WOOD WORKING MACHINERY. IRON WORKING TOOLS. STEAM ENGINES. BERRY & PLACE, PORTLAND, OREGON.

JACKSONVILLE IMPROVEMENTS FOR ONE YEAR. The Presidential excitement being over would it not be well for us to examine into the progress we have made in the year now near its close? The writer took unto himself the pleasant task of inquiring into the various buildings that have been erected and the improvements to others and the probable cost of each.

Commencing at our new Steam Flouring Mill, we have one of the finest structures of the kind on the Pacific coast, substantially built of the best material, under most experienced mechanics, Messrs. Hammond and Wimer. It is three stories in height, with a solid stone foundation, the machinery is of the latest and most improved pattern, is capable of manufacturing the finest quality of flour; there are two runs of burrs in the Mill, one of the proprietors, Mr. Foudray, informed the writer that if needed they can grind into flour all of the surplus wheat that is grown in Rogue River valley, and I believe it. For instance, one day recently they manufactured in one hour 1,100 lbs. of splendid flour. Taking this as a basis, allowing the mill to run night and day, we have a grinding capacity of 150,000 bushels of wheat per annum, which my readers can readily see would manufacture into flour all the surplus wheat our farmers can raise. The proprietors, Foudray & McKenzie, are thorough mill men and have expended a great deal of money in the building of the flouring mill, we understand \$110,000, and I think we speak the sentiment of the people when we say, they deserve our patronage, which it is to be hoped every well wisher of our Town will see they are patronized, they being worthy of it.

In leaving the mill and coming down Third street we see four dwellings recently erected one by Mr. Kane, two by Mr. McMahon, and one by Mr. Lathrop. Mr. Kane occupying his as a residence, Mr. McMahon renting his two at, we are informed, a fair rental. Mr. Lathrop occupying his as a dwelling for himself and family. The four buildings, we learn, cost about \$1,200.

Still following Third street until we come to California street on the corner of Third and California we find the New State Hotel and Saloon, owned and occupied by C. W. Savage, to have been entirely renovated. The part of the building fronting on Third street has been sided and some new windows inserted; on California street a new front and awning has been built. With the repainting and re-shingling we estimate Mr. Savage has fully expended \$800, and we presume Mr. S. will retain his former reputation as a general and whole-soul Benefactor.

Next door to the New State Hotel we find Mr. Howard with his beautiful Bazaar, as he calls it, but really he has worked wonders. One can hardly imagine he could make such a change out of the old butcher and baker shop, but he has done it at a cost, we judge, of \$800, and Howard says he will sell goods cheaper than any for cash. Give him a call; he is not such a bad fellow.

We still walk along California street towards Oregon and find John Miller with his large and improved store, looking really nice for our little Town, he having taken out the partition dividing him from Mr. Howard's old stand, and has fitted up the inside in good shape with shelving, drawers, cases, etc., at a cost we think of 300.

Crossing Oregon street and going towards Mr. Schutz' Brewery, we find James McDaniels nice new residence, artistically built and neatly painted, we presume, at a cost to Mr. McD. of \$600.

Leaving Mr. McDaniels and walking down California street, we pass N. Fisher's residence. Mr. F. having within the year made some additions to his residence and other needed improvements, at a cost, we think, of \$500.

In passing along California street we find C. Coleman's with a new front, which sets off his store building wonderfully. The front was something Mr. C. needed and we presume it must have cost him with other alterations, \$300.

On the same block with Mr. C. we find the fine new brick drug store, lately erected by C. W. Kahler at a cost, we are informed, of \$2,000. We

must admire Mr. Kahler for the pains he has taken in making the drug store such a nice building. It is now occupied by Kahler & Bro., who will dispense to the public all articles in their line, at low rates.

On the adjoining block as we walk eastwardly, we see our new Grand Hotel and Hall, owned by Geo. and Jane Holt, and we hear will be occupied by the Madame in person when we believe all the delicacies of the season will be dispensed to her guests in the latest style and at fair prices. In noticing the Hotel and Hall, it would hardly be right to pass it by without giving a short sketch of the manner in which it was built, Geo. Holt, owner and builder, starting from the bedrock as we call it. Quarrying the stone for the foundation, making the brick, burning the lime, cutting the stone for sills, doors, windows, etc., and then laying each of these in their proper places; finally plastering the building throughout. We think from information furnished, the Hotel when completed will cost \$12,000, and we believe the equal of Mr. Holt for industry and perseverance is not in the State of Oregon. Were we blessed with more like him we would have a different town and valley.

On the same block with the hotel Mr. Cardwell has built a very neat one-story frame building, a portion of the front being occupied by Mrs. I. W. Berry as a millinery store. Mr. Cardwell using the balance as a residence for himself and family. The building complete costing \$1,500.

We are yet on California street and walk East a few blocks, when we come to the nice new church edifice being built by the Presbyterians of Jacksonville for them to worship in; it is quite a model of architectural beauty, and for finish we think has no superior in the State. It is of two stories in height with a beautiful belfry. The bell, we learn, costing in San Francisco \$500, is of fine manufacture with a splendid tone; on a clear morning we think the ringing of the bell can be heard six or seven miles. David Linn, the builder, has done a remarkably good job in the erection of the church, and we must say it is a credit to our town to have such an edifice. We learn when finished the church will cost in the neighborhood of \$8,000.

Across the street and a little further East we find T. G. Reames building an addition to his dwelling; when finished we are informed, will cost \$1,000, contractors Messrs. Smith & Finrock.

Leaving California street we go towards the school house, and find a large and commodious two-story dwelling house recently erected by Robt. Kahler for occupancy by himself and family, at a cost we learn of \$1,500, builder, Geo. Brown.

Passing still North of Mr. Kahler's and walking down the Valley road, we find Prof. Merritt with a nice two-story frame dwelling house, erected within the last month and costing him we should think \$600 when completed, builder Geo. Brown.

We retrace our steps and crossing Jackson creek towards Wm. Bybee's, we meet the ponderous two-story frame rustic dwelling building about being completed for Mr. James R. Neil, ex-District Attorney. Mr. Neil when occupying his new residence will have a beautiful view of our valley and surroundings. The dwelling is certainly a very fine one and shows a spirit of improvement in Mr. Neil. The cost when completed, we believe cannot be less than \$1,500, builder David Linn.

Leaving Mr. Neil we return along Oregon street until we come to our New Town Hall, now in course of erection; when completed it will make a neat and very creditable appearance. It is of brick, one story in height having a frontage of 25 feet on Main street and running back on Oregon street 75 feet, with an "L" in the rear, the building nearly covering the plot of ground owned by the Town, and is divided as follows: Truck room in the rear, adjoining is the calaboose of two cells, solidly constructed. We would rather not be confined therein—that is for any length of time. The front portion will be used by the Trustees for their meetings. The Recorder also having his office there. When finished not including the lot, will cost \$2,500, builder David Linn. Should the finances of the town justify it, at an early date the Trustees will add an additional story for public purposes.

We are on Oregon street and walk South until we meet the Applegate road, when we find the small but neat dwelling house of F. Kaschafer, at a cost to him we hear of \$300.

In summing up the approximate costs of improvements and their number, we have fifteen new buildings with improvements to others, costing in all between forty and fifty thousand dollars, and believe our estimates are not over-drawn; with various charitable and other purposes we have the following: Subsidy to Flouring Mill \$2,500 Contemplated C. C. W. R. 3,000 To Presbyterian Church 2,500 Irish Relief Fund 500 Other Donations 1,000 Total \$9,500

Add this to our regular taxes, State, County, Municipal, Road, Special, School Levy and the Tax to build the Town Hall, 3 1/2 mills, we have taking \$300,000 as a basis to work upon, including donations as above stated, \$20,000 contributed by the people of the town of Jacksonville for the year 1880, with costs of new buildings and improvements, say \$45,000, we have expended \$65,000. We frequently hear it remarked that we are not imbued with the right spirit of progress, but I think we can confidently say of our town's people for the year 1880, as regards material prosperity of the town and a munificent liberality and generosity is unsurpassed. Our superiors are not in the State of Oregon. Jacksonville, Nov 19, 1880.

IT ONLY MAKES US GREATER. Now and then we fall in with those who are ready to throw up their hands and declare outright that Portland is gone up, if Villard & Co. should build a railroad from some point on the Sound to Eastern Washington. When we ask those people how much trade Portland has received from that locality, they answer that they don't know. The object of building these roads is to open up new and developed sections of country, and adding to the general trade. The great drawback to Oregon and Washington, it appears to us, consists in a lack of comprehension as to our magnitude as a country.

Years gone by immigrants came here across the plains. They had their teams, and upon arriving here they traveled by their own conveyance to such localities as they desired to settle in. But now the immigrants are coming overland by railroad, or by ocean steamers, and upon their arrival here, they want to go and hunt up a claim from a car window or from the deck of a steamboat, and because they don't find land vacant alongside these thoroughfares, they think the country is all taken up. Here we are situated in the very doorway of trade, with a sea coast extending from the forty-second degree North latitude, to the forty-ninth parallel—420 miles—reaching eastward about 300 miles; multiply 420 by 300, and we get 126,000 square miles, or 80,640,000 acres. About 270,000 people—old and young, white and black are to be found within this vast area of land. If there was nothing else to offer but this we would stop here; but we know from facts and figures that we have a healthy and agreeable climate, that our lands produce the greatest yield, that we have the finest range and timber lands, the grandest water powers, great fisheries, gold as well as coal, cinnabar and nickel. What more can be offered? Come and claim these lands, either prairie or timber. Utilize this water power and start factories. Spread your nets and haul in the huge salmon that command a good price in all countries. Go upon a thousand hills where grows the most luxuriant grasses that God has yet caused to spring up, and produce the fattest bullock, or the horse that makes men's souls glad, or the sheep that produces material out of which garments may be made fine enough to dress angels from above with becoming grace. There is no country on the face of the earth, owned and controlled by civilization that equals Oregon and Washington, everything being considered.—[Resources of Oregon and Washington.]

In the Presidential election Chicago cast 82,326 votes, Cincinnati 53,295, and St. Louis 47,545. The vote of Philadelphia reached the prodigious total of 173,465, being only 22,000 less than the vote of New York.

APPLEGATE ITEMS. Elder Brown has been holding a big meeting on Missouri Flat. There were thirty-one bear killed in Deer creek valley in six weeks. Health is quite good, not one case being on the docket, except an ague or two. Miners are about ready for work, but I do not think that there will be much rain before January. Stock of all kind, looks sleek and fat, especially sheep that were brought in from their summer range. The matrimonial market was much depressed by politics, and only one claim in which there is any prospect of a sale. Mr. Cecil has rented McConnel's farm and has now moved there. His sheep are the finest I have seen in the country. Three weeks ago, Kasper, son of J. Kubli, was severely hurt by a runaway team, and is still bed fast, but is getting better. Mr. Custer is putting up a fine new house. He also built two new barns. Considerable improvement has been done this Fall in building and clearing. The apple crop is immense. Hundreds of bushels still on the ground and but few sales made. The pear crop was unusually large, but peaches were scarce. The weather has been all that could be desired for doing the Fall work, except that no plowing can be done, yet several farmers have a good deal sown on summer follow and corn ground. Onions were very fine and potatoes still better, yet the crop is much lighter than last year, still some ground did better than usual, for off of 42 rods there were dug 104 bushels of large potatoes, the largest weighing 3 1/2 lbs. We also, have turnips that weigh 5 lbs. One man had twenty-five two-horse loads of squashes from about 1 1/2 acres; but when it comes down to large squashes your correspondent takes the prize again, for I have four that weigh 37 1/2 lbs., one of them weighing 104 lbs. Cabbage is fine and abundant, as is most everything else in the vegetable line, and could we have a market, Applegate could produce two times as much as now. We also had a fine and large crop of wheat, oats, barley and corn. The political campaign was very quiet, but many incidents occurred that were amusing and instructive, but as we had a surfeit of trash through the papers I will say nothing, except that political discussions, are becoming alarmingly free. Applegate, Nov. 9, 1880.

Mr. J. M. Davis general agent of the Chicago and Northwestern railway for the Pacific coast, is now on business to Oregon. He says the company he represents will have its road completed as far west as the Black Hills within 90 days, and ultimately will make a Pacific coast connection. What is of still more importance to the Pacific Northwest, he reports that the Union Pacific is now rapidly pushing from Ogden to Boise. A third rail is being laid on the Utah Northern from Ogden to Brigham, 25 miles, so as to make a road of the standard gauge, which is to be extended at once to Snake river and Boise, and connect as soon as possible with the Columbia river. Twenty-eight hundred men are now reported at work west of Brigham, and it is the intention to have the road built to Boise within a year. And within another year it is the intention to make the connection with the Oregon railway company. Mr. Davies says he has no doubt this will all be accomplished.

The attack on the Chinese in Denver by a mob on the eve of the Presidential election was almost overlooked in the heat of the contest. Judge Davis however, has not forgotten the matter, and puts the blame where it deserves to rest—on the shoulders of the men guilty of the perpetration of the Morey forgery. There can be no question that the riot was instigated by Democratic ruffians, who were in turn spurned on by the infamous forgery for which Barnum and his gang are responsible.

What is of still more importance to the Pacific Northwest, he reports that the Union Pacific is now rapidly pushing from Ogden to Boise. A third rail is being laid on the Utah Northern from Ogden to Brigham, 25 miles, so as to make a road of the standard gauge, which is to be extended at once to Snake river and Boise, and connect as soon as possible with the Columbia river. Twenty-eight hundred men are now reported at work west of Brigham, and it is the intention to have the road built to Boise within a year. And within another year it is the intention to make the connection with the Oregon railway company. Mr. Davies says he has no doubt this will all be accomplished.

Mr. J. M. Davis general agent of the Chicago and Northwestern railway for the Pacific coast, is now on business to Oregon. He says the company he represents will have its road completed as far west as the Black Hills within 90 days, and ultimately will make a Pacific coast connection.
