THE LIGHTNING CALCULATOR.-We were edified as well as happily amused stitutions. on last Saturday evening, by Mr. Cromer, one of the authors of Haywarth Cromer's Lighning Calculator, who storped over night at this place and delivered a short but novel and interesting little speech. His apparent object in to introduce a better and more rapid system of mathematics, or a faster way of calculating numbers than we have ever been taught heretofore. We think the system that he is trying to inaugurate, a good one, or perhaps we had better say, we are so impressed, for really he went through the exam-ples that were given him, with such swiftness that our thinking propensities were lost in itter amazement. For us to retain enough of what he said, to think about it is about like taking the accurate length of a flash of lightning. We hope, however, that our thoughts on the question will come to us after while, and when they do, we will try and investigate the matter. He has our best wishes, and we hope that he may give us another call-another changed his base, and will hereafter be of South American pampas. STAGE ROBBERS CAUGHT.-We are indebted to Mr. Mensor for the following facts: It will be remembered that we published an account last week of the stage robbery near Cottonwood, California. The officers of the law have been after the scamps, and succeeded in finding four of them, a few the mercantile business, and was high daily mail of half a bushel of letters days since, in the mountains. The officers followed them about 100 miles from the stage road, where they overtook and captured them. Two of them were brought in-the other two were left in the mountains, for the best of reasons.

Fossil Remains .- We are indebted to Mr. Brooks for leaving at our office what appears to have been a task belonging to some huge menster of the mastodon species. It was found on Foots creek, some 15 feet under the Overbeck, who is acquainted with the and swallow, without mastication, surface, by a miner; no other remains ingredients of the Liver King and pork, grease, and every conceivable of the mouster being as yet discovered. gives it his approvate TOIA The tusk is now about two feet in eter, and partially petrified. From its general appearance, it has been much larger than it is at present. What larger than it is at present. What fossilist will tell us its history?

FIRED.-We are indebted to Mr. Gray, the teacher of the district school at Phonix, for the following facts concerning the probable cause of the fire: The school commenced on Monday the iness College, at Portland, can be had The school commenced on Monday the iness College, at Portland, can be had on favorable terms by applying at the cracked wheat, corn bread, tomatoes, raw or soft boiled eggs, baked apples, about 7 o'clock, the school house was first discovered to be on fire. The fire when first discovered was raging so that it was impossible to save the house or any of the books. Mr. Gray says that there had been no fire kindled in the house this season; hence it must have been fired intentionally.

The maxim that the voice of the people is the voice of the divinity, may in some cases be open to doubt, but the testimeny of honest and enlightened witnesses extending through a series of years, and all to the same purport, is worthy of credence, admits of no question. Upon such testimony the reputation of Hostetter's Stomach Bitters as an antidote and cure for many ailments is based. During the twenty years that it has been before the world, innumerable preparations intended to compete with it, have gone up like rockets, and come down the extinguished sticks. Meanwhile the progress of that incomparable tonic has been switt and steady-always upward and onward like the engle's flight. Its introduction produced a revolution in therapeutics, and it proved to be one of those salutary revolutions that cannot go backwards. To-day Hostetter's Bitters is one of the most popular remedies in christendom, and com-mands a larger sale than any other medicinal preparation, domestic or imported, on this side of the Atlantic. wishing to purchase would do well to As a cure for dyspepsia, bilious disor-give them a call. Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected prep-HARR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy ap-pearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality and I consider it the BEST Parison

for its intended purposes."
