FUN AT HERLINGS. -There will be great time at Herlings on the 13th inst. Lewy is to give a ball on that evening and during the day he is to wheel our Republican triend Blatt from Jacksonville to Poorman's Creek, a distance of two miles, on a wheelbarrow. Had Seymour been elected Blatt was represented by the same kindly office for REDDING & CO. Research & Box. to peform the same kindly office for Herling. It is rather a rough road over the mountain, and we are uncertain which of the two is entitled to sympathy, but as Blatt has stipulated for a thy, but as Blatt has stipulated for a small keg of lager and a couple of soft pillows in the barrow, he seems to have a slight advantage.

AMERICAN

WALTHAM WATCHES.

PROOF OF THEIR SUPERIORITY. Pennsylvania Railroad Co.

OFFICE OF THE GEN. SUPERISTENDENT, ALTONA, PA., Dec. 15, 1867. GENTLEMEN: The watches manufactured by you have been in use on this Railroad for several years by our engine-men, to whom we furnish watches as part of our equipment. There are now some THREE HUNDRED OF THEE CARRIED on our Line, and we consider them GOOD AND RELIABLE TIMEKEEPERS. Indeed, I have great satisfaction in saying YOUR WATCHES GIVE US LESS TROUBLE, and have worn and do wear much longer without repairs than any watches we have ever had in use on this road. As you are aware we formerly trusted to those of English manufacture, of acknowledged good reputation, but as a class they never kept time as correctly, nor have they done as good service as yours.

In these statements I am sustained by my predecessor, Mr. Lewis, whose experience ex-

tended over a series of years. EDWARD WILLIAMS, Gen. Superintend-

ent, American Watch Company, Waltham, N. Y. CENTRAL RAILROAD. LOCOMOTIVE DEP'T., WESTERN DIVISION. | HOCHESTER, Dec. 24, 1868.

GENTLEMEN : I have no hesitation in saying that I believe that the great majority of locomotive engineers have found by experience that WALTHAM WATCHES are the most satisfactory of any for their uses. They run with the greatest accuracy and stendiness, notwithstanding the rough riding of an engine, and, as I have never known one to wear out, they must be durable. I hope to see the time when railway companies will generally adopt your watches, and furnish them to all engineers and conductors. In my opinion it would greatly tend to promote regularity and enfety. Yours respect-

CHARLES WILSON, G. Chief Ragineer, Brotherhood of Locomotive Engineers. American Watch Company, Waltham.
