

OREGON SENTINEL.

JACKSONVILLE:
SATURDAY, APRIL 15, 1882.

AS COMPARED WITH BEECHER.

That compound of theological tufoony and clerical nastiness, Beecher, whose name is a synonym of all that is lascivious has just unburdened himself of a tirade against Irish and Germans and declares that the Chinese is "best of all." He says that the Irish never build up nations and they are the most admirable people that ever abominated the earth. The reverend debauchee who has done more harm to the religion he professes than a score of "Ingersolls" speaks falsely. No race has contributed more largely to the building up of this Nation than the Irish. Their hard and industrious muscle is beaten in and cemented with the brick and stone of every American city, woven into the structure of every American public work, found in our fields and factories and workshops. The stamp of Irish brain and Irish thought is written in our jurisprudence our literature, our theology. It quickens our commerce it vivifies our scholarship, directs our armies. Beecher is a falsifier of history. The Irish have defended American liberty with their passionate eloquence and with their swords. When he was robed in purple and fine linen and in soft dalliance with things forbidden by the religion he disgraces the gallant race he despises were hewing the way to National triumph in the pestilential swamps of the south, and baring their breasts to shot and shell, when his head was safe in the lap of Delilah. The Irish have not only helped to build this Nation but have helped to save it and the tongue that says otherwise should blister as the words are spoken. Compared with the hoary headed adulterer, whose name is a hiss, there are few Irish clergy not his peers in intellect, fewer still, thank God, not his superiors in morality, and we are glad to know that Ireland has still plenty of her brain and muscle to spare us, and that he who so despises them cannot much longer pollute the earth.

Dress up the Line.

The shock of the Presidential veto and the yell of real, heartfelt exultation that rang out from the Democratic State Convention seem to have made a few Republicans waver but they are gradually recovering from their paralytic. Is this the way battles are won or political ends accomplished? Was it thus the boys climbed the battle scarred face of Mission Ridge? Was it thus the brave little Sheridan actually plucked the laurels from the triumphant foe at Winchester? No! His words rang cheerily out "dress up the line boys, and we will lick them out of their boots" and the terror stricken army of the Shenandoah was instantly transformed from a disgraceful rout into a splendid triumph. Republicans who remember the dark hours of history will not quail at a momentary repulse but will dress up the line again as the boys did when so often beaten back bleeding and leaderless and press on to triumph. True men who are nerved by principle will not quail and shrink back because of momentary exasperation or disappointment at the defeat of a cherished measure. They must recall the words of the plucky Sheridan: "dress up the line boys" and never think for a moment that Republican victories can be won by unconditional surrender to Democracy or dream that Republican principles will be strengthened by abandoning them to a party that is in bitter antagonism to them.

Wagon Road to Klamath.

We are under obligations to Mr. George for a copy of the report of the committee on Military Affairs on his Scouting and Ft. Klamath road bill. The committee recommends an appropriation of \$15,000 for an extension of the road from Camp Stewart to the Fort and that sum would, if judiciously expended, soon be saved to the government and the road still be left. Mr. George deserves credit for the way he has pushed this bill through the committee and obtained their favorable report and we think there is no doubt whatever of its becoming a law. Whether it does or not Mr. George has done his part.

Lake County Politics.

The Republicans of Lake county have nominated an excellent ticket this year and a part, perhaps all of it, will undoubtedly be elected. It is as follows: Representative, J. H. Clayton, Sheriff, Robt. A. Emmet, Commissioners, W. S. Moore and P. G. Christman, Clerk, L. G. Ross, Treasurer, J. H. Hoffman, Assessor, J. H. Clark, School, G. W. Hayes, Surveyor, Herbert Dyar. The Republicans intend making extraordinary efforts to win in Lake county and the Democracy will do its best to capture it again.

SOUTHERN OREGON.

We receive so many letters asking information concerning this part of Oregon that we find it most convenient to answer them in our columns. Our description of Jackson and Josephine counties can only be general without going into minute details. Jackson county embraces an area of twenty eight hundred square miles; Josephine county about thirteen hundred, being jointly about three times as large as the State of Rhode Island. Of this area there is about one eighth only cultivable, the remainder being mountainous and only valuable for grazing purposes, or for gold mining. The climate varies according to altitude. That of Rogue River valley in Jackson county, lying 1,400 feet above the sea, being particularly genial and salubrious, snow rarely falling more than three or four inches in depth, and ice of greater thickness than half an inch being an exception. The same may be truthfully said of all the valleys of Josephine county. The rainfall is moderate, being a mean between the excessive moisture of Northern Oregon and the drought of Middle California, but sufficient for crops of every description. Wheat, barley, oats and corn are the staple crops. On the rich bottom lands sixty bushels of wheat to the acre is not an extraordinary yield, while twenty bushels on any land is an inferior yield. The other cereals, as well as corn yield exceedingly well. The fruits are apples, pears, plums, peaches, grapes, cherries, apricots and figs, all but the two latter being extensively cultivated, and with the exception of an occasional season when a late frost injures fruit, all bear abundantly. Improved farms can be purchased at from eight to thirty-five dollars per acre according to character of improvement and locality. A few locations may still be found where small tracts of government land may be secured, sufficiently large for those who contemplate fruit raising which industry is destined to become one of our most important interests. Timber of the finest quality is very abundant, Fir, Yellow Pine, Sugar Pine, Black and White Oak, Ash, Laurel and Maple being the most common varieties. Saw and grist mills are plenty and are successfully managed. A woolen factory, located at Ashland produces fabrics of the best quality and is continually adding to its capacity. Extensive experiments in the culture of Amber cane have been made, both in Jackson and Josephine counties, during the past two years with very satisfactory results. The climate and soil are found admirably suited to cane culture and it is safe to predict; that with proper mechanical appliances sugar will be made here in large quantities for export. There is a moderate quantity of the finest vine land skirting Rogue River valley inviting tillage and a considerable quantity of delicious wine is manufactured annually nearly all of which is consumed at home. For fertility, the soil of Rogue River valley—the largest compact body of land south of the Willamette, is unexcelled and for picturesque beauty the valley has no rival on this coast. Beginning in the angle made by the junction of the Siskiyou mountains and the Cascade range the valley stretches northward and widens, before the river is reached, into a beautiful expanse of grain fields, meadow and orchard, interspersed with groves of Oak and other timber. The valley is highly cultivated and dotted with comfortable homes but is capable of supporting three times the present population as many of the farms are much too large for the actual wants of their owners. The mineral interest of this section is still quite important. Since 1852 it is estimated that over \$30,000,000, in gold has been mined out in Jackson and Josephine counties and there is a large and industrious population engaged in mining and being well remunerated. Iron, Coal, Copper, Cinnabar and Marble are among our minerals but for lack of transportation little or no developments have been made. The railroad, now being rapidly extended into this county by the Oregon and California Railroad Company, is to reach this valley within a twelvemonth and its completion will open a market for our fine fruits and other products and give an impetus to every branch of industry. Nearly all denominations of religion except the Episcopalians are here represented and the public schools of Southern Oregon are equal to and, in some instances, superior to those of most agricultural sections of the country. We do not advise any person to come here expecting a rapid fortune to accumulate without labor but to sober industrious people, willing to work, we say come and share the richest soil and the most healthful climate to be found in Oregon for there is room for many more.

About thirty five emigrants from Iowa arrived in Douglas county last week.

RAILROAD NEWS.

Mr. W. R. Willis, while in Portland last week, purchased a saw mill to put upon his lands on Cow creek for sawing timbers for the R. R. Co. The mill is one of the most complete ever brought to the county and will cost when completed about ten thousand dollars. Mr. McKaskill, who has the contract for clearing the roadway to the 33d mile post, has the work about completed. It is also understood that the next section is already let. Ten fine horses came up from the Willamette valley last Wednesday evening for the railroad company. This company have about one hundred two wheeled carts at the depot to be put on the road in grading, just as soon as they can get horses enough.—[Plaindealer.

Says the Albany "Democrat": Work on the O. & C. R. R. between Roseburg and Redding is progressing rapidly. Miller and Son, who have the bridge contract, have bridges and trestles in for six or eight miles. The iron for the Myrtle creek bridge, the first bridge over the south Umpqua, as well as the first of any magnitude, are being conveyed past this city daily. Nearly every day one or more car loads of Chinamen go south to work on that road, and very soon there will be a chance for as many teams to go from this part of the country as may desire.

Mr. R. Kehler, President of the railroad has the following to say about the progress of work: This line is permanently located fifty miles south of Roseburg, to the big bend of Cow creek, and portions beyond are located. Near the 70th mile station there will be a tunnel 775 feet long, and in the 88th mile, between Grave creek and Jump-off-Joe, another, 2100 feet long. Contracts for completing both tunnels have been let to E. J. Jeffery & Co. of this city, the shorter to be done October 1st. Perforations will be made at both ends by drills operated by compressed air, and the contractors expect to make five feet per day at each opening.

Surveying parties under engineer John A. Hurlburt have been engaged all winter in running lines on the south slope of Siskiyou mountain, and their work on that side is now completed. Last week the parties moved to the north slope, where they will be engaged for some time. Nothing definite is yet known concerning the maximum grade required to get over the mountain nor the length of the tunnel, but it will not be less than 3500 nor more than 6000 feet long. The stone is argillaceous sandstone, and probably will not be so hard to drill as the basaltic rock in Eastern Oregon.

Between 700 and 800 men are at work on the grade between Roseburg and Myrtle creek, and during the last fortnight have made fair progress. The bridge work in the first thirty-three miles is well under way. It includes the truss bridges over Myrtle creek and the Umpqua river. Piles have been driven for the northern approach to Myrtle creek bridge, and that structure will be completed before the grade reaches the river.

W. R. Willis, of Roseburg, has the contract for furnishing the timber required on the first 50 miles, and has erected two new sawmills, one at upper Cow creek and one at Wolf creek, just south of the Cow creek hills. A contract for clearing at the big bend of Cow creek was let last week to J. J. Comstock, of Latham. The company has 10,000 tons of 56 lb steel rails about to arrive during the summer. This is enough for more than 100 miles of track. Enough iron to lay 20 miles, now stored here, will be forwarded to Roseburg, together with 100,000 ties, which were cut at Latham. The time required to complete the road to Rogue river valley is contingent entirely upon the number of laborers that can be secured. Graders, both whites and Chinamen, are not to be had for the asking, and it is not likely that the company will be able to engage as many as they wish to employ. Every mile of the work to Rogue river valley is heavy, but strenuous efforts will be made to reach this valley with the railroad by the close of the year. Beyond, to the base of Siskiyou mountain, the work will be comparatively light, and can be prosecuted all winter.—[Oregonian.

Words vs. Works. Watch?

The Democrats claim that Mr. W. D. Fenton should be elected to Congress because Mr. Arthur vetoed the Chinese bill. Perhaps so; but the people of Oregon will scarcely forget that Hon. M. C. George was one of the most earnest workers in behalf of the bill. We have only Mr. Fenton's word; we have Mr. George's works.—Welcome.

The "States Rights Democrat" was fearfully angry at the President's veto and his outrageous disregard of the rights of white labor. The editor fulminates the most wicked anathemas against Arthur, against Republicans generally, curses the heathen, and the CHINAMAN who turns the crank for the "Democrat's" press winks his moon eyes and says to himself "Artee catches hell but Democrat pay me money all same—all lites John."

Democracy has been living for a long time on the remembrance of the "time honored principles" but the diet was exceedingly thin. They now expect to survive for a while on a blunder of the Republicans and the blunder is all that will be aired during the campaign.

The National Surgical Institute of Indianapolis, with branches at Philadelphia, Atlanta, Ga. and San Francisco, which has a National Reputation, will permanently establish a branch at Portland, Oregon.

Two of the skilled Surgeons of this Institute, prepared with needed apparatus for the successful treatment of cripples, will meet all the old patients and such new ones as may desire treatment this year, at the U. S. Hotel Jacksonville, May 1st and 2d and hereafter at Portland, Oregon on the first two weeks of May and November of each year, commencing November, 1882.

Beware of all travelling Doctors who may claim to represent any other Institute, for this is the only Surgical Institute on this Coast with facilities and experience for the treatment of deformities. J. M. HINKLE, M. D. Geo. W. HANDY, M. D. Surgeons in charge, National Surgical Institute, No. 319 Bush St. San Francisco.

CENTAUR LINIMENT

always cures and never disappoints. The world's great Pain-Reliever for Man and Beast. Cheap, quick and reliable.

PITCHER'S CASTORIA is not Narcotic. Children grow fat upon Mothers like, and Physicians recommend CASTORIA. It regulates the Bowels, cures Wind Colic, allays Feverishness, and destroys Worms.

WEI DE MEYER'S CATARRH Cure, a Constitutional Antidote for this terrible malady, by Absorption. The most Important Discovery since Vaccination. Other remedies may relieve Catarrh, this cures at any stage before Consumption sets in.

SPECIAL GOLD MEDAL

Awarded in 1877, at Philadelphia.

Agricultural Implements
MACHINERY,

GROCERIES, ETC.

Also Local Agent for the justly Celebrated Fish Bro's Wagon,

The best Wagon on Wheels for the following reasons:

1. More care is taken in the selection of stock; only good, solid butt-cut timber being used.
2. The Wheels are all soaked in Boiling Lined Oil.
3. Every part is strongly braced; and instead of being bolted, is clipped so that the full strength of the wood is secured.
4. The Tires are securely bolted, after being thoroughly and carefully set.
5. The Skains are heated before driven on, and set in White Lead; consequently, when cooled, contract, making a perfect fit and impossible to work loose.

It is the only Wagon on which "Holmes' Patent Self-Oiling" rollers are used, the whole right and title having been purchased. The principal points of superiority over all other Skains are: 1st, Bearings are perfectly straight, which does away with side-draught. 2d, Has a perfect fitting Band. 3d, Unnecessary to remove the wheel to oil. 4th, Will retain oil longer, having an oil-chamber, and so constructed that oil cannot run out at the points. 5th, Holms' Brags is clipped on, bringing the purchase near the wheels. And many others, too numerous to mention, but which can be readily seen upon examination; and we cordially invite our many customers and all others who contemplate purchasing a first-class Wagon, to call and get prices before going elsewhere.

Nervous Debility.
A SURE CURE GUARANTEED.

DR. E. C. WEST'S nerve and brain treatment, a specific for Hysteria, Dizziness, Convulsions, Nervous Headache, Mental Depression, Loss of Memory, Spermatorrhoea, Impotency, Involuntary emissions, premature old age, caused by over-exertion, self-abuse or over-indulgence, which leads to misery, decay and death. One box will cure recent cases. Each box contains one month's treatment; one dollar a box, or six boxes for five dollars; sent by mail prepaid on receipt of price. We guarantee six boxes to cure any case. With each order received by us for six boxes, accompanied with five dollars, we will send the purchaser our written guarantee to return the money if the treatment does not effect a cure. Guarantees issued only by
