Dastardly Attempt

TO ASSASSINATE President Garfield!

The Assassin, a Disappointed Office-Seeker.

From the Oregon Sentinel's Extra, of Saturday evening, July 24, 1881.

Little before 9 A. M., this (Sat.) day morning the wires conveyed the exciting intelligence that President Garfield had been assassinated at the railroad depot in Washington at 8 A. M. just as he was on the point of taking the train for Baltimore.

The following telegrams received at different hours of the day, contain all the news so far as received of the dastardly outrage. At the time of going to press the President's condition is very critical.

First Dispatches. New York, July 2d.—President Garfield was shot twice this morning at the Baltimore & Ohio railroad depot in Washington. No further particulars.

WASHINGTON, July 2.—Gen. Garfield is dying.

A later dispatch: Dr. Bliss says the President's wound is not necessarily a mortal one.

The last telegram is probably the most authentic.

WASHINGTON, D. C., July 2, 10 A. M.—Dr. Bliss, Surgeon General Barnes, and Dr. Purvis are now in attendance on President Garfield, who is lying in a private room of officers' quarters of the Baltimore and Potomac Depot.

The man arrested for the attempted assassination of the President is a slender man, five feet seven inches in height, dark hair, blue eyes, and a high forehead. He refused to give his name, but persons who profess to know him say that his name is Dooley. His arrest took place immediately after the shooting by officers who were in the depot at the time.

The shooting occurred in the ladies' room of the depot in the presence of fifty or sixty ladies, immediately after the entrance of the President. Secretary Blaine and the President were walking into the depot, arm in arm when the shooting occurred, on their way to the Limited Express Train, which was about ready to leave.

Two shots were fired both shots taking effect—the first in the President's right arm and the other in the side, just above the right hip and near the kidney. Physicians are probing for the balls but so far unsuccessfully.

It is rumored now that the assassin is Ex Consul Dooley, whose removal as consul of Marsilles, France, is supposed to be the cause of his rash act.

The prisoner was first taken to police headquarters and afterwards remanded to the District jail, where he is now confined.

11:30 A. M.—The President is now being conveyed to the Executive Mansion under a strong escort of Police and troops.

President Garfield's condition.—The doctors disagree as to his condition at present.

Second Batch of Dispatches. WASHINGTON, July 2d.—At 9:30 o'clock this morning, when President Garfield was at the Baltimore and Potomac depot with his party waiting to take the train, he was shot twice by a man within two feet of him. The President's friends rushed to him as he fell and Blaine called for Rockwell. Station agent Corne arrested the assassin, who said, "I did it. I am a stalwart and Arthur is now President. Take a letter I have here to General Sherman, and he will tell you all about it."

Chicago, July 2d.—Chas. Guiteau, the man who attempted to assassinate the President, has been more or less known in Chicago for the past ten years. He is a foreigner by birth, and has a very persistent applicant for a consular position. He has haunted the Executive mansion several weeks, and his disappointment in not getting what he wanted has caused a temporary aberration of mind. Guiteau was a disreputable lawyer here, and was generally considered half insane. He went to New York seven or eight

years ago, and upon his return in 1876 professed to have been converted, and delivered several lectures under the auspices of the Y. M. C. A. He next appeared at the head of a scheme to buy the Chicago Inter-Ocean, and run it on the plan of the New York Herald, but as he had neither capital nor backing the matter was soon dropped by him. He left for Washington several months ago.

STATEMENT OF AN EYE WITNESS.

A gentleman who was an eye-witness of the attempted assassination gives the following statement of the occurrence: I was coming down Pennsylvania avenue when I saw a carriage coming up the avenue. The horses were running so fast that I thought they were running away. As the carriage arrived in front of me, a man put his head out of the window and said: "Faster, faster, faster, — it." After hearing this remark, I thought there was something wrong, and ran after the carriage. When it reached the depot a man jumped out and entered the ladies' room. He had not been there more than three minutes when the President arrived, stepped out of his carriage and entered the ladies' room. The President, after passing through the door, was just turning the corner of a seat when the assassin, who was standing on the left of the door, fired. The ball struck the President in the back and he fell forward. I ran into the depot, and just then the man fired again, while the President was falling. The moment the President fell a policeman, who had been standing at the depot door keeping the way clear for the President and his party grabbed the assassin by the neck, and as he pulled him out of the depot another policeman came to his assistance. Just after firing the shot the assassin exclaimed: "I have killed Garfield; Arthur is President; I am a stalwart."

PLACE WHERE THE SHOOTING OCCURRED.

The depot at which the assassination took place is given by some of the dispatches as the Baltimore and Ohio, and by others as the Baltimore and Potomac. The former is located a short distance north of the Capitol building, and the latter on Sixth street, standing between Sixth and Seventh and only part of a block south of Pennsylvania avenue, midway between the capitol and the White House. The fact that he was about to leave for Long Branch by the Limited Express fixes the place as the Baltimore depot, as that train is run between Washington and Baltimore by the Baltimore and Potomac. The Limited Express is a train made up exclusively of Pullman parlor coaches, run at extreme rate of speed, and makes but two or three stops between Washington and New York. The Baltimore and Potomac depot where the attempted assassination took place is in the central part of the business portion of the city.

How the news affected Vice-President Arthur: New York, July 2d.—Vice-President Arthur and Conkling arrived from Albany by boat this morning. The boat was late, not arriving until about 10 o'clock. As soon as she touched the wharf a telegram was handed Arthur. Upon reading it he dropped back in his chair greatly shocked. It is presumed that the telegram announced the shooting of President Garfield.

Substitute for Gold.

One of the recently introduced substitutes for gold, which has become very popular in some of the jewelry and other manufactories of fine wares in France, is composed as follows: One hundred parts by weight, of copper of the purest quality, fourteen of zinc or tin, six of magnesia, three and six tenths of sal ammoniac, limestone and cream of tartar. The copper is first melted, then the magnesia, sal ammoniac, limestone and cream of tartar in powder are added separately and gradually. The whole mass is kept stirred for half an hour, the zinc or tin being dropped in piece by piece, the stirring being kept up till they melt. Finally, the crucible is covered and the mass kept in fusion for thirty-five minutes, and the scum being removed, the metal is poured into moulds and is soon ready for use. The alloy thus made is represented as being fine-grained, malleable, takes a high polish and does not easily oxidize.

The Oregon Branch of the Union Pacific

The Oregon branch of the U. P. R. is being pushed on the Granger division as rapidly as it is possible to do it, the graders keeping close up to the engineers. Crisman & Weller, the sub-contractors on the first section of fifty miles, have a very heavy force of graders at work between Granger and Twin creek canyon, while another section of twenty-five miles west of that canyon, is also being graded, making seventy-five miles that will be ready for the iron in about thirty days. Ties are being delivered all along the first hundred miles, and there is now fifty miles of iron at Granger ready for the track layers. The Pocastello division has had a set back on account of delay in getting the right of way across the Indian reservation. But this obstacle is likely to be removed soon when the work will begin at once on a hundred mile section toward Wood river. It was the intention of the railroad company, to have pushed the construction of the Pocastello division, but the Interior Department ordered all work to cease until a treaty could be made with the Indians; hence nothing has been done except make the final survey and location across the entire reservation, both east and west from Pocastello. Col. Walcott, with a force of engineers, is pushing eastward toward Soda springs, and will keep on until he meets the engineering party coming from Granger. —Oxford (Idaho) Enterprise.

The new war cloud.

The French-Tunis affair is assuming threatening proportions. The progress of the French arms in North Africa is viewed with alarm by Italians, and is considered a menace against the sovereignty of King Humbert of Rome. The consequence is, a feeling of great bitterness between the two Latin nationalities. The immediate effect of the squabble is, the expulsion of

Italians or of Italian war-men from French soil, and French subjects are similarly treated in Italy. The cable news is disquieting, and properly interpreted, the two countries are on the very verge of a bloody contest. O ye foolish Latins! to go to war about the ownership of the deserts of North Africa.

A Soldier's Philosophy.

A soldier placed on sentry over a 64 pounder. When, two hours later, the guard comes to relieve him, he was not at his post, and is only found after some trouble, in a wine house. "You infernal scoundrel!" said the officer of the guard, "is that the way you keep watch over the cannon committed to your care?" "Well, cap," said the soldier, "don't you see, I figured the matter up, and I found it would take at least twenty men to move that gun. Suppose one or two came along, they couldn't do any harm, but if there was enough of them to carry it away, do you think I could prevent them—whip twenty of them myself?"

A Washington special says the Postmaster General has made a large reduction in the cost of the most notorious of the starling routes, from Vinias, Indian Territory, to Las Vegas, New Mexico. This route, which was 724 miles long, was originally let under the competition to the Parker combination for \$6,350 per year, for a term of three years and nine months. Within nine months the annual pay was raised by expedition and increase in number of trips, to \$150,691. This was the pay for ten months and it then became \$129,178. Three months later, or about a year ago, it was reduced to \$64,539, and the contractors drew pay at this rate until July 1st.

Henry McDonald was convicted at Silver City, I. T., a few days since of the murder of George Myers, whom he killed in cold blood in order to secure Myers' freighting outfit. During the trial, when the boxes containing the bones, hair and clothing of the murdered Myers were taken into the courtroom and emptied on a table, McDonald never changed color nor moved a muscle; but the veins of his neck swelled and stood out like small ropes, showing that however well he succeeded in preserving a calm and unexcited exterior, a fearful storm surged and raged within.
