the leadership of Sam. Houston. The plan has been quietly matured. Thus far, a hundred and twenty prizes have been captured by our blockading vessels, the aggregate value of which is enormous. The service has been very profitable to officers and crews. It is gratifying to know that the most valuable vessels captured belong to English "neutrals." The British press is gradually realizing the truth that the "Confederacy" is in a moribund condition. No further consolidation is looked to Davis & Co.—San. Union, 7th.

Every Housekeeper experiences how difficult it is to make good bread, and how they take pleasure in calling attention to the fact that, to insure uniformity, neat and nutritious loaves, it is only necessary to use Baking Powder, which, in every respect, exceeds all similar preparations ever offered to the public. See the advertisement in another column.

DEAD AGAIN.—The *Civilian*, of this place, struck with a premonition of coming disaster, perished on the Saturday evening previous to the election. It could not outlive the defeat of the Dixie-Democracy. It made a big effort to die game, and we presume that it succeeded to its entire satisfaction. The probability is, that many of its coadjutors will soon follow suit, and give up the ghost. Dixie-Democrats have been "shelled out" so many times of late, that they formed a fearful dislike to the "shelling out" process.

HEADQUARTERS & WARE.—This enterprising firm are constantly receiving a large supply of Spring and Summer goods, selected with a special reference to the wants of this market. They have on hand an abundant supply of groceries, also a well-assorted stock of culinary and other hardware. Give them a call, for we can assure you that they are not only gentlemen and obliging, but that they sell their goods very cheap.

DIED.—On Applegate Creek, in this county, on Monday, the 24th instant, at 2 o'clock P. M., HENRYETTA, wife of A. J. JENNINGS, aged 23 years. 24. Yreka papers please copy.

THE MEDICAL AND SURGICAL INSTITUTE of Dr. L. J. CASPARY is also secured in a position which places it, as well as its proprietor, far above the assaults of envy and professional malice. In the schools of France, the highest prizes are often awarded to practitioners in this department of Medical Science, and they occupy with others an equally lofty position in the profession. Record is an illustrious example, a shining light among the philosophical stars of his age in Europe, and Dr. Caspary has fully equalled him in this country, as a proof of which, the Philadelphia College of Medicine complimented him with a diploma and the honor of an operation, although qualified as a graduate of the University of Pennsylvania, and late Chief Surgeon of the Hungarian Revolutionary Army, for more extended labors. Dr. L. J. Caspary has lent his earliest attention to the cure of chronic diseases, in which he has become so great an expert that he is now regarded as the leader in his branch of his profession throughout the United States, and his portrait and biography are published as matter of interest to their readers in the most exclusive journals. The Doctor's office are at his Medical and Surgical Institute, on Sacramento st., corner of Leidesdorff, nearly opposite the buildings of the Pacific Mail Steamship Company.

We ask the particular attention of our readers to the own certificates of remarkable cures, in another column of this paper.

Soothing and Bracing.—There is no preparation in existence which has such a soothing effect in cases of nervous excitement as HOSSETTIER'S STOMACH BITTERS. Although the fame of this renowned invigorant rests mainly on its astonishing cures of Dyspepsia, Liver Complaint, and Intestinal Disorders, it is equally efficacious in nervous complaints. Thousands of ladies resort to it as a remedy for hysteria, fluttering of the heart, nervous headache, vertigo, general debility, and all peculiar disturbances and derangements to which, as a sex, they are subject. It cheers and lightens the depressed mental powers, as well as strengthens the body, and its use is never followed by any unpleasant reaction. Sold by all druggists and Dealers everywhere. 20
