Abraham Dennis and of Oregon for the a fortune awaiting the young manwho will plant and care for a few acres of land in black walnut. He may not decline of life when it is most needed, it will be ready for him if he fulfilled the necessary conditions. Better far than the endowment policy in the most secure life insurance company is the black walnut grove on the young er's land. Read the following a correspondent of the Chicago ne:" Mr. C. B. Now every Illinois farmer has had it in his power to make more money off a row of black walnut trees around his farm than he can make on his farm if sowed in wheat. How can he do it ? This way: A farm of 160 acres would be 10.500 feet in circumference. Now plant walnut trees four feet apart all around it and you will have 2760 trees which will be worth \$25 apiece in twenty years. Again a farmer can set all his sloughs, low places and hog pastures in black walnuts. Two thous and handsome walnut trees growing on a farm would be worth \$50,000 in

Ike them fled to the Columbia river but was captur ed and returned to Klamath. A grand jury composed of chiefs of the Indians on the reservation was sum moned in the ordinary way, and an indictment for murder was returned. A petit jury of the Indians was empaneled, and after a fair trial, Spokane Ike was found guilty. Agent Nickerson then submitted a full report of proceedings to the Commissioner of Indian Affairs and the Secretary of the Interior. Secretary Teller sent word immediately that there was no U.S. law touching the case, where the offense was by one Indian against another, and that the matter was all in the hands of the Endians themselves. Thereupon Ike was sentenced and executed. The Indians appointed executioners, built a scaffold and aimed to send Ike to the happy hunting grounds in approved "Boston man's" style. They made a bunglesome job of it, but e execution was not so brutal as has en reported. Just before the trap sprung, Ike broke the frail rope tied his wrists and, throwing his above his head caught the rope. ped six feet, and his neck was adjusted it after the fall, but no one touched the body or arms, and the Indians resent the report that

The "Operator" says it takes nerve, patience and good temper to make a good telephone operator, and those who lack any one of these essentials had better let the profession alone. Only one person out of five, on the average, has a good telephone voice. They speak too low or too loud. Not more than one person out of twenty has the voice which a telephone operator should have-pleasant, even, plain and devoid of peculiarities. Let one of the ST. President Arthur, it is said, is far from being superstitious, but he has a presentiment that he will die before his term of office expires. So thinking, a shadow is cast upon his life. When people give way to a morbid feeling of this kind, it becomes a disease which sometimes serves to bring about the very result apprehended. History is full of such instances among the superstitious.
