A Balloon in a Maine Wilderness

gives the following amusing account of an adventure in the northern wilds of Maine: I had bat an unusually long airvoyage from Bangor, with several companions, and was passing over aimost an unbroken wilderness of forest and lake looking in vain for a landingplace. Night was coming or, and the question where to land became a serious one. No sound of civilization not a gan, or an ax, nothing but primitive sounds of nature. "Here is an opening," cried one passenger, "why not land here?" No! boys, have a little patience; we can do much better by running down to the coast in the counter current above us. Darkness had come on, but see- "A light! a light!" This was the exclamation of one who a moment before though he was doomed to starve in the wilderness. Sure enough, there was a light; but it was a great way off, and might not be in our course; yet gradually we opproached it. At one time it seems to be off to the right, and then away to the left; but nearer it comes till it is seen streaming from a window beneath us. There is a dark, open space cleared field, among the stumps and the special edification of Democrats, habited spot within 20 miles, near a tavored the introduction of Chinese in people who run the mill lived near by, special legislative acts to bring about ground, it possible, before letting the licans, we publish the preamble and gas out, we remained in the car, and taking up my speaking trumpet I hallooed, but the unearthly sound was ad ding terror to the already frightened inhabitants. pers, and these are followed by editorial comments. A correspondent of the Gazzetta d' Italia now writes, and asserts that there is a nun at this moment in the Carmelite Couvent of Bologoa whose condition may perhaps be similar to that of Barbary Ubryk, and he thefelore calls upon the authorities to investigate it. Some twenty years Mr. Samuel A. King, the Æronaut, ago, he says, two young ladies of good family were placed in this convent against their will, for a love affair which their parents disapproved. They escaped from the building, but were detected and brought back again. One expressed repentance for the offence she had committed, and gave so many proofs of contrition that she altimately became abbess of the convent. The other could not overcome her repugnance to a conventual life, for a long time retusted food, and acted with such violence that the nuns declared her insane, and placed her in an isolated part of the establishment. where only the doctor occasionally visited her. There, according to the writer of the letter, she still is, and the persons who live near the convent hear her wild eries. The Nazione, which reproduces this communication, thinks that no one will deny its importance, and hopes that the authorities will take it into serious consideration. -London Sunday Times, Aug. 15.
