ERICSON'S NEW TORPEDO.

A Chicago "Inter-Ocean" special of Nov. 19th, says: The New York Tribune will print to-morrow a full and accurate account of John Ericson's wonderful new torpedo boat. It is the most formidable engine of death known in naval warfare. The inventor of the monitor is one of the most modest and unpretentious mechanics of the age and not likely to exaggerate the merits of his own work. He is entirely satisfied with the results of recent experiments with his torpedo boat and some of the most experienced naval officers in the United States service do not hesitate to pronounce it an unequivocal success. It will be seen that Capt. Ericson has invented three things, a boat a gun and a projectile. The boat is submerged like a Monitor, with all the machinery below an intermediate deck of plate iron, which is strongly ribbed and supports an inclined armor plate. The deck above water has not ports at the side and can split away without the vessel's being disabled. Heavy wood backing gives additional protection to the wheel, and an electric battery and steering gear is ten feet below the water line. Attacking bows on and defying with her armor, the heaviest ordnance, the destroyer is practically invulnerable, and at the same time a most terrible antagonist. Her armament consists of a single breech loader of wrought iron hooped with steel, and a bore of 16 inches. The gun lies seven feet under water and discharges a projectile containing 250 lbs. of dynamite. When the boat with its crew of ten men is within 300 or 400 feet of the enemy the gun is fired by electricity, and the projectile explodes by the concussion. If the first shot fails another follows in a few minutes and the torpedo bombardment proceeds with extraordinary rapidity, no time being wasted in charging the gun. The substitution of gunpowder for compressed air in the operation of charging the gun greatly increases the efficiency of the armament. It may not be too much to say that it leaves the mightiest iron ships of the world completely at her mercy.

Consumers of Yeast Powder will please notice the above improvement of DONNOLLY'S YEAST POWDER by nearly all the Merchants of the Pacific Coast. The Enormous Sales of this Powder in San Francisco prove its intrinsic merit, and the reason is obvious—Donnolly's Yeast Powder has stood the test of 30 years. It never fails to make the most delicious, light and sweet Bread, Biscuit, Cakes, Corn Bread, &c. No housekeeper who ever tried this Powder will do without it. Always ask for Donnolly's Yeast Powder, it never fails to give satisfaction. Strictly Pure Cream Tartar and Eng. Bi-Carb. Soda always on hand at the Lowest Market Prices. D. CALLAGHAN & CO. 119 & 121 Front St., San Francisco.

INCIDENTS OF PACIFIC OCEAN TRAVEL.

Marcus L. Taft who on Sept. 1st, left San Francisco on the four-masted steamer "Oceanic" bound for Japan, writes an interesting letter to the N. Y. "Advocate," in which the following passage occurs: "Besides passing numbers of flying fish and schools of porpoises, and seeing the spouting of a whale, there were two strange events, which did not occur on an Atlantic voyage but are peculiar to the Pacific. One is the dropping of a day from the calendar when the steamer crosses the 180 degrees of longitude. We retired to our berths as usual one Sunday night and awoke the next morning to find out that it was Tuesday. I had often heard of "killing time," but I never knew time to be so effectually killed as that Monday was. We could not find the slightest trace of it. Monday was not Tuesday was. The other incident was the meeting of two ocean steamers where nothing else but a vast expanse of water was to be seen. The imposing "City of Peking" was sighted on the horizon, and the course of the "Oceanic" directed toward it. As soon as it was known that we would soon be able to send letters to America, passengers hurried down to the saloon, and were busy finishing letters begun previously, or hastily writing new ones. Soon the mammoth steamers neared each other, and the engines of the "Oceanic," which had been working incessantly for over two weeks, stopped. A small boat was lowered, in which, besides the sailors, was the purser, carrying letters and papers. With great interest, the people on both steamers watched the row-boat approach the side of the gigantic "City of Peking," where the mail was hauled up, and other mail matters were let down, to be taken to the "Oceanic." From one letter I learned that the Rev. Mr. Strittmatter, wife, and two children were on board. In less than an hour both steamers were proudly steaming away, as though unconscious of the existence of the other.

The crested oratorical jayhawk of the Mississippi valley is flaying Wirt Farris of the St. Louis Bar. When he rises to expound the political issues of the day his mind glows like a brick-kiln in the gloomy night. He plucks the stars from their cerulean setting, snatches the feathers from the American eagle fills the air with poetic melody and aways and swings and surges in his own eloquence like a twittering bluebird on the end of a pendant cherry limb. Mr. Farris is the P. Henry of Missouri.

Dr. Tanner is making arrangements with Dr. B. W. Richardson, of London, to fast there. Dr. Tanner says: "Dr. Richardson has gained considerable reputation on account of the stand he has made against the use of alcohol as a medicine. I have told him I would do the forty days again in London, and he is to issue a challenge to the brewers, distillers and doctors. They can take wine, beer or any spirituous liquors during the fast, and I will see what the result will be."

The S. F. "Chronicle" says the U. S. Senate has but 76 members: Democrats, 42; Republicans, 33; Independent, 1. After March 4, 1881, the Senate will stand: Democrats, 38; Republicans, 37; Independent, 1. The Independent is Mahone of Virginia. Davis (Dem.) of Illinois, it is thought, will resign. If he does, a Republican will take his place and then the Senate will stand: Republicans, 38; Democrat, 37; Independent, 1.

The successful growing of the coffee plant in South Florida seems to be now established beyond question, and the commissioner of agriculture has awarded the premium offered some time since for the first pound of coffee grown in the open air. The agricultural bureau furnishes plants already started to those who wish to give the coffee a trial, and it is thought the Florida planters will enter into its cultivation quite extensively next season.

The Pacific Ocean has a depth of 1,500 fathoms along the entire coast of California, 20 to 70 miles from the shore, and a hundred miles west of San Francisco is 2,500 fathoms deep. About 400 miles east of Honolulu the depth is 3,000 fathoms.

Thank you, General Hampton. The 138 electoral votes you sent us from the "Solid South" were duly received; but as things have turned out you might as well have kept them. They are light weight.—[Albany Evening Journal.

At a printers' festival, lately, the following toast was offered: "Woman! Second only to the press in the dissemination of news." The ladies are as yet undecided whether to regard this as a compliment or otherwise.

DIPHTHERIA AND SCARLET FEVER.

For the benefit of our readers who may have loved ones suffering with that dreaded disease, diphtheria, we publish by request, a remedy for it. Dr. May, of New York, who has successfully treated very many cases of scarlet fever and diphtheria with the newly utilized remedy of sulpho-carbonate of soda as a cure for the above diseases, says: "The use of sulpho-carbonate of soda in diphtheria has become a settled fact by the best physicians of New York, Brooklyn and Philadelphia to be the only certain specific for that dreaded disease, diphtheria, which has taken off so many children in the United States during eight years. In its use it is certain to destroy the parasite fungus in the throat and glands in two hours. Ten grains dissolved in a tumbler half full of cold water, and take from half to a teaspoonful every hour until the parasite is destroyed; then one in two or three hours according to the circumstances of the case. There is no use in physicians fighting against this remedy, for they will have to use it if they have access in the treatment of scarlet fever and diphtheria. It is a specific in both diseases, as they are both zymotic in their nature, and are produced by the parasite in the system. It will prevent both diseases if given before an attack, as well as a remedy. This remedy has been used for diphtheria and scarlet fever for over three years, and if given before gangrene sets in will work wonders in every case. It was discovered in 1871 by an English physician, and has grown into favor as a specific ever since, particularly with children. The trichina parasite of pork as soon as it enters the stomach is absorbed by the blood, then into the muscles of the body. It is not so with the diphtheria parasite: it is generated in the stomach, and when it spreads up the esophagus it produces such a high state of inflammation that gangrene sets in, dissolves the parasite, and carries it all through the blood, which is always fatal. Gangrene always dissolves the parasite, but before that takes place the use of sulpho-carbonate of soda will save every case. I have written these lines by special request of very many citizens and friends who desire it made public for the benefit of all.

The following from the San Francisco "Daily Exchange" is nothing but the truth, and yet we know that not a youth of the country will smoke a single cigarette less because of the truth: "For the benefit of young gentlemen to whom cigarettes are dear, the way which many of them are prepared to submit. The diligent Chinamen have divided the beats of this city among themselves, and at early morning when the spittoons are cleaned out are always on hand. The cigar stumps are carefully gathered by them and sorted. A portion are placed in a tub of water, and in this tub the Chinamen stamp out the juice for the purpose of coloring the papers of the chocolate-dyed cigarette. The other portion is used for the filling. Now, boys, smoke your cigarettes and be happy."

Eugene City proposes to vote a two-mill tax to sustain her public schools. Her people have already paid \$12,000 for a first-class school building, and the old board of directors, in their anxiety to maintain the honor and reputation of the school, left the district last last Spring near \$2000 in debt to teachers for their wages. In order to cover this and meet their obligations, the new board was obliged to use over \$1000 of the public money, that was properly due to the present year to cancel the indebtedness. Hence the necessity of a tax sufficient to place the district on easy financial footing.

Thank you, General Hampton. The 138 electoral votes you sent us from the "Solid South" were duly received; but as things have turned out you might as well have kept them. They are light weight.—[Albany Evening Journal.

At a printers' festival, lately, the following toast was offered: "Woman! Second only to the press in the dissemination of news." The ladies are as yet undecided whether to regard this as a compliment or otherwise.
