

Chewed up Pritty Small.

The Herald makes the startling announcement that it will hereafter date the news from Victoria, published in its columns, as coming from Washington Territory. That paper holds that in claiming San Juan island the British have violated the boundary treaty, and the old 54-40 dispute is revived.

In the impressive language of the celebrated Jefferson Brick, here, certainly, is "a spectacle calculated to make the British lion put his tail between his legs and howl with anguish."

This resolve to date the news from Victoria as coming from Washington Territory is equivalent—in the language of the immortal Pogram—to "throwing down the gage of England and asserting our internal resources for making war on the universal air."

The greatest of poets somewhere says—

It more wins the blood To rouse the lion than to start the hare. Hence no doubt the resolve of our neighbor to maintain that Victoria is in Washington Territory, and his determination "to recognize no other status."

A SKETCH OF BONNER.—Hans Patrick LeConner gives the following brief biographical sketch of Robert Bonner: "Robert Decker—King of New York Ledger and editor of the Turt. He has a circulation of 2:15, and can trot his mile inside of half a million of subscribers, on a ten cylinder track."

PATRONIZING.—The Chicago Tribune smiles at the efforts of the San Francisco merchants to control the trade of the great basin, and thus refers to the metropolis of the Pacific: "Cincinnati, St. Louis, Milwaukee, and a host of smaller places, have long been seeking to divert business from Chicago to themselves; and now San Francisco steps into the ring and talks about competing with us for the trade of Colorado."

MONKEY ROOTS.—The following remarks of a Massachusetts paper about young men standing on hotel corners and street corners, of course have no parallel here: "Six young gentlemen standing at the corner of the street; six pair of hands in their pants pockets; six mouths squirting tobacco juice in every direction; six pair of eyes looking impudently at every woman and girl passing by; and six tongues surpassing each other in indecent remarks."

To be a woman of fashion is one of the easiest things in the world. A late writer thus describes it: "Buy everything you don't want, and pay for nothing you get; smile on all mankind but your husband; be happy everywhere but at home."

MANHOOD IN THE YOUNG and rising generation, the vegetable powers of life are weak, and in a few years how often the pallid hue, the lack-lustre eye, and emaciated form, and the impossibility of application to mental effort, show its baneful influence.

If the patient be a female, the approach of the menses is looked for with anxiety, as the first symptom in which Nature is to show her saving power in diffusing the circulation and visiting the cheek with the bloom of health.

These symptoms, if allowed to go on—which this medicine invariably removes—soon follow Loss of Power, Patency, and Epileptic Fits, in one of which the patient may expire.

Who can say that these diseases are not frequently followed by those direful diseases Insanity and Consumption? The records of the Insane Asylums, and the melancholy deaths by Consumption, bear ample witness to the truth of these assertions.

With woeful measures was Despair's low sullen sounds their grief beguiled. Whilst we regret the existence of the above diseases and symptoms, we are prepared to offer an invaluable gift of chemistry or the removal of the consequences: HELMOLD'S HIGHLY CONCENTRATED FLUID EXTRACT OF BUCHU.

RECOMMENDATIONS.—GREAT SALT LAKE CITY, UTAH, Jan. 28, 1868. Mr. H. T. HELMOLD: Your communication requesting me to write for advertising was duly received, but from a prejudice I had formed against advertising "cures for secret diseases," it was left unanswered.

NOTICE.

Many years ago, the writer of these lines and an invalid physician, while visiting the Island of St. Croix for their health, experienced and witnessed many surprising and beneficial effects of the Balm there produced upon many of the invalids who were (the ourselves) seeking health; and, upon inquiry and investigation, obtained a full history of its medicinal virtues. He was delighted and surprised, and after his own recovery, which soon occurred, determined, if possible, to procure the sole right to manufacture and sell it in the United States.

The result of his labors was a glorious success for himself and suffering humanity; for the celebrated PLANTATION BITTERS was thus made known to the world. PLANTATION BITTERS being an article of real merit, founded upon new principles, and relying wholly upon the vegetable world for its medicinal effects, worked a rapid revolution in the history of medicine, and became a household word all over the civilized world. The celebrated S. T.—1860—X was a tall man of health, and the demand for the PLANTATION BITTERS soon far exceeded the abilities of the proprietors to supply.

Notwithstanding the large importation of St. Croix Balm, made expressly for the exportation of these Bitters, the quantity was inadequate. It therefore became necessary that arrangements upon an extensive scale should at once be made, and an agent was dispatched to St. Thomas for that purpose. He was fortunate in coming and leading several plantations on some of the largest and most productive estates on the island. Houses, wells and presses were erected as if by magic, which entirely satisfied the natives. The services of experienced men and natives of the island were procured, and very soon the proprietors of the PLANTATION BITTERS were in a position to supply their laboratory with all the perfectly pure St. Croix Balm needed in manufacturing the GREAT DYSPEPTIC TONIC AND INVIGORATOR. The above represents the natives engaged in the sugar-cane and otherwise preparing it for the stills and presses.

As an antidote to Fever and Ague, Intermittent and Malarious Fevers, Dyspepsia, and other kindred diseases, the use of the PLANTATION BITTERS is unsurpassed in the history of the world. Over five million bottles are disposed of annually. They are adapted to all ages, young male and female. They are agreeable in taste, and always produce an immediate beneficial result.
