C. W. SAVAGE, Prop'r. Jacksonville, Oct. 14, 71-tt

LETTER FROM R. F. DOWELL.

LAWRENCE, KANSAS, January 25, 1878. SNOW STORM.

as snow storm has presiled in Kansas for the last four days. We were detained for two days only 30 miles west of this place. The balance of my trip has been very pleasant. honored among the list of early pio-MICHIGAN AND KANSAS.

The third re-union of the Society of Michigan was held in this city last night. By special request I attended

it. There was a fine oration, sweet music, and a merry dance, which was kept up until this morning. W. M. Carleton read an original poem, entitled

THE VISION OF BAUBEESE, Who was one of the chiefs of the Indians of Michigan :

In the years ere Mishigan's verdure was soiled by the settler's smoke, Ere the quick ear of the forest had heard the axe's stroke,

Before the shivering hill-tops the scythe of grain had shorn,
Or even the breast of the valley the blade
the plow had tern;

When up the masts of the forests, with green sails all unfurled. The equirrel safely clambered, as if he did sail the world, And chattered his useless orders all through the

tranquil day, Or stowed, in his hold by the tree-roots, his cargo of nuts away ; And when, from poad and river, the wild geese rising high. Stretched out their ranks and barrowed the wide fields of the sky;

And when, in the blending daylight, repose the

owlet sought,
With eyes that were full of wisdom, and head
that was full of saught; And when the armies of nature began their daily strife, drum-call of the partridge and the crick-et's chirping fife;

ne, with his tribe of red men, the brave a That he and they might prosper, and live and die in peace.

Came with his back to the sunrise, that he repose might find; Fled with the Nineteenth Century still thunder-ing close behind! And once on the bank of the lakelet, that eince hath borne his name, He lay, one dark night, watching his wigwam's

When out in the halls of the forest be heard well known sound,

And knew the dreaded pale-face once more his
haunt had found.

The intruder is a hunter who has lost his way in the forest, and in the bluff, colloquial style of the early settler, asks for food and shelter. "And, as they lay in the fire light, and smoked the pipe of peace. He told to the listening pale-face the vision of

Long years Baubeese has mouldered beneath Western sky.

And near the home he planted, his pale-fac
guest d. th lie;

Long years of calm and tempest have slowly beaten on ; And still Jehovah's mandate forbids our race to

glowing West; And still brave Michigan prospers, and to the And flings about her shoulders her mantle of the lakes,

rest, jewelled hand of empire points to the

And to her Western sister, who entered victory Through the deep blood of conflict, and the She gives a friendly greeting—she sends a word

And holds, as does a mother, her distant child-And you who left her firesides, with spirit brave and true, And on these Western prairies have reared your

Remember, through the future, wherever you may roam,
You'll always meet a welcome, whenever you come home!

I MET A. BERGEN, Formerly an attorney of Jacksonville, Oregon, at Topeka. He looks well, but says he is troubled with chills and fever. He resided in Illinois from the time he left Jacksonville until about tour years ago, when he was appointed Chief Justice of New Mexico, by President Grant, in 1868. He disliked New Mexican half Spanish and half Indian population, and soon resigned the Judgeship. Then he removed to Garnette, about 30 miles south of this city, in this State. He is married and has two boys.

COMPLAINED .- A Rochester Dutch-COMPLAINED.—A Rochester Dutchman complained to the Mayor that if the boys didn't stop swimming in the river where his girls could see them, he would make trouble. "Ah! Mr. Schermerhorn," replied the Mayor, "if I remember rightly your house is half a mile from the river." "Yaw, dat is so; but den, you see, my gals dey got a spy-glass!"

LETTER FROM JESSE APPLEGATE

The subjoined letter will be peru with interest as much on account of its authorship as because of the interesting information it communicates. To the few who may not know the writer we will say that there is no name more

neers of Oregon than that of Jesse Applegate, the Sage of Youcalla. He

writes as follows: EDITORS BULLETIN: The word "Pedregal," like the word "Canon," has been introduced into our language from the Spanish, as designating a feature of the topography more clearly and tersely than any word or phrase in our language. As by the word canon the idea of a ravine between walls of rock is immediately conveyed to the mind; so, by the word pedregol, we understand an irregular volcanic surface of basalt, trachyte, etc., more or less broken into upheavals from below, and cracked and fissured in the process of cooling. I just saw the term in Lieutenant Ripley's history of the Mexican war; it has since been everywhere adopted by the Corps of Engineers, and occurs frequently in the Ex-plorations for a Pacific railroad, or-

War in 1855. The stronghold of the Modoc Indians is a pedregal of the most extensive and elaborate description; it occupies, with but few intervals, nearly 100 square

dered by Jefferson Davis, Secretary of

If you can, imagine a smooth, solid sheet of granite 20 miles square and 500 feet thick, covering resistless mines of gunpowder scattered at irregular intervals under it; that these mines are exploded simultaneously, rendering the whole field into rectangular masses from the size of a match-box to that of a church, heaping these masses high in some places and leaving deep chasms in others. Following the explosion, the whole thing is placed in one of Vulcan's crucibles and heated up to a point when the whole begins to fuse and run together, and then is suffered

to cool. The roughness of the upper surface remains as the explosion left it, while all below is honey-combed by cracks and crevices caused by the cooling of

the melted rock. An Indian can, from the top of one of these stone pyramids, shoot a man without exposing even so much as an inch square of himself. He can, without due haste, load and shoot a common muzzle-loading rifle ten times before a man can scramble over the rocks and chasms between the slain and the slayer. If at this terrible expense of life a force dislodges him from his cover, he has only to drop into and follow some subterranean passage with which he is familiar, to gain another ambush

JESSE APPLEGATE.

The Ideal Farmer. Ralph Waldo Emerson, in one of his essays, thus portrays the glory of the

"The glory of the farmer is that, in the division of labor, it is his part to create. All the trades rest at last on his primitive anthority. He stands close to nature; he obtains from the earth the bread and the meat. The food which was not he causes to be. The first farmer was the first man, and all historic nobility rest on possession and use of land. Men do not like hard work, but every man has an exceptional respect for tillage, and the teeling that this is the original calling of his race, that he himself is only excused from it by some circumstances which made him delegate for a time to other hands. It he had not some skill which recommended him to the farmer, some product for which the farmer will give him corn, he must himself return into his due place among the planters. And the profession has in all eyes this ancient charm, as standing nearest to God, the First Cause. Then the beauty of nature, the tranquility and inno-cence of the countryman, his independence, and his pleasing arts—the cares of bees, of poultry, of sheep, of cows, the dairy, the care of hay, of fruits, of orchards, and forests, and the reaction of these on the workman in giving him a strength and plain dignity, like the face and manners of nature, all men acknowledge. All men keep the farm in reserve as an asylum, where, in case of mischance, to hide their poverty, or a solitude, if they do not succeed in society. And who knows how many glances of remorse are turned this way from the bankrupts of trade, from mortified pleaders in courts and senates, or from the victims of idleness and pleasure? Poisoned by town life, and town vices, the sufferer resolves: 'Well, my A cubic foot of air weighs only 523 grains, a little more than an ounce; a cubic foot of water weighs one thosesand ounces.

Vices, the sufferer resolves: 'Well, my children, whom I have injured, shall go to the land, to be recruited and cured by that which should have been my nursery, and now shall be their hosesand ounces.

CORRESPONDENCE.

Letter from Coos Bay. Coos Bay, Jan. 27, 1873.

KOTTOR SENTINEL :- Times are rath er lively at this point, owing to the shipment of coal and lumber. About fifteen vessels per month, on an average, clear for San Francisco. The coal fields are quite extensive, the certainty of which time will fully prove. We have three companies at work at present, and one, if not two more will be

in operation the coming Summer. There are three sawmills on the Bay. The one situated at Marshfield has been idle for more than a twelvementh, and

is by far the best of the three. Timber near the streams, suitable for logging purposes, has been culled over to a considerable extent, but at a little distance from the streams are some of the grandest forests of the world, untouched.

The country is filling up with inhabitants, and most of the unoccupied lands will be claimed the coming Summer, I think. So far the Winter has been unusually

mild, with but little frost and no snow. The rains have not been as plentiful as common, and upon the whole we have a beautiful and quite healthy climate. Yours truly,

St. Valentine's Day.

"Valentine's Day" will soon be here, and then a holiday for fun and kindly thoughts. Many a missive will be composed as the studied task of a loyal heart, and bright eyes will moisten and pure hearts throb to receive them .-Many hearts will be made happier, and we hope none heavier, when this day shall come. But this time-honored custom has of late years been much abused. Too many have taken advantage of the day to vent their dislike in sending miserable daubs, or vile caricatures, under the title of "Valentines." To the youths of Jacksonville I would say, not one of you love to receive these abusive or ridiculous missives; therefore, send none. If we would have our feelings respected, we must respect the feelings of others. Let your fun be innocent, and not at the expense of the feelings of any one. Life is short, and all have their sorrows to bear: then let us not add to the burden, but rather strive to make it less. Send your missives laden with love, or a kindly token of esteem, and from whence it will cost ten more lives young hearts will appreciate them. It to dislodge him: and so on ad infinit is well to grasp every opportunity of pain. Young lads and lasses, remember this; and when that day shall come may no drop of bitterness mingle in

VEDY VIRON. your cup of joy.

Sleep on Your Cares. Men of business, believe me, there is now and then a profitable venture in doing nothing at all. In the power to put business aside, and abiding now and then in perfect quiet, things sometimes solve themselves, when we give them the advantage, which refuse to come clear for all our trying. We all know how, simply by taking some per-plexity into the deepest silence, this side death—a good night's sleep—we can do better sometimes than if we sat

up and wrought at a desk all night.
When Matthew Murray, of Leeds wanted to see his way through some sore perplexity in his inventions, and all other effort was of no use, he rested day and night from all noise, and all effort, except the effort an active man has to keep quiet; and then the thing he wanted would steal in and look at him, and light on him, and stay as the birds that used to light on the old her-mits, no more afraid of them than of the trees under which they sat.

And mothers, you may care and toil incessantly for your little ones, never resting a moment in your devotion; and then, because you never do be quiet, but enter into your very closet with a little frock to mend, you shall never be quite able to take the whole sunlight and sum of your motherhood into your heart. You will be so full of care about the bread that perisbes as to miss the bread that cometh down from heaven. No person in the world needs so much now and then to be still and open her soul only to the silence, as an earnest, energetic, whole-hearted mother. This eternal activity is almost sure to run at last into shallows.—R. Colyer, in Independent.

A hunter of trifles has discovered something new on a lady's work-table. He says it is a long thimble, worn to make the finger tapering and shapely.
