Course in Mathematics.—Arithmetic, Algebra, Geometry, Trigonometry, Surveying, Mechanics, Acoustics and Optics, Astronomy.

Course in Modern Languages.—French Grammar, French Reader, Corinne, Racine, German Grammar, German Reader, Goethe, Schiller.

CROP PROSPECTS.

So far we have had a remarkably favorable year for all farming operations, in Western Oregon, and work is far ahead of ordinary years.

Those who wish to make a comparison of other countries with this, can judge of the difference when we tell them that the fall was favorable for putting in wheat and all fields sown in October, November and December have the best possible appearance and have made good growth.

Since New Year's a great deal of ground has been turned over and Spring sowing has concluded on all high lying land, and is in full progress on the prairies where April is often too wet to allow plowing and seeding.

So far there has been little rain in April, but enough to keep everything growing finely. Grass is well grown and it was necessary to cut the lawns here in Portland on the first of April, at the time when on even lower latitudes than this east of the Rocky mountains the country was covered with snow and locked with frost.

The dispatches daily tell us of snow and storms, while for almost a month we have had delightful Springtime, flowers in bloom, maples in bloom and leaf, lilacs budding forth and our yards green with grass that was too luxuriant. There is promise for an extraordinary crop of grain, gardens are in early, fruit promises to yield very abundantly and we feel rather sorry for people at the East who imagine the Oregon rainy season to be horrid, and plunge about in slush and snow and encounter fearful blizzards while we are making garden and rejoice in the presence of grain fields and fragrant bloom.

Eight years ago, this March, we left New York and went up the Hudson river road while loaded teams were crossing on the ice at Poughkeepsie; we found the valleys of central New York snowed in under fearful drifts; along the lakes it was bitter cold and Chicago was bleak as winter. Across the Mississippi the same condition of things; the Sierra Nevada route heavy with snow, and then the train went curving and whirling down the Western slope of the Sierras to find the Sacramento valley dressed in Emerald and rich with a wonderful bloom—a very Eden, and when we got home the Willamette had the same aspect. For a month past no fire has been needed much of the time and the latter half of March would compare favorably with an eastern May, but our March just past we confess was more than commonly agreeable.—[Willamette Farmer, April 15.]

COTTON.—Colusa Sun, April 2d: G. W. Ware, of Colusa, has planted on his Cortina farm, now, some 300 acres of cotton and is continuing the work. He will have, in all, some 500 acres. This is one of the most important moves ever made in this county. The interminable wheat crop must be varied by some other industry. Mr. Ware hesitated between cotton and sorghum. From his investigation of the subject he is satisfied that sorghum will pay, and he says as he is trying the cotton he hopes some other large land owner will try the other. Mr. Ware has planted what is known as the tree cotton, which will live in this climate some four years and bear as many crops, from a single planting. He says if the whole experiment is a failure which he does not anticipate, however, his land will be in excellent condition for seeding to wheat next fall.

INTRODUCTION OF TURKEYS.—The turkey was brought to England, says a writer in an English paper, in the early part of the sixteenth century by William Strickland, lieutenant to Sebastian Cabot. Since that time it has been acclimatized in most parts of the world; but the domestic bird contrary to the usual rule, has degenerated in size, flavor and beauty. The flesh of the wild turkey, it may not be known, is more pleasant like than that of the domestic varieties of the bird.

Young man, learn to be a solicitor, unless you prefer to stand on your own acres, drawing thence by labor your living. Yes, begin early and learn the trade thoroughly, for your whole life will be one of solicitation unless you are unusually lucky.

Ladies dress goods at the New York Store for 12 1/2 cts. a yard.

Wholesale Liquor House.

The undersigned offers Whiskey for sale in quantities to suit customers at 83 per gallon or \$1 per quart, at the Eagle Brewery. Lager Beer for sale and delivered at the usual price.

Mrs. J. WETTERER.

POOR MEN'S WIVES.

The trouble is, none of our young women are willing to become poor men's wives professionally, even though they may be so in reality.

The girl who marries upon \$1,000 a year looks forward to a life spent in second-rate boarding houses, from which she will squeeze out a certain cheap domesticity and some expensive pleasures.

The children which Heaven may send are not thought of nor provided for. It is a question whether the young wife can make good a living, or if she cannot, sell a wholesome man of victuals. She marries for freedom, to have a good time, to spend money which she neither earns, nor helps to earn—for Heaven knows that—but certainly not to make a comfortable, if humble, home for her husband. In this respect we consider the British girl has an immense advantage over the American.

From the highest to the lowest circles of society in Britain, girls are trained to make good and useful wives, inasmuch as ladies preside over the departments of their household and see that everything is kept clean, and the food is well cooked; so also in the lower classes mothers teach their daughters to do the same for themselves, without suffering any loss of dignity in the doing of it. Many of our American girls will be surprised to learn that the Princess Louise frequently makes her pastry, and makes it well, too. On one occasion, some apricot tarts of her making being praised by a guest, the royal lady wrote out the recipe, with the words underlined, "If you desire to have an apricot tart properly cooked, always make it with an upper crust."

The story has a point, and the point is that one can never know how to do a thing too well. One of the great hindrances against getting a good wife arises from the false basis upon which society is constructed. The idea that equality is the peculiar birthright of all Americans is erroneous. Where every person thinks he or she is as good as the next, there is always the opposite proof of incompetency. A person is neither better nor worse than another except in the degree of worth which is honestly sought to be attained. But the dispositions of young women of the present day, (and the same may be said largely of young men, though perhaps not to the same extent) is to think they are as good as any one else, without taking the trouble to be so. From this erroneous belief arises many of the evils from which society suffers.—[Kingston Freeman.]

Cigarette-smoking is growing in favor, and yet experience proves that it is more injurious than either pipes or cigars. Medical men declare that the tobacco of which the cigarettes are generally made is strongly impregnated with opium, and that the wrapper, invariably said to be rice paper, is the most ordinary quality of rice paper, whitened with arsenic.

A Baptist minister fishing near Cape Cod catches a strange fish, and asks of the skipper: "What manner of fish is this my good man? It has a curious appearance." "Yass! Only been around here about a year." "What do you call it?" "We call 'em Baptist." "Why so?" "Cause they spile so quick arther they come out of the water."

When old Mrs. Bunsby had got through reading the paper on account of the last great fire, she raised her spectacles from her eyes to the top of her head and remarked: "If the city fireman would wear the genuine home-knit stockings, such as we make and wear in the country, they wouldn't be a bustin' of their hose at every fire."

A Christian—"What are you doing there?" calmly asked an elderly and pious-looking skater of a young man who had fallen on the ice and rubbing his thigh with considerable energy. "Doing!" he exclaimed, pressing his jaws together to keep back a volley of profanity, "I am trying to be a Christian."—[Brooklyn Eagle.]

Some arithmetical chap has figured out that Vanderbilt's income would allow him to visit 8,000 circuses, eat 10,000 pints of peanuts and drink 5,000 glasses of lemonade every day in the year. But he doesn't do it. Thus it can be seen that wealth is given to those who don't know how to enjoy it.

—[Boston Post.]
