Although the unfortunate man is possessed with a large amount of intelligence, yet it seems that he feels unconscious of having committed any crime, for he says he used the money to liquidate some of his liabilities and expected to have been able to refund the money, but the people don't see it in that light, and more especially his bondsmen, who have no sympathy for him. There are ten of them, and they now expect to pay the county the thirty-two hundred dollars, as he has no property, or anything that can be found to pay with.

> How Nor to Do It .- Did you ever see a woman throw a stone at a hen? It is the most ludicrous scene in everyday life. We recently observed the process. The predatory fowl had invaded the precincts of the flower-bed, and was industriously pecking and scratching the nutritious seed or the early worm, blissfully unconscious of impending dauger. The lady now appears upon the scene with a broom. This she drops and picks up a rocky fragment of the Silurian ages, and then makes her first mistake-they all do it -of seizing the projectile with the wrong hand. Then with malice aforethought, the further blunder of swinging her arm perpendicularly, instead of horizontally-thereupon the stone flies into the air, describing an irregular elliptical curve, and strikes the surface of the earth as far from the hen as the thrower stood at the time. At the second attempt the stone narrowly missed the head of the thrower herself, who, seeing that any further attempt of the kind would be suicidal, did what she might have done at first-started after the hen with her old and familiar weapon .- Exchange.

It is said that a little railroad at Bayou Sara, La., runs to Woodville on a very uncertain schedule. A stranger came in the other day and inquired how often the steam car made trips to the country. The party interrogated said "tri-weekly." He was asked what he meant by tri-weekly, and answered,
