MANHOOD .- IN THE YOUNG and rising generation, the vegetative powers of life are strong, but in a few years how often the pallid bue, the lack-lustre eye. and emaciated form, and the impossibility of application to mental effort, show its baneful influence. It soon becomes evident to the ob server that some depressing influence is checking the development of the body. Consumption is talked of, and perhaps the youth is removed from school and sent into the country. This is one of the worst movements. Removed from ordinary diversions of the everchanging scenes of the city, the powers of the body too much enfeebled to give zest to healthful and rural exercise, thoughts are turned inwards upon themselves.

If the patient be a female, the approach of the menses is looked for with anxiety, as the first symptom in which Nature is to show her saving power in diffusing the circulation and visiting the check with the bloom of health. Alas! increase of appetite has grown by what it fed on ; the energies of the system are prostrated, and the whole economy is deranged The beautiful and wonderful period in which body and mained undergo so fascinating a change from child to woman, is looked for in vain ; the parent's heart bleeds in anxiety, and fancies the grave but waiting for its victim. HELMBOLD'S EXTRACT BUCHU, for Wenk-

ness arising from excesses or early indiscretion, attended with the fellowing symptoms : Indisposition to Exertion, Loss of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerver. Trembling, Dreadful Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Langour, Universal Lassitude of the Muscular System, Often Enormous Appetite with Dyspeptic Symptoms, Hot Hands, Flushing of the Budy, Dryness of the Skin, Pallid Countenance and Eruptions on the Pace, Pain in the Back. Heaviness of the Eyelids, Frequently Black Spots Flying before the Eyes, with Temperary Suffusion and Loss of Sight, Want of Attention, Great Mobility. Restlessness, with Horror of Society. Nothing is more desirable to such patients thun Solitude and nothing they more dread, for Fear of Themselves; no Repose of Manner, no Euroestness, no Speculation, but a hurried Transition from one question to another.

These symptoms, if allowed to go on-which this Medicine invariably removes - some follow Loss of Power, Fatulty, and Epileptic Fits, in one of which the patient may expire.

During the Superintendence of Dr. Wilson at the Bloomingdale Asylum, this said result occurred to two patient; reason had for a time ieft them, and both died of epilepsy. They were of both sexes, and about twenty years of

Who can say that these excesses are not frequently followed by those direful diseases Insanity and Consumption? Two bottles only of the package of your valuable Buchu presented to the Institture have been used by the children, and with perfect success. In the case of our little Lieutenant A. J., his pride is no longer mortified, and he is free from the daily morning anathemas of the chambermaid who has charge of his bedding. I feel that a knowledge of the result of our use of your Buchu with the children under our charge may save many a Superintendent and Matron of Boarding Schools and Asylums a great amount of approvance; and many a poor child suffering more from weakness than from babit, may be spared punishment, that is (not knowing it as a weakness instead of a bad habit) most un-justly inflicted upon them.
