

Tue peculiar tains or infetion which we call Schor-tia lurks in the constitu-tions of multitudes of men. It either produces or is produced by an enfeebled, incompetent to sustain the vital forces in their vigorous action, and leaves the sys-

digestion from unhealthy food, impure air, filth and fiithy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of film who says, "I will viel the land to the rod of film who says, "I will viel the land to the says, "I will viel the land to the rod of film who says, "I will viel the land to the says," I will viel the land to the says, "I will viel the land to the says, "I will viel the land to the says," I will viel the land to the says, "I will viel the land to the says, "I will viel the land to the says, "I will viel the land to the says," I will viel the land to the says, "I will viel the land to the says, "I will viel the land to the says," I will viel the land to the says are says to be the rod of film the land to the says are says to be the rod of film the land to the says are says to be the rod of the says are says to the says are says to the says are says to the says are says and the says are says to the says are says to the says are says and the says are says are says are says are says and the says are s eration;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases which it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which supparate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, cruptive and cutaneous affections. These all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh" healthy, you cannot have scrofulous

Ayer's Sarsaparilla

is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly ex-traordinary in their effect upon this class of complaints, is indisputably proven by the great multi-tude of publicly known and remarkable cures it has made of the following diseases: King's Evil or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Bhoum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debtlity, Dropey, Neuralgia, Dyspepsis or Indigestion. Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, inteed the Discases, Female Weaknesses, and, maced me whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Ayra's American Almanac, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable curve which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfect considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of Aven's Sarsaparilla, although it is composed of ingredients, some of which exceed the best of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that not and fester in the blood; purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the viral functions, and thus expels the distempers which lark within the system or burst out on any

we know the public have been deceived by many compounds of Surangarilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has ever been available to them.

In accordance with the doctrines of these men, the polls nine years hence are to be held in a China house; the inspector of election is to be a Chinaman; the judges, a Chinaman and a white man. Marching in regular order to the polls, according to this illustration, are an Irishman, a Negro, a Chinaman, a Digger Indian and an American. From this motley group a white girl solicits alms. A Christian Church, falling into ruins, is used as a Chinese market; a Chinese temple flourishes, and an American schoolhouse is falling to decay. The policemen at that time are to be Negroes and Chinamen.
