#### WHISKY.

Louisville is becoming more and more the great centre of the fine Kentucky whisky interest, an enterprising San Francisco firm, Messrs. Schultz & Von Bargen, builds their celebrated "Davenport" distillery at Louisville.

In a ramble through the east end of the city a few days ago one of the reporters of the Post, attracted by the evidences of building and improvefound something new entered the premises, and upon making inquiries, learned that Messrs Schultz & Von Bargen, one of the most active and enterprising firms in the whisky business in San Francisco, Cal., had after an investigation of numerous sites in the State of Kentucky determined to remove and distillery at Louisville, Kentucky. Entering the distillery the reporter was tucky is produced, which in this distill give Mrs. Garfield my most respectful lery is assimilated as closely as possible to the methods by which the Bourbon whisky was originally produced in the early days of distilling in the State of Kentucky, that is to say, one bushel of meal is put into a small tub of about letter of the 5th, which has just reach ably lost his way and perished among the capacity of 100 gallons, where it is mashed or scalded by the hot slop direct from the still, being stirred by the President and Mrs. Garfield at the body of vaqueros about 10 days ago in hand in order that each particle of earliest opportunity. meal may be equally scalded. The small tub is then set to one side and allowed to cool naturally from twentyfour to forty-eight hours, at the end of this period cold water is added, the contents of the tub being again thoroughly stirred and broken up by the hand. The mash thus broken up then passes into the fermenting tubes, tion such a good send-off. When the in money, and a paper, on which were where the process of fermentation doctor returned to Yreka the editors the names of Rockford, Roaring takes place, lasting from forty eight to of both papers interviewed him, and Springs and Shirk's ranch. He was seventy-two hours according to the temperature of the atmosphere. At tor's remarks, as published in the him was found a light walking cane of the end of the fermenting period, the Tribune: beer is pumped into the singling or beer stills, which in this distillery are ly?" we asked. of copper-and are an improvement on the plan of the original distillers, who ever travelled through. They raise horse got away from him, and, being use log or wooden singling stills, as corn in the spring and wheat in the a stranger unacquainted with the counmany modern distillers continue to do one field and it was as high as my -the vavor arising from these singling shoulder; it was the finest sight I have etills passing through a huge coil of ever seen since I came West. It re. Last fall a small white pony was found copper pipe called a worm, into a large minded me of home. Another thing on the east side of the valley, and as tank filled with cold water which I noticed; the women all work; they do yet no one has claimed it. It probably causes the condensation of the vapor into what is called low wines. These have a thrifty air. Every house has low wines are then pumped a sign in front, of something to sell. into the doubling stills which are also of copper, and which are heated by the application of direct fire heat; the vapor arising from this second distillation again passed through a copper pipe or worm and is again condensed, this time into the pure juice of the corn known to the trade as the old fashioned hand made, sour mash firecopper, double-distilled "Davenport" Bourbon whisky, which can only be produced to perfection in the State of
